Labor Shortage Predicted For 1919

WASHINGTON.—Colonel Arthur Woods has warned employers to hire as many extra men now as possible to protect themselves against a coming tremendous labor shortage.

American labor, he declared, will be short six million men and women this year, largely because immigration has been vastly reduced.

Immigration up to 1914 and for the seven years preceding, said Woods, amounted to approximately one million a year. In 1915 it was 320,000; in 1917, 300,000; in 1918, 100,000; and in 1919 it will probably be less.

The army, he said, will probably keep out of industry an additional million men for at least another year.

The shipbuilding program, said Woods, has taken approximately 500,000 workers from other fields so far.

In addition to that, he said, America is confronted with the problem of handling the largest food crop ever produced.

Reports on public works programs show the country is two billion dollars behind in this form of public improvement. Contracts are being let daily Woods stated, and the labor demand is constantly increasing.

STENOGRAPHERS AND TYPISTS NEEDED

WASHINGTON, D. C.—Large numbers of stenographers and typists are needed in the government service in Washington, D. C., notwithstanding the fact that thousands were appointed during the nineteen months of America's participation in the war, according to an announcement of the United States Civil Service Commission.

Examinations for both men and women are held thruout the country every Tuesday. Usual entrance salaries are \$1,000 to \$1,200 a year. Full information may be secured from the secretary of the local board of civil-service examiners at the post office or customhouse in any city or from the U. S. Civil Service Commission, Washington, D. C.

Men who have been honorably discharged from the military or naval service and who left positions in the civil service to take part in the war may be reinstated without examination.

LINCOLN COUNTY FOR ROOSEVELT HIGHWAY

NEWPORT, Ore., May 16.—(Special)—Lincoln county is waking up to the advantages of the proposed Roosevelt highway along the Pacific coast. B. F. Jones addressed a special meeting of Newport citizens last night on the subject at a meeting presided over by Carl Davis in which he not only explained the highway, but also the irrigation projects in eastern Oregon. A straw vote was taken afterwards and everybody voted "yes" for the adoption of both measures.—Oregonian.

Showing the World What 600,000 Owners Know

A stock Model 90 Overland touring car again proved its stamina by smashing completely the world's non-stop high gear record. This test was made in Oklahoma.

The car was sealed in high gear and the shift lever was removed. Not once was there the slightest mechanical trouble, the least hesitation, or the faintest break in the smooth, even action of the Overland motor.

This standard car is an exact duplicate of the Model 90 we will be glad to show you.

Fruit Slug Is Controlled By Spray

Pear and cherry slugs appear on the leaves as greenish brown larvae, explains F. H. Lathrop, assistant entomologist at O. A. C. These slimy creatures are from one-eighth to one-half inch in length and closely resemble small slugs.

The pest is easily controlled by the proper spray, but is serious if neglected. Dust sprays are ideal, altho the liquid sprays are very effective. For a few trees about the home, dust the foliage when the pest appears with air slacked lime, wood dust, or any other fine powder. The commercial orchardist controls the

2,325,000 DE LAVAL SEPARATORS

IN DAILY USE THE WORLD OVER
Wherever grass grows and cows are milked, you will find the De Laval the favorite cream separator.

More De Laval's are in use than all other makes combined.

The De Laval is time tested. It was the pioneer cream separator in 1878 and has led in popularity and sales for forty years.

It's the world's standard cream separator.

ASHLAND CREAMERY

slug by the addition of arsenate of lead to the "ten-day spray." He uses two pounds of the powdered arsenate of lead (four pounds of the paste) to 100 gallons of spray.

If the trees are allowed to go unsprayed the slugs will continue to feed on the foliage. The leaves are skeletonized, become dry and brown and often drop from the trees. In a short time the entire tree is defoliated. The slugs then drop to the ground to pupate, and a second brood of the pests emerges to attack the trees late in July and August.

They spend the winter as pupae in the soil. The short, blunt, black wasp-like adults emerge in the spring to produce the slugs which so seriously injure the foliage in May and June.

Riddle—138 acre farm east of here sells for \$8,000.

Spokane—Lumbermen of Washington, Oregon, Idaho and Montana, at a meeting here of the Western Pine Manufacturers' Assn., adopted resolution confirming opposition of organization to tentative increased freight rates on lumber from Pacific Coast and inland empire to rest of United States.

THE QUINCY MANSION, QUINCY, MASS., BUILT IN 1685.

America's classic example of a clapboard building preserved for over two hundred years by careful and frequent painting. It has secret panels, chimney staircase and hiding places, said to have been used by smugglers. Later the home of great statesmen and of the famous belle, Dorothy Quincy.
