OLDEST RAILROAD CAR.

Displayed on Rails of the First Track at the World's Fair.

St. Louis, July 30 .- In the very center of the historic railroad exhibit in the palace of transportation at the World's Fair stands the first car that was drawn over rails by a steam locomotive. More than that, it stands on the very rails that were put down in the year 1800 and these are on the stones that formed a part of the original roadbed.

The locomotive, which was built by Richard Trevithick, and was given its trial trip in 1803, the very year of the Louisiana transfer, is valuable to the antiquary and the man who is interested in tracing the evolution of things. It is a clumsy machine with great piston-rods in front. These cause the revolutions of a big wheel with deepseated eccentric-crank attachment. At the other side of the engine is a small cog-wheel that is connected with the big fly wheel. This small cog-wheel works in the cogs of a larger one, which in turn works in the cogs of two of the wheels on which the engine

When we consider that the power developed in the steam chest had to pass through three wheels before it reached the part of the machine to which it had to be applied, we are not surprised that Mr. Trevithick considered he was doing well to run five miles an hour.

The engine in the exhibit is only a wooden model; but the little flat car with its load of logs is the actual car on which the inventor made his maiden trip, more than a hundred years ago. This time the engine drew 5 tons two miles and back.

A few days later the new engine performed a more wonderful task. It drew five cars, which were called "tramwagons," a distance of nine miles in four hours. This time it had a real load, for the cars carried ten tons of iron and seventy people. On that trip it consumed 200 pounds of coal and the water in the boller did not have to be replenished until the end of the journey.

The road, 13 miles long, was built from Morlais Castle, South Wates, where there was an abundant supply of limestone, to Plymouth, where the

furnaces were located. It bore the furnaces were located. It bore the name of the Merthyr Tramway and DO YOURwas in constant use in Wales for many years. Indeed, the old rails remained in place until 1890, when a thoroughly nodern railroad was surveyed through that part of the country. Then the quaint little cars and the rusty old rails became part of the great American railroad historical museum.

Not Irrevocably Established.

(From the Washington Post, Ind.) Judge Parker's assertion in that famous telegram, "I regard the gold standard as firmly and irrevocably established," is the subject of some criticism not altogether friendly, Literaly construed, it states that which Judge Parker, as well as every other St. Petersburg. July 30.-A special "irrevocable." All statutory enact- not a poor start.

Newbro's Herpicide

VACATION TIME. Vacation time should bring rest, recreation and comfort; and comfort of the solid and pleasing variety means no high collar, no stiff hat and no-itching scalp. It is for this last discomfort that Newbro's Herpicide becomes a summer necessity, as it stops itching of the scalp and Prickly Heat almost instantly. Take Herpicide with you on your vacation.

... SCALP WARNING .. Itching of the scalp is not so much a punishment for past neglect as it is a warning for the future. It shows, almost conslusively, that the vine-like, microbic growth that causes dandruff, itching scalp and falling hair has entered the Sebaceous glands and unless this growth is stopped and kept out of the scalp, baldness will follow.

...IT IS CONTAGIOUS .. It was Prof. Unna (ask your doctor about him), who first pointed out that the true cause of hair loss is a germ or microbe that lodges in the scalp where it causes dandruff. Being of microbic origin the disease is necessarily contagious but Dr. Sabouraud has recently called attention to the highly contagious nature of dandruff, and the necessity of constant watchfulness to avoid it. Kill the dandruff germ with Herpicide.

UNSTERILIZED PUBLIC HAIR-BRUSHES, says

Dr. A. Cartaz, are to blame for most of the baldness that is prevalent today. He further states that, "baldness begins in the young." By this he means that the germ that causes the disease is planted in the scalp of young men and that sometimes years elapse before the destruction is complete.

WILL NOT GROW HAIR.. Newbro's Herpicide Is "Hair-Saver;" it will not grow hair - nature does this-but by destroying the enemies of hair health, it enables the hair to grow as nature intended -except in chronic baldness. Save your hair with Herpicide. Wonderful results follow its use. HOT WEATHER TROUBLES.. During hot weath-

ed the minute sudatory glands of the scalp are called upon to perform an extra amount of labor. The perspiration that exudes in increased quantities must be handled promptly as it carries out poisonous and refuse matter that would otherwise clog up the pores of the scalp. Incomplete elimination of refuse matter produces a hot and feverish condition of the scalp, familiarly known as Prickly Heat, for which Herpicide gives immediate relief. Ladies will find Herpicide indispensible. It contains no grease, will not stain or dye. It is an exquisite hair dressing that COOLS, COMFORTS and DELIGHTS. NO COMPLAINT FROM OUR

CUSTOMERS. "Herpicide is giving entire satisfaction to our trade. We have never had a single complaint that it would not cure dandruff and falling hair,"

(Signed) WOODWARD, CLARK & CO. Portland, Ore.

A HERPICIDE FOLLOWER. "I have tried five or six bottles of your Herpicide and can say that it is very good, and so I address my neighbors the same." (Signed)

MRS. NELLIE HUGHES. Albina, Ore.
