### AT PARTING OF WAYS

A general sympathetic strike paralyzed all lines of business in Winnipeg.

It is another step in the organized campaign of revolution which is being carried on in this country.

Thousands of workmen who had no grievance at all against their employers, stopped work at the bidding of some so-called labor leader, in order to force settlement of a controversy between employers and employees in another line of industry, in no way connected with the "sympathetic" striker.

An innocent public was caused great loss, inconvenience and suffering.

And all for what? Simply to show the autocratic and brute power of radical leaders who would use labor as a cloak to hide behind, while sowing the seeds of revolution in America.

In Winnipeg the hand of Bolshevism is showing up the same as it did in the attempted Seattle revolution and at Butte recently, where the so-called leaders of labor, upon investigation were found to be alien radicals. And now Winnipeg finds the same class of leadership.

The general strike in Seattle was a flat failure, also the one in Butte. Scores of alien radicals were deported and others held for trial.

These strikes failed and the Winnipeg strike will fail, simply because the public can see what labor apparently cannot see, that labor is being made the fool and dupe of would be revolutionary leaders a la Russia.

Union labor must purge itself of this class of leadership and membership, and stand for the UNION instead of destruction of existing government and law and order or our country will purge itself of the unions.

This same element of Bolshevists, I. W. W.'s and anarchists have set July 4, as the date for the greatest strike of all, when they will call for a general walk out in the whole United States for the purpose of freeing Mooney and Billings, the convicted dynamiters.

Think of it! By mob rule, these radical leaders would set aside the judgments of our courts and pardon the murderers of men, women and children, just the same as they do in

Russia, where there is no law, property rights or industry today.

Why should American workmen follow such leadership. Surely they have brains enough to see where it will lead to.

And it's all done in the name of union labor and for what? To terrorize the public and force freedom for dynamiters, outlaws, alien enemies, etc.

Union labor is at the parting of the ways. It must either repudiate its radical and un-American leaders or it takes its stand openly against American institutions and law and order.

The day of the general strike is passed for public sentiment is absolutely against it and is demanding mediation and conciliation in place of armed industrialism.

This office had three calls for furnished houses on Saturday. If you have a furnished house it will pay you to advertise it in the Tidings. If you have a vacant unfurnished house it will pay you to scrape together a little furniture that will suffice for light housekeeping and offer it for rent furnished. The big demand is for FURNISHED houses. With a little neat furniture you can double the rent and get it. The demand is great.

A friend of ours tells us that he has discovered the absolutely correct pronunciation of Bolsheviki, and that it is this, "bottlefoviskey."—Spartanburg Journal.

The difference between a member of the U. S. Congress and a member of the English parliament is that the latter are all gentlemen and the former are all lawyers.

Thanks to the Paris Conference, a large number of people who never paid much attention to the Monroe doctrine now consider it an excellent idea.—Washington Star.

## "Wasted"

By Katherine Lee Bates in "Life"

London, May 6.—Lieutenant General Sir Robert Baden-Powell, addressing a central meeting of Boy Scouts at Guildhall, told of the heroic death of a French Boy Scout described in a letter found on the body of a dead German. General Baden-Powell read the letter, which follows:

"A traitor has been shot—a little French lad belonging to one of those gymnastic societies which wear the tri-color button. The poor little fellow in his infatuation wanted to be a hero. A German column was passing along a wooded defile, and the boy was caught and asked whether the French were about. He refused to give information. Fifty yards further on fire was opened from the cover of the wood. The boy was asked in French if he had known that the enemy was in the forest, and he did not deny it. He went with firm step to a telegraph post and stood up against it, with a green vineyard behind him, and received the volley of the firing party with a proud smile on his face. Infatuated boy! It was a pity to see such wasted courage."

Wasted? O blind of heart, you wrote it wasted,  
The loyalty, the courage and the pride;  
May, you, who could but pity and deride  
That pearl of boyhood, smiling as he tasted  
The sacrament of death: you, who had hated  
By steep descent from where the stars abide  
To heavy darkness; you, who had denied  
The gleam of God in your own clay, are wasted.

Will not all lovers of the fair and true  
Forever see the little figure stand  
Erect against the post, to die for France?  
Her leafing April vineyard better knew  
The beauty of that deed than your dull hand,  
Wondering at honor, counting faith mischance.

### COMMUNITY BUILDERS

The large banks of the nation are carrying on an extensive campaign to educate the public in the matter of carrying on and building up foreign trade. The banks are simply pioneering the way to build up new business.

Similarly the banks in the smaller communities are carrying on extensive campaigns to show the advantages of intensive farming, such as raising berry crops, sugar beets, etc., breeding up the flocks and herds and in general running the farm as a business proposition.

This is the new way of developing business by helping to develop the community first.

A live bank, operated along modern lines, is one of the greatest assets any community can have.

#### WOOL CENTER

It is not generally known that Portland, Oregon, is the second largest wool center in the United States. Boston only exceeding it in record of sales.

Wool growing should become one

### THE BEST ANSWER

On the whole the experiment of government operation has been one of the most fortunate chapters in the economic history of the nation. It has tried an arrangement which formerly was an issue, and found it wanting.

Government control of 240,944 miles of America's railway system, according to official figures for the first three months of 1919, shows cost to taxpayers to be \$176,116,065. The same period in 1918 showed a loss of \$146,462,329. And this with increased rates and reduced service.

A writer in the Kansas City Star has as his subject "The Sport of Hunting Birds Without a Gun." We suppose next Sunday his text will be, "The Futility of Hunting a Boot-legger Without a Ten-spot." This is about as sensible as hunting birds without a gun.

## East Side Market

James Barrett, Prop. Phone 188

of the greatest industries in Pacific coast states as natural conditions are favorable in this section.

Breeders of sheep are paying much more attention to handling their flocks with the result that wool in this territory compares favorably with the best grown elsewhere.

With the development of wool growing comes manufacturing of woolen goods and there is no reason why Western states in a short time should not be manufacturing as fine fabrics as can be made.

Raise the wool and manufacturing will come. Modern warehouses grade the wool in some thirty odd varieties so that the farmers get every penny there is in it and he has every incentive to increase his flocks.

### VETOED NEWSPAPER LIBEL LAW

Gov. Shoup of Colorado, who is democratic as an old shoe, seems to be a friend of the newspapers. He vetoed a drastic libel law put over by the legislature in an anti-free press crusade. It is a remarkable fact that the socialistic and soviet-inclined reformers want to cripple a free press. It is gratifying to know that one western Governor is not afraid of the power of the press.

**THE FRIENDLY TOBACCO**

"Friendly" is a very good word to describe the positively pleasing quality that sets VELVET tobacco apart.

There is that indescribable something about VELVET that is associated in men's minds with the thought of a friend.

It is a satisfying smoke—never harsh; without a bite. Like a friend it "agrees" with you no matter how much you use it.

Long, patient ageing—in wooden hogsheads—does it. Friendship must ripen slowly. Good tobacco the same way. An army of men have learned this through VELVET.

Today is a good time to get a lot of comfort out of a pipeful of friendly VELVET.
