INTERESTS IN CHINA.

American interests in China appear to be prospering. So far as it has been seems to be well devised for the advant age of both countries. There is to be a slight increase in tariff rates, which will be good for China, though we are not sure that it will be at all bad for this country. On the other hand, the detestable likin is to be abolished, which will certainly be good for us, and probably not at all bad for the imperial government in China, however much it may bear against local plun- Miss Marie Ware and Horace G. Mcderers in that country. It does not so much matter whether the Chinese tariff rate is 10 or 15 or even 20 per cent. What does matter is that it shall be uniform to all countries, and also that when the duties are once paid at the custom houses the goods shall be free land operator, was commenced before to go anywhere in the empire without further imposts.

for reasons which need not be detailpted the attempt to remove the negoiations from Shanghai to Peking, an attempt which has now apparenly been trustrated by the earnest opposition of the United States and Japan, says the One Yale Man Spent \$100 in a Year, New York Tribune. It certainly seems reasonable that negotiations should be completed in the place in which they ascendant.

It is to be hoped that the negotiations so well begun will be conducted at Shanghai to a successful ending, in the completion of a treaty which will One Laborer Instantly Killed and open the Chinese door more widely to the commerce and intercourse of the world, and will make the permanent more secure.

QUEENS OF THE OCEAN.

For some time not much has been heard of the new ships which the Cun ard line was to build to win back to the British flag the laurels of the fastest Atlantic voyage. In the Glasgow Herald of June 6, however, there appears an article which states that ne-

sels of such high speed, but no less than four British government depart ments have to be satisfied with the proposed designs before they can be adopted. The admirality, in connection with the use of the ships as merchant cruisers; the board of trade, that is concerned with passenger accommodations, and safety generally; the postoffice and the treasury. Designs have been made up, however, and, according to our Scotch contemporary, says the Sosten Herald, models have been tested in the experimental tank owned by the government.

The dimensions of these new liners ere roughly given as 760 feet for the length, with a width of 85 feet. These are altogether greater than have ever been given to any vessel, and the new ships will displace something like 35,000 tons. It is expected that such craft will be able to maintain a 25-knot speed | conveys. at sea with something between 65,000 and 70,000 indicated horse power, which would be infinitely more than has ever been previously experimented with by marine engineers. Roughly speaking, formulated, the new commercial treaty if these boats were built on the Glasgow Herald's estimates, they would excel the previous record for length by 60 feet, for beam by 10 feet, in power by 23,000 indicated horse power, and in speed by almost two knots. They would indeed be monarchs of the sea from every point of view.
