In The Spring-Time.

Any fool knows enough to carry an umbrella when it rains, but the wise man is he who carries one when it is only cloudy. Any man will send for a doctor when he gets bedfast, but the wiser one is he who adopts proper measures before his ills become serious. During a hard winter or the following spring one feels rundown, tired out, weak and nervous. Probably you have suffered from colds or influenza which has left you thin, weak and pale. This is the time to put your system in order. It is time for house-cleaning.

A good, old-fashioned alterative and temperance tonic is one made of wild roots and barks without the use of alcohol, and called Dr. Pierce's Golden Medical Discovery, in tablet or liquid form. This is nature's tonic, which restores the tone of the stomach, activity of the liver and steadiness to the nerves, strengthening the whole system.

Send Dr. Pierce, Buffalo, N. Y., ten cents for trial package.

Salem, Oregon—"As a spring tonic to build up a weakened, run-down system and to give one an appetite I found Dr. Pierce's Golden Medical Discovery good. A friend had recommended it and I found it all that she had claimed for it."—Mrs. John Giesler, 1566 S. Bellvue St.

Good Cues and Tips

Billiard players prefer this place because they know that they can get GOOD cues; and modern equipment makes a lot of difference in the pleasure of the game.

Profanity, gambling and other undesirable elements are absolutely TABOO here. We invite GENTLE MEN only.

This is a clean, congenial amusement hall for decent clean-cut fellows.

Bootlegging Business On Columbia

ASTORIA, Ore.—Not until the nation goes dry on June 30, and perhaps not then, will the troubles of the authorities of Astoria and other northern Pacific ports with the bootleggers of California be over. Ever since the state of Oregon was captured by the prohibitionists trafficking on contraband liquors has been carried on between San Francisco and the Columbia river ports, more especially Astoria because of the numerous natural advantages afforded for the safe delivery of the wet goods.

The authorities here, in their efforts to run down the bootleggers, have searched hundreds of lumber carrying steamers and schooners, the vessels plying regularly between San Francisco and Columbia river ports as well as the ships making occasional calls at these ports, their last previous stop having been some southern port. Their tireless efforts have made the path of the carrier of contraband an anxious one and their efforts have brought thousands of dollars into the municipal and county treasuries. But there has been much of the contraband liquor which has escaped their vigilance.

One of the favorite ways of evading the authorities is to toss the contraband overboard at a designated point at the mouth of the river where it is picked up by the person in collusion with the custodian from San Francisco to the Columbia river port. Then it is "fished" up and sold at from \$15 to \$25 a quart. The price delivered at Astoria runs from \$90 to \$120 a case, but that is for bonded goods.

As high as 10 and 15 cases have been known to be carried on one ship and oil tankers have proven a terrible field for the authorities until every one of them was searched as it was docked.

Time For Second Codling Moth Spray

The first brood of the codling moth continue to emerge and it is very important that all pomaceous fruits be kept thoroly covered with arsenate of lead for the next thirty days, at least. Make application follow your last one, not to exceed three weeks between the sprays, two weeks is better. Orchards that were sprayed during the week of May 19 to 24 should be sprayed again during the week of June 9 to 14. Due to the fact that the amount of infec-

Information For Oregon Fishermen

These bulletins are issued weekly by the Forest Service and report the fishing conditions for streams in Western Oregon. These reports are based on data furnished by field men.

Wood River—Good catches of Rainbow and Dollyvarden trout are being made near Fort Klamath. Reached by train from Klamath Falls and auto road on either side of the lake.

Seven Mile Cr ek and Anna Creek—Good catches of Rainbow and Dollyvarden trout are being made on these streams near Fort Klamath. Reached by auto or wagon road by way of Fort Klamath.

Upper Klamath Lake—Good catches of Lake trout are reported at Crystal Creek, Rocky Point and Odessa. Reached by auto road along

west side of lake by way of Klamath Falls. The fishing is chiefly with spoons.

North Umpqua River—Fish are not biting because of heavy rains and snow water.

East Umpqua River—Fishing not good because of high water.

Row River—Fair catches are being made at Dorena, Wildwood and Row River basins. Reached by auto by way of Cottage Grove. Fish are taking spinner and Royal Coachman fly.

Sharps Creek—Fair catches of trout are being made near the Pony bridge. Reached by auto from Cottage Grove.

Layge Creek—Fish are not biting well on these streams because of cold water and rain.

Eugene—Improvements on road from here to Florence makes travel possible.

Baker—Fields Mutual Mining Co begins operations.

tion for the season is largely due to efficiency of the application for the first brood, we deem it wise to recommend more concentrated spray at this time. Use six pounds of powdered arsenate of lead or twelve pounds of paste lead to the two hundred gallon tank. It is not necessary to use lime sulphur for scab at this time as the amount of new infection will be relatively small and the damage will not compare with the burning of fruit and foliage where the lime sulphur is used.

A very small mite has been found in several pear orchards that causes a rusty appearance of the fruit and foliage. This is sometimes known as Pear Leaf Rust Mite. In orchards where this is prevalent it will be well to use one gallon distillate oil emulsion to one hundred gallons plus a pint of nicotine sulphate in combination with the regular lead spray.

Dated: June 6, 1919.

County Pathologist.

Langel Valley To Get New Irrigation

KLAMATH FALLS, Ore.—For the irrigation of the upper Langel valley, in eastern Klamath county, which embraces over 16,000 acres and which is to have water from Clear lake in California, a few miles south of that valley, the first preliminary ditch surveys are now being made and altho there is some legal procedure yet to be gone thru. It is hoped the work can proceed without interruption.

This district, which has been striving to get irrigation for many years, had a proposition last year from the United States reclamation service to furnish the water from Clear lake for \$10 an acre, the farmers to put in their own ditches. A dam has already been built there and as the lake is about 70 feet above the level of the valley, it will be a gravity proposition.

The residents of that district voted to form an irrigation district a few months ago to take advantage of this offer. The land here is known to be unusually fertile, and with irrigation it can be made to produce bumper crops.

The promoters of unit No. 4, a tract of 800 acres just below Bonanza, 25 miles east of this city, announce that their project by which they will pump water from Lost river onto the land, is about ready. They have finished their ditch which is two and a half miles in length up to the point in the river, where the pump is already installed and they will have the water flowing on the land in less than 30 days. This with the other units that have already been completed in that vicinity, will bring the watered area up to about 6,000 acres.

STRAWBERRY HARVEST IS IN FULL SWING

The arrival of 500 berry pickers at Hood River Thursday temporarily relieved the shortage. Three-fourths of the arrivals were women and children, most of whom proceeded to the Dee Flat country. More than 1,000 outside pickers are here now.
