THE SALMON MARKET.

All reports point to higher prices and better times in the fishing industry than have prevailed lately. The Seattle Trade Register has this to say:

The tendency toward improvement in salmon is more plainly marked on the coast and in the east. A large consumption may confidently be figured on with no scare carry-over, and conditions for operations of canneries, while entailing some extra expense, are better than the outlook warranted earlier in the season. The prices on pinks and chums are advancing in the east, and the tone on the better grades is strong. Chumps and pinks are rapidly being cleaned up at the low prevailing prices. There is a demand for all red fish which is not to be had. It is expected now that the few cohorts left will move out at a higher price than that offered during the last two or three months. The \$1.06 sockeye futures are being declined right along by the packers who are holding out for more money.

VOTING FOR THE QUEEN.

Everything in connection with the proposed regatta is moving forward smoothly and the different features at first suggested, then discussed and later adopted, are assuming a form of solidity that assures their permanence. It is a source of general satisfaction to the local public that the queen is to be an Astoria lady, as the interest of her election will naturally elicit more enthusiasm, thereby enhancing the harmony and equable feeling necessary to the success of such an event. The voting for the election of her majesty will begin soon and a score of convenient places will be arranged for the voters to express their preference. There will doubtless be more votes cast this season than formerly as the charge is merely a nominal one, being but one cent, so that it will require but very little expenditure of money to introduce many available queens into the field and to make the total number of votes cast of large proportions.

SALMON MORE PLENTIFUL.

A very appreciable and acceptable increase in the run of salmon was evident yesterday by the deliveries at the canneries, which were about twice as heavy and the average for the past few weeks. The fish are also of larger size than heretofore, a larger proportion of them going to the cold-storages in consequence. It is thought that continued cold weather has kept the salmon out of the river to a considerable extent and that the warmer weather sure to come soon will witness a very material increase. Indications point to a heavy freshet in the middle or later part of June this year when the snow begins to melt in earnest, which will have the effect of interfering very largely with the up-river fishing operations, and will enable many more salmon to reach the spawning grounds. At present the gill-nets are taking most of the fish on the lower river, which is very agreeable to the fishermen. But few seines are in operation as yet, though if the present run continues they will all be in use in a very few days.

A GREAT SENSATION.

There was a big sensation in Leesville, Ind., when W. H. Brown of that place, who was expelled to die, had his life saved by Dr. King's New Discovery for Consumption. He writes: "I endured insufferable agonies from Asthma, but your New Discovery gave me immediate relief and soon thereafter effected a complete cure." Similar cures of consumption, pneumonia, bronchitis and grip are numerous. It's the peerless remedy for all throat and lung troubles. Price 50c, and \$1.00. Guaranteed by Chas. Rogers, druggist.

NEW PLACE OF AMUSEMENT.

The Unique theater will be the name of the cozy little place which is being fitted up and remodeled in the Gun-ter building next to Petersen & Brown's shoe store. It will be a very attractive place to spend an hour or so, as the performance will be conducted on a strictly first-class basis. The Unique theater will be on the same theatrical circuit with the summer parks in Portland, and within 30 days the circuit will have out companies from Los Angeles to Butte.
