D. H. Weich returned yester-lay from Portland and learned for the first time that the fisher sen were about to take that the fisher sen wer, about to take legal action to compel the removal of pilling driven for him on the sands about one-half mile northeast of Tongue Point. Mr. Welch made application to Captain Langfitt on May 21 to drive the pilling for a dock and was informed in a letter, dated June 13, that the application had been approved. Mr. Welch stated to an Astorian reporter that there was not nine feet of ware over the oiling at either high or low that there was not nine feet of water over the piling at either high or low tide and at the latter period it is impossible for a gasoline launch to get within 1500 feet of the site of the proposed dock. Mr. Welch thinks that possibly the fishermen are laboring under the impression that a trap is being constructed and this he desires corrected. He intends establishing a sething ed. He intends establishing a selning ground on the sands and will resist the efforts of the gill-netters to have the pilling removed.

In a general summary of the condition of crops the past week the Weekly Crop Bulletin says: Fall wheat is ripening nicely and even that reported damaged by frost is recovering and will damaged by frost is recovering and will yield better than formerly expected. In the Willamette valley the wheat crop is generally in good condition and remarkably free from insect pests. There is some complaint of its heading short and of the heads being small, but these complaints are not general. In Southern Oregon the wheat crop will be below the average on account of try. below the average on account of dry weather. Winter oats are heading nicely, and fall barley is ready to cut in Southern Oregon. Corn and gardens although showing improvement, ar-still backward. Hops are making a good growth and as yet have not beer damaged to any noteworthy extent by lice. The cutting of clover hay is well advanced and the first crop of alfalfa has been profity much all cut and se-cured. Potatoes are doing well, Pasturage continues abundant and stock in excellent condition. In Coos count; cutworms have again made their appearance, and large quantities of their eggs are to be found on the underside of fence-rails and in similar places. They have not yet done much damage, but farmers are apprehensive that they will later. The stawberry season is drawing to a close, and the crop has proved to be a very good one, both in quantity and quality. Cherries ripened rapidly during the week. Apples are dropping badly in the Hood river district.

> Portland has another sensation which is being suppressed through the efforts of a number of officials. It concerns the shanghaing of the son of a city of-ficial. The boy, about 19 years old, is considered incorrigible and has caused his family no end of trouble while the police have been called upon to correct him many times. Of late he became so bad that steps had to be taken to give him a severe lesson. Through him four girls were arrested because they tried to hide him from the polloe when the officers were searching for him. These girls were seatenced to jull as vastrants but will be released and returned home, providing they will promrestraint, the young man was finally shipped to sea on the German ship As-terschwon. He was induced to sign articles for four years service under the impression that it was surety bond for a position as peanut butcher on the O. B. & N. trains. Thinking he was assisting one of his father's deputies to purchase a dog on board the vessel he went down the river willingly. Once on board ship he was locked in a cabin and informed that he had been shang-haied in true beach comber style. Des-pite protests of future good behavior, he was kept confined and is now on his way to Queenstown.

New Yorkers interested believe that the plans of the Onffroy syndicate to control the salmon industry will yet go through. The Journal of Commerce in its issue of yesterday says that little information is obtainable in reference to the proposed consolidation of salmon cancers on the Pacific coast, which has been hanging fire for over two months. The report that several representatives of the canneries had left the coast for New York for the purpose of conferring with the financiers is confirmed. It is, however, too early to say wheth deal will actually be consummat here is still considerable work to b done. At the same time the fact these gentlemen are coming indicates that there is at least a prospect that plans will be carried out. It is conceded that the Alaska Packers Asso-ciation is not interested. It is claimed however, if the deal goes through on the basis now being discussed that the new company would control some 70 per cont of the business. It is not in tended to make any change in the au-

fifty years of cures to its credit. Use the Bitters for dyspepsis, indigestion, billiousness and constitution. It never falls to effect a speedy and permanent cure. It is also an excellent tonic. If
