Custom house officials at Portland have taken decisive steps to withhold the landing of certain goods brought to that port on the British steamship Monmouthshire, because of plague being epidemic in the East. The refusal on the part of the officials to allow the goods to land has stirred considerable feeling among the Celestials of that city, who are not backward in declaring that no plague conditions exist in the Orient, and seem to be of the opinion that the officers are working for a graft. Instructions were received from Washington saying that the stuff should not be allowed to be taken ashore there, but might be at Astoria at the risk of shipwreck. A large amount of the stuff would undoubtedly be damaged if put through a disinfecting process.

TO POSTPONE OLD AGE. The latest theory is to apply electricity to the base of the brain. The hardening of the arteries—the first symptom—is followed by a crumbling away of the brain cells. This process produces the mental characteristics of old age. Not alone does this treatment restore the feelings of youth, but produces the appearance of it. While hundreds of experiments have been presented, there is but one way of prolonging youth, and that is by the preservation of health. For this purpose, and for the cure of constipation, indigestion, dyspepsia, liver and kidney disorders, Hostetter's Stomach Bitters were placed before the public over fifty years ago. Money cannot buy a better remedy. Try it, and you will be convinced.
