

THINKS BOTHA MAY BE CAPTURED

Escape From Natal Frontier Believed Impossible.

RETREAT HAS BEEN CUT OFF

London Standard Thinks Transvaal Army is in Tight Corner, While the News Says Boer General Has Got Clear Away.

NEW YORK, Oct. 14.—In explanation of the statements of some of the London dailies concerning the war in South Africa, the London correspondent of the Tribune cables as follows: The Standard thinks that the British troops have a good chance of capturing General Botha. Very little is known here in regard to the movements of the Boer commander-general since the failure of his attempt on the Natal frontier. His wagons, with an escort under Grobelaar, have been detached and sent eastward.

Botha, with his main body, marched in the same direction for some time only to find that his retreat was being cut off by one of the British columns, which was apparently moving parallel to him. He then marched on due north to within a few miles of Piet Retief, where he is believed to have halted at a difficult and perilous position. He cannot break back toward Zululand at the Natal frontier without throwing himself right into the arms of his pursuers. If he goes north he will touch Swaziland, and will get into trouble with the warlike natives. He may possibly drift away toward the west, and find a temporary refuge in the passes of the Elandsberg.

HAMPERED BY RAINS. The Boer Force Has Melted Into Small Groups.

New York, Oct. 14.—Heavy rains have temporarily interfered with communication between the columns in the field save a Dundee, Natal, dispatch to the Times.

As was feared, the Boer force, in trying to make good its escape, has melted into small groups. Commandant General Botha and the main body of burghers, accompanied by three commandants, have reached Pongola forest, near Lamaburg, Transvaal.

AN ACCOMMODATING DETECTIVE. Would Manufacture Evidence Regarding Transvaal Secret Service.

LONDON, Oct. 14.—Mr. Markham, M. P., who has come into such prominence of late, in a recent speech at Kimberley made many statements of general interest, according to the London correspondent of the Tribune. He said that General Buller's international detective had paid him a visit and offered to give him valuable information about the Transvaal secret service. The detective added that if Mr. Markham wanted any information manufactured he could manufacture it as well as anybody; but the offer was rejected.

COLONIAL TROOPS ENLISTED. CAPE TOWN, Oct. 14.—No passengers are allowed to sail from Cape ports without military permits. Four additional squadrons of colonial troops are enlisting for active service.

THE ZIONIST MOVEMENT. Israeli Zangwill Talks on the Forthcoming Convention.

NEW YORK, Oct. 14.—The London correspondent of the Press sends the following interview with Israel Zangwill upon the Zionist movement: "Israel Zangwill, the novelist, poet and playwright, concerning the coming conference of the Zionists in Basel, Switzerland, said: 'It is not impossible that Dr. Herzl

Pears'

To keep the skin clean is to wash the excretions from it off, the skin takes care of itself inside, if not blocked outside.

To wash it often and clean, without doing any sort of violence to it requires a most gentle soap, a soap with no free alkali in it.

Pears', the soap that clears but not excoriates. Sold all over the world.

may have a great surprise for the world to be announced at the convention. He has been negotiating in person with the sultan of Turkey for a charter for Palestine and it is possible that he has obtained that charter. It seems likely, at any rate, that the charter may be had before many months.

FAIL TO CO-OPERATE. Differences Between Two Labor Societies Over Strikes.

NEW YORK, Oct. 14.—The misunderstanding between the International Association of Mechanics and the Amalgamated Society of Engineers led to an exchange of words between the representatives of the two bodies at a recent meeting of the Central Federated Union. The Amalgamated Society of Engineers has its headquarters in England and has only a branch organization in this country.

The trouble grows out of the failure, it is alleged, of the Amalgamated Society, which has a number of machinists in its ranks, to co-operate with the international Association of Machinists during strikes. The Amalgamated Society was suspended by the building trades section of the Central body last week for failing to strike in sympathy with the machinists. George H. Warner, delegate of the International Association, started hostilities by demanding that the action of the building trades section be sustained. The whole question was finally referred to the affiliated unions for a vote.

HAD AN INTERESTING TRIP. Mayor Perira Returns From Journey Through China.

NEW YORK, Oct. 14.—The Shanghai correspondent of the Times says Mayor Perira, an officer of Brigadier-General A. G. Creagh's staff, has completed an interesting journey from Tai Yuan Foo to Shan Foo and thence to the Yangtze river. He was everywhere well received. Despite the terrible effects of the famine in the province of Shan Si and the floods in the Yangtze region, the Chinese court appears determined to make the journey to Kai Fong Foo as a splendid imperial progress, involving heavy expenditure.

According to the opinion of native officials, the court will winter at Kai Fong Foo and proceed to Peking in the early spring.

ZINC COMPANY MORTGAGED.

NEW YORK, Oct. 14.—Secretary A. P. Cobb, of the New Jersey Zinc Company, in explaining why the company has given a mortgage of \$100,000 to the Farmers' Loan & Trust Company, of New York, which has just been filed in the Essex county register's office, is quoted in a special to the World from Trenton. He says a part of the loan is to secure the payment of an issue of 25-year four per cent gold bonds. The remainder is to be used for extending the company's plant in the Lehigh valley and to finish the new town of Palmerton, near Bethlehem, which is now being built around a new plant. This and other improvements under way will cost \$4,000,000.

NEW RACE COURSE.

NEW YORK, Oct. 14.—The Automobile Racing Association of the State of New York has made arrangements for the construction on Long Island of a race course for automobile tournaments. The plans call for three tracks—one for speed, one for "rough riding," and one for coasting. This is said to be the first track of the kind in the country.

FATHER VISITS SON.

NEW YORK, Oct. 14.—General E. L. Molleux, father of R. B. Molleux, has just paid a visit to his son at Sing Sing prison. General Molleux reports that R. B. Molleux, who is charged with the murder of Mrs. Katherine Adams, is in excellent physical condition and that the state court of appeals will grant him a new trial in the next few days.

MAY PUBLISH HELIOGRAPH.

NEW YORK, Oct. 14.—So great is the agitation aroused by the recent speech of Sir Hector Buller that, according to the Tribune's London correspondent, General Buller is being urged by his friends to publish the full text of the heliograph to General White in reference to the surrender of Ladysmith.

SIR HECTOR MAY GET IT.

NEW YORK, Oct. 14.—The London representative of the Tribune is authority for the statement that Sir Hector McDonald may be offered the post of commander-in-chief of the Australian troops.

WHEAT MARKET.

SAN FRANCISCO, Oct. 14.—Wheat, December, 97 1/2.

CHICAGO, Oct. 14.—Wheat, December, opened, 76 1/2; closed, 76 1/2.

TACOMA, Oct. 14.—Wheat, bluestem, 54 1/2; club, 53 1/2.

PORTLAND, Oct. 14.—Wheat, Walla Walla, 52 1/2; Valley, 54 1/2.

KILLED THE NOBLEMAN

RUSSIAN ARMY LIEUTENANT SHOOTING MALINKOFFSKY.

Nobleman Would Not Desist Addressing the Officer and Scuffle Ensued.

ST. PETERSBURG, Oct. 14.—(Cable.)—An interesting case affecting the military has just been reported here and is causing considerable comment in the Russian papers.

On April 20, Lieutenant Klykoff, of the Thirty-seventh dragons, and a certain nobleman Malinkoffsky had an exchange of words in the local zoological garden. Lieutenant Klykoff placed his hand on the handle of his revolver and ordered Malinkoffsky to desist from addressing him. Malinkoffsky drew his weapon and after a scuffle fired three times. Malinkoffsky died from the effects of one of the bullets.

Klykoff has been tried in military court and condemned to a year and a half imprisonment. The court itself petitioned the emperor to reduce the sentence to two months' arrest in a fortress. The case has caused much concern in the newspapers. The military party declare that the wearing of the uniform necessitates officers defending the honor of the entire officers corps as well as their own personal honor. To this the Novoye Veroye replies that it would be better to permit officers to wear civil clothing when off military duty.

It can now be foreseen that the widespread crop failures, the consequent famine and the relief work of the government and of philanthropists will be aggravated further in this empire during the approach of winter. The word "famine" is not used in the official publications, which speak of famine-stricken districts as "places that are in an unfavorable condition as respects the harvest," but the facts that are freely admitted show that the struggle to keep the peasant population alive until a new harvest will be harder than has been known since 1902. The extent of the disaster can be vaguely surmised from an inspection of the government report, which names the province of Volhynia as among those where there was an "unfortunate harvest," and gives the amount of governmental assistance required as 72,000 pounds of rice.

RHODES DID CONTRIBUTE.

Threatens Sanction if Forced to Help to Other Causes.

NEW YORK, Oct. 14.—Business associates of Cecil Rhodes make no secret of the belief that his correspondence with Mr. Schanhorst in regard to the famous check of \$5000 forms by no means the best card which the Cape premier has to play against his liberal opponents. They assert that this sensation is as nothing compared with what will follow if Mr. Rhodes is forced to reply to the charges made against him.

It is believed that he is in a position to disclose the financial relations between certain officials of the Liberal Association and Mr. Kruger. The Liberal, in their part, believed Mr. Rhodes endeavored to bribe Mr. Schanhorst by offering to make him a present of a number of shares in the Colonial Company of South Africa.

DE BEERS DIAMOND MINES.

Three Men Governed Who Retained One-Fourth of Net Profits.

NEW YORK, Oct. 14.—Commenting upon the De Beers mining situation in the Tribune's London correspondent says that Messrs. Rhodes, Wambler and Bell three life-givers of the De Beers diamond mines, are entitled to one-fourth of the net profits after 36 per cent has been paid by the company in any one year. These rights, due with the holders and it is now proposed to commute them by the payment of an enormous sum. Among such proposals, the proposition is meeting with a good deal of adverse criticism. No one of the three governors is a good life from the point of view of an insurance company and the De Beers are worth \$70,000,000 a year to them at present.

MURDERED FOR HIS MONEY.

Chicago Man Who Won at Gambling Wasn't and Killed.

CHICAGO, Oct. 14.—Charles Crockett, 37 years old, died in a hospital under circumstances that lead the police to believe he was murdered. In company with others, it is said, he spent several hours gambling and left for home with his winnings. He was found on the street unconscious and died without being able to tell who his assailants were. When found his money was missing. Thirty suspects were arrested and in the room of one was found a hatchet which the police believe was the weapon used in the murder.

CONTEST OVER MILLIONS.

NEW YORK, Oct. 14.—The contest over the will of Jacob S. Rogers, who left his millions to the Metropolitan Museum of Art, will, it is said, be based

upon the claim that an agreement was made between the testator and his brothers, Columbia, Jason and Theodore, pledging themselves to dispose of their properties after death to members of their own families. This agreement was carried out by Columbia, Theodore and Jason. The agreement provided for the disposition of the bulk of the properties and there was nothing to prevent any of the brothers making minor bequests to institutions or friends. But the contestants held that the agreement was a bar to such a disposition as Jacob S. Rogers made of the bulk of his property. The written agreement itself has been discovered and what has become of it is a mystery.

PROPOSED BALLOON VOYAGE.

French Count Will Attempt to Cross Mediterranean Sea.

NEW YORK, Oct. 14.—The Marseille correspondent of the World explaining the attempt of Count Henry De la Vaulx to cross the Mediterranean Sea in a balloon says that since his trip in a year ago, the count has repeatedly declared his belief that it is practicable to cross the Atlantic in this way and has expressed a hope that he may prove that belief promising to undertake the trip as soon as he can. This present balloon voyage may be deemed a mere preliminary experiment to something of this sort.

WANT RAILWAY CONCESSION.

Russo-Belgian Syndicate Makes Application to the Porte.

NEW YORK, Oct. 14.—Information has reached London from Constantinople that a Russo-Belgian syndicate has made application to the Porte for an important extensive railway concession in Asia Minor and Palestine. The London correspondent of the Tribune says the application is regarded as a political as well as a financial undertaking and as designed for the purpose of curtailing the growth of Germany's political and financial in Asia Minor, Turkey, the Holy Land and Arabia.

BUYING STEAMSHIP LINE.

Pierpont Morgan Negotiating for Purchase of White Star Line.

NEW YORK, Oct. 14.—Although it has repeatedly been denied by the officials of the White Star Line, the rumor that J. Pierpont Morgan is negotiating to buy the line is again revived by Americans arriving from London, says the Herald.

It is reported that he will soon go to England to look after the project in person and that Clinton Dawkins, one of Mr. Morgan's partners, will precede him across the Atlantic.

TWO KILLED; SEVERAL INJURED.

CLIFTON, Ark., Oct. 14.—An explosion of a boiler in the plant of the Detroit Copper Company instantly killed W. W. Morgan and P. A. Adams, firemen.

Harry Davidson, conveyor engineer, and Joe Antevias, helper on the engine, and several others, were seriously injured by the explosion, but the injuries are not necessarily fatal.

REPAIRS RESTORATION EXPEDITED.

NEW YORK, Oct. 14.—The PRER representative of the Times says that four parties are proceeding between M. Looze, the Chinese minister, and the Chinese embassy for the restoration of the Chinese of the Shan Hai Kwan North China Railway. The Chinese are expected to be entirely satisfactory. The Chinese hope the railroad will be restored to them within the next fortnight.

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which made life so tedious and unendurable. I used medicines prescribed by leading physicians and suffered for years, but without getting any better. I then began to use S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

S. S. S. is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case. THE SWIFT SPECIFIC CO., ATLANTA, GA.

MET AFTER 40 YEARS

REUNION OF SIX MEMBERS OF A FAMILY

Brothers and Sisters Have a Unique Meeting at Cleveland.

CHICAGO, Oct. 14.—Separated for 40 years, ignorant of each other's whereabouts and not even knowing if brothers and sisters were still alive, six members of the family of Joseph Orpanak, once a resident of Cleveland, met in Austin today. The reunion was unique in that the brothers and sisters were hardly able to recognize each other.

The meeting took place at the home of Mrs. William R. Ryder, 5625 South Boulevard, and those participating in it were Mrs. Ryder, William C. Orpanak, old City, Pa.; Mrs. Maria Orpanak, Geneva, Pa.; Joseph Orpanak, Santa Barbara, Cal.; Mrs. Orpanak, Akron, O.; and Mrs. Emma Orpanak, Palmyra, N. Y.

The meeting was brought about by a comparative stranger who once boarded at the Ryder house in Austin. This was in Pennsylvania and it took three years of correspondence to locate the widely separated relatives.

SULTAN NOT CONVINCED.

NEW YORK, Oct. 14.—A dispatch from Constantinople to the Times says the sultan is not fully convinced of the intention of Great Britain to occupy Kuwait in its interests with no ulterior rights but to give the transfer of those rights to another power.

MOURNING AMER'S DEATH.

NEW YORK, Oct. 14.—A dispatch from Simla to the London Times transmitted to the New York Times states that the announcement of the death of the late American Ambassador to India for America Abdur Rahman Khan is generally accepted as the death of an ally of the British government and a distinguished diplomat.

MEETING WITH SUCCESS.

LONDON, Oct. 14.—A new advance in wireless telegraphy is recorded today this morning. The Daily Telegraph says that Marconi has succeeded in transmitting messages through the air for nearly 200 miles, which is greater than the maximum distance hitherto reported.

PROMINENT LAWYER DEAD.

NEW YORK, Oct. 14.—Henry Mills Day, formerly chief justice of the Supreme Court of the State of New York, died at his home in New York City today.

PAPER PROTESTS.

NEW YORK, Oct. 14.—Statements in Italian papers published in Palermo, N. Y., make it seem that a series of papers have been suspended from the circulation in that city on the pretext of the circulation of the papers containing articles of a revolutionary nature. The papers protesting against the suspension of the papers are the Italian and McKinley's papers.

SALES UNDER SEALING ORDERS.

SEATTLE, Oct. 14.—The United States battleship Wisconsin sailed under sealed orders for Manila by way of Honolulu today.

A marriage officer who states "the army work is again in the hands" should consult a physician at once.

GOVERNOR YATES'

Endorsement of Paine's Celery Compound

Attracts the Attention of Medical Journals.

Thousands of Such Cases Mr. Storm's Letter

A medical journal, says a writer in the Boston Traveler, has the name and addresses and full histories of hundreds of cases of chronic and acute rheumatism that have been permanently cured by the wonderful remedy which has recently been introduced with utmost success Governor Yates of Illinois publicly endorsed it.

Nothing else has ever been known to cure like obstinate cases. When all other have failed this marvelous remedy for rheumatism and neuralgia has made sick people well.

Paine's celery compound corrects unsteady nerve action and feeds the nerve system with the elements needed to build them up again. It is highly beneficial for neuralgia and neuralgic affections. It cures the blood of every trace of poisonous humor and encourages a rapid growth of the red corpuscles upon which the vigor of the entire body depends.

Its action is perfectly intelligible to every able physician.

Diseases of the nervous system do not come without warning. Rheumatism, dyspepsia, insomnia and dizziness of the liver and kidneys, are but local cries for a general increase of maintenance for the brain and nerve centers. Paine's celery compound feeds these vital parts, and it is upon its successful action and purifying the blood that its remarkable cures depend.

Weakness, lack of energy, and despondency are only a matter of nerves and brain than of muscles. At this season of the year when thousands of overworking people are suffering upon the leaders that will have no cessation for nearly a year to come, many are already showing the symptoms that require or later result from hurry, overwork, and have without the amount of rest and recreation that nature requires.

Thousands of tired mothers, school teachers and ambitious scholars will receive the story in the winter to come.

It is high time for all to strike at the root of the trouble. Begin the work of recuperation and live at its earliest moment.

All who are ill will find strength and freedom from nervous and Paine's celery compound, which corrects unsteady nerve action, and supplies the vital elements that are so sorely needed by those who are suffering from nervousness.

It is a high time for all to strike at the root of the trouble. Begin the work of recuperation and live at its earliest moment.
