The run of fish yesterday was all that could be desired, and receipts were again heavy. The fish now being taken are of a new run, being much smaller than those heretofore aught this week. The small fish are believed to be of a run that will hold out until the end of the season, which is fast approaching its close. That fish will be plentiful the rest of the season seems certain. As yet the Astoria packers have not been compelled to enforce the 400-pound limit recently provided for, although the bosts are averaging about that much. The recelpts from the lower river were heavy last night, but the fish repre-sented two days' work of the traps. The two canneries of the Packers at Astoria are canning in the neighbor-hood of 3000 cases daily, while the output of the five canneries exceeds 6000 ases.
