Yes, we have lights.

Transportation from the golden sands of Nome at the government's expense is a humiliating climax to the glowing anticipations of many a seeker for easily-gotten wealth, but it is better than starvation.

The British correspondents are getting "sassy" because Uncle Sam refused to go to John Bull for his instructions in re China.

Upon the questions of wages, it is worth while to give the exact language of the report, as follows: "It would, of course, be too much to say that these results show the general effect of combinations on wages.

THE TRUTH ABOUT TRUSTS.

Brooklyn Standard Union. Since Mr. Bryan's anti-imperialist deliverance at Indianapolis, the other day, when to his ill-concealed surprise, after coming a thousand miles to hear the news, he learned that he had been nominated by the convention next door, the trust issue, as a working and available force in the political arena, has passed into a state of comparatively "innocuous desuetude."

The law of the effects of the trusts on prices is deduced from more than fifty pages of exhaustive and carefully itemized tables, of which, perhaps, the best idea may be gained from a synopsis of the figures themselves the earliest and the latest dates being given and the common but variable unit of measurement understood:

Table with 3 columns: Commodity, Price 1892-93, Price 1899. Includes Sugar, White lead, Oil, Proof spirits, Tin plate, Beer, Iron, Charcoal, Cigarettes, Smoking tobacco, Loose tobacco, Crackers, Flour, Lard, Cornmeal, Oatmeal.

The conclusions of the report will doubtless come as a surprise to the politicians of all parties; possibly to those who claim to be scientists rather than statesmen. For it has been so often said and so long reiterated, that the rich are growing richer and the poor poorer, and that the trusts are the cause of all the ills that the social flesh is heir to, that most people had come to believe it, simply on the well known every day rule of common life, that what everybody says must be true.

expert of the department, and the result of the whole work is prefaced by a brief introduction by Commissioner Carroll D. Wright, than whom there is no higher authority both as a social statistician and master of all the intricate questions affecting the welfare and the interests of labor.

The chief objects of inquiry, as might have been expected, were directed to the effect of the trusts on prices and on wages, and while many other allied topics are discussed, upon these two main propositions, in which the whole public and all parties are concerned, was the principal effort bestowed. It will doubtless surprise Mr. Bryan and his followers to learn that the facts, the simple, stubborn things, demonstrate, despite all that has been said to the contrary, that trusts have actually lowered prices and advanced wages.

"Upon the questions of wages, it is worth while to give the exact language of the report, as follows: "It would, of course, be too much to say that these results show the general effect of combinations on wages. The returns are not numerous enough. Besides that, many of the combinations were formed at the beginning of a period of general industrial prosperity, so that an increase in wages was perhaps to be expected. The tables do show, so far as figures go, that these combinations have not decreased wages among these classes of wage earners.

The law of the effects of the trusts on prices is deduced from more than fifty pages of exhaustive and carefully itemized tables, of which, perhaps, the best idea may be gained from a synopsis of the figures themselves the earliest and the latest dates being given and the common but variable unit of measurement understood:

peals to class prejudice, their attempts to organize masses against classes, to array capital and labor in conflict, they will find that the cold facts have cut the ground from under their feet.
