## MALARIA

Means had air, and whether it Enemy to Health comes from the low lands and marshes of the country, or the filthy sewers and drain pipes of the cities and towns, its effect upon the human system is the same.

These atmospheric poisons are breathed into the lungs and taken up by the blood, and the foundation of some long, debilitating illness is laid Chills and fever, chronic dyspepsia, torpid and enlarged liver, Lidney troubles, jaundice and biliousness are frequently due to that invisible foe, Malaria. Noxious gases and unhealthy matter collect in the system because the liver and kidneys fail to act, and are poured into the blood current until it becomes so polluted and sluggish that the poisons literally break through the skin, and carbuncles, boils, abscesses, ulcers and various cruptions of an indolent character appear, depleting the system, and threatening life itself. The germs and poisons that so oppress and weaken the body and destroy the life-giving properties of the blood, rendering it thin and watery, must

be overcome and carried out of the system before the patient can hope to get rid of Malaria and its effects.

S. S. S. does this and quickly produces an entire change in the blood, reaching every organ and stimulating them to vigorous, healthy action. S. S. THE MINES INVESTMENT CO. owns one of the best mines in California. This property is not a prospect; it is an aircad equipped mine with a Risdon 10-stamp mill, a 10x10 in, air compresseor, power drills, etc., operated by water power. The development con-sists of 3350 feet of tunnel, of which 2955 feet are on the various veins, and 640 feet of upraises and shafts, blocking out 86,000 tons of ore, milling \$12 per ton. This alone will net \$300,000 after all ex-pense is deducted. Our object in selling 100,000 shares of the treaspense is deducted. Our object in selling 100,000 shares of the treasury stock is to acquire sufficient funds to buy and erect two concentrators, to finish a 350 foot crosscut tunnel, and for road repairing, so that a more economic system of mining may prevail.
