

**PRACTICAL HEALTH HINT.**

**Neuralgia.**

Neuralgia means nerve pain. Neuritis means inflammation of the nerve. In neuralgia the pain comes and goes. In neuritis the ache is steady and sticks closely to the affected nerve. If the nerve could be taken out and examined we could find nothing abnormal in the case of neuralgia. In neuritis the nerve would be found to be inflamed. The question of what is behind the pain of neuralgia is more important than the answer to the cry for relief. It must be remembered that neuralgia is merely a symptom, not a disease. Sometimes malaria is the underlying cause. Other times it may be due to alcoholism, diabetes, lead poisoning, gout, rheumatism or Bright's disease. A diseased tooth or a diseased ovary may be responsible. In every case treatment must include treatment of the underlying cause.

**He Lacked Concentration.**

Spending of a man who was a failure because of his lack of concentration and his inability to know his own mind five minutes at a time, a captain of industry said he reminded him of a hunting dog he once owned:

"At sunrise the dog would start out on his own hook after deer. He would jump a buck and run him for miles. When the buck was on the point of exhaustion the hound's nostrils would catch the taint in the air where a fox had crossed the trail, and he would instantly decide that, after all, fox was what he had come for, and he would turn aside to pursue the fox. Perhaps an hour later, when the chase was growing warmer every minute, his keen nose would detect the presence of a rabbit, and he would go after the cottontail, with the inevitable result that by 4 o'clock in the afternoon that hound would be thirty or forty miles away from home in a swamp with a chipmunk treed!"—Saturday Evening Post.

**George and His Legs.**

Bit by bit the historical grubbers are digging out the truth about our immortal George. We have heretofore been told that he wore false teeth and that at Valley Forge he unobtrusively deceived his ragged and disheveled troops with the arrival of ample supplies of ammunition, which consisted of powder barrels filled with sand, and now a correspondent of the New York Sun declares that in the full length portraits of Washington by Stuart, of which there is one in the New York public library, the legs were not his own. "I have seen the letter from Stuart thanking the true owner for his kindness in providing a symmetrical foundation for the bust of the great president and presenting one of the smaller portraits in thanks for his kindness."

**Free Speech.**

An old negro woman had lived with a certain family in the south for many years. One day her mistress had occasion to reprimand her quite sharply for something that had gone wrong. The negroess said nothing at the time, but a little later her voice could be heard in the kitchen in shrill vituperation of everything and everybody, with a rattling accompaniment of pans and kettles. So loud became the clamor and so vindictive the exclamations that Mrs. C. went hurriedly down to the kitchen.

"Why, Lisa," she began in amazement, "who on earth are you talking to?"

"I ain't talkin' to nobody," the old negroess replied, "but I don't keer who in dis house hears me."—Harper's Magazine.

**Misprints and Maxim Guns.**

The late Sir Hiram Maxim says in his autobiography that when he organized the United States Electric Lighting company the printer sent home his stationery with the heading, "The United States Electric Lighting company." When he established his new gun company in England he told of this mistake in order to emphasize the importance of getting the stationery printed correctly. When the first sheets were brought to him, however, he found that the English printers had made his concern appear as "The Maxim Gum company."

**Easy Generosity.**

Mother (to small son)—Bobby, dear, I hoped you would be unselfish enough to give little sister the largest piece of candy. Why, see, even our old hen gives all the nice big dainties to the little chicks and only keeps an occasional tiny one for herself.

Bobby thoughtfully watched the hen and chickens for a time and then said, "Well, mamma, I would, too, if it was worms."—Rochester Times.

**A Generation.**

In the long lived patriarchal age a generation seems to have been computed at 100 years (Genesis xv, 1). Subsequently the reckoning was the same that has been more recently adopted—that is, from thirty to forty years (Job xiii, 16).

**Incongruous.**

Little Alck—What is an incongruity, uncle? Uncle William—An incongruity, child, is a divorce lawyer humming a wedding march.

**Vegetation in Polar Regions.**

The rapid growth of vegetation in the polar regions is attributed to the electric currents in the atmosphere.

**Local and Personal**
