He was in Liege until its fall to the Germans. Miss. Chappelle a few years ago was a parishioner of the Dean, when he was rector of the Church of the Advent. San Francisco. She went to Kenosha. Wis., to engage in church educational work, and was one of the first to the year the bank received from loenlist in war work activities and won high praise for her skill and earnestness. Mrs. Lathrop is a charming woman, devoted to her church and is singularly fitted to be a helpmeet to her husband in his religious work The happy event took place at Kenosha in St. Matthew's church, the officiating clergyman was the Rev. Charles E. McCoy at whose home the bride has been residing. Along with her host of friends we wish her great happiness.

POOR COWS AS HEAVY

EATERS AS GOOD ONES Feed cost of poor producing cows in Oregon is but little lower than that of high producing cows. It cost but \$11.86 less to feed the cows on pounds. The cost for cows yielding 200 pounds of fat was only \$6,75 Hence the difference in the total feed cost between cows producing 200 pounds and 400 pounds of fat was \$18.64. Yet the value of their product, which cost but little less than the product of the good producers, was worth only about half as much. The entire difference in cost of feed for cows producing 100 lbs. and 400 lbs. of fat was \$30.09.

COUNTY FARM BUREAU

HAD INCREASED YEAR County farm bureau and county agricultural agent work received a tremendous impetus in Oregon last year from war necessities for increased production and conservation, according to the annual report of Paul V. Maris, state leader of county agent work. The work has had the hearty cooperation of the federal food administration, state council of defense, granges, farmers unions, officers and teachers of the public U schools, and other organizations working in the cause of national defense. The county agent is the representative of the United States department of agriculture, the State Agricultural college and the people of the county. The agents and farm bureaus directed the campaigns for increased food production in the several counties, made surveys of seed stocks and labor needs, and organized defensive measures against rodents and other crop pests.
