### Stores May Be Open Until Noon July 4

The Business Men's association at its meeting Tuesday night discussed the matter of closing all stores and places of business July 4, although no definite action was taken.

Several merchants favored an all-day closing agreement, while many others favored keeping open until noon. The latter arrangement seemed to meet with the most general favor.

Large section of coal land in Roxey Anne district near Medford is leased, to be developed extensively. Two shifts will work on property.

### What Are The Six-Year Molars?

WHEN the child is about six years of age the first permanent molars appear. There are four of them—two in the upper jaw and two in the lower. They come in after all the temporary teeth have taken their place, and appear just back of the last temporary molar on each side and in each jaw. They are very often mistaken for temporary teeth, and folks imagine that any teeth coming in at that age must necessarily be temporary teeth. If anything goes wrong with them they let it go, thinking they will soon be replaced by Nature.

If any of the six-year molars are allowed to be lost by decay, it is a loss which cannot be replaced. Nothing can ever be done in the future which will permanently replace the lost molar after it has been removed.

These four permanent molars do most of the masticating for a period of five years. They prop the jaws apart while other teeth mature and take their several places in the jaw. Their loss is not necessary and may be wholly avoided. No other teeth are so necessary and important as the first permanent or six-year molars.
