The run of fish yesterday was a great deal like that of the day before. Reports from up the river show that very few fish were caught up that way. The gillnetters off Sand Island made good hauls, some of them making unusually good catches. The gillnetters over North Shore way also made some very fine catches, but nothing like their fellows who cast their nets off Sand Island. The price of fish was reduced to two cents a pound for good salmon and one cent a pound for inferiors.

The roadmaster reported that the Columbia Digger company had completed its contract on the construction of dykes on the Nehalem yard and the surveyor was instructed to measure the work and report same to the court. The roadmaster was instructed to consult with the supervisor of the district in regard to repairing the Skipanon bridge, and report to the county judge, who was authorized to order the repairs made. The remainder of the time was spent discussing applications for relief that had been received. The court then adjourned until the first Wednesday in September.

The new system of wireless telegraphy renders it possible the realization of the prediction that newspapers would be published on the ocean liners. They could not, however, be as much up-to-date or effective as those published on land. In this respect they would differ widely from the famous Hostetter's Stomach Bitters, because it has been proven to be just as effective on sea as on land. We would therefore urge everyone contemplating an ocean trip to take a supply with them. It is invaluable as a tonic and preventive of sea-sickness. Those who remain on land should always keep a bottle of it in the house to cure heartburn, indigestion, dyspepsia, constipation and malaria. Don't fail to try it.

Ingleton is having a big reduction sale on shirt-waists, skirts, children's clothes, infants' clothes, and all kind of ladies' and children's furnishing goods, including hair switches and pompadours. SUITS OUR CLIMATE.

The rapidly increasing use of shingles as covering for the walls of buildings, both to keep out the weather and for ornamental purposes, makes a great demand for a shingle stain which preserves the wood, prevents moss, and retains a fresh, handsome appearance. Particularly is such the case in damp climates. The need is well met in a perfect article made right here in Astoria. Cutbirth's Creosote Shingle Stains are penetrative, preservative, handsome and durable. They are put up in eight colors and every package guaranteed.
