MRS. R. ENGLETON,

Welch Block.

UNCLE SAM TO BUY 500,000 POUNDS OF BUTTER FOR SAILORS

Paymaster W. B. Rogers, of the general storekeeper's department at the Brooklyn navy yard, left recently from Sherman, N. Y., to make a preliminary inspection of 25,000 pounds of butter constituting the first consignment on contracts for a half a million pounds which have just been signed by representatives of the United States navy and the firms of Swift & Co. of Chicago and James Rowland & Co. of 80 Hudson street, Manhattan.

This is the largest contract ever given by the navy department for a year's supply, and is believed to be the largest butter contract ever entered into anywhere. It was at first intended to award the entire contract, involving about \$150,000, to one firm, but upon further consideration it was decided that it would be a good plan to secure part of the supply from the west and part from the east.

This half a million pounds of butter will be consumed by the enlisted men of Uncle Sam's navy during the fiscal year that began on the first day of July. It will be distributed through the office of the general storekeeper at the navy yard here, who will issue it to the different vessels as required. The contract provides for the immediate delivery of 25,000 pounds, the remainder to be furnished as called for.

Specifications of the Contract. The specifications on this contract relative to the quality of butter that will be required furnish an excellent indication of the care taken to prevent any article of food not absolutely pure from being issued to the sailors of the United States. It is to be of the brand known as "extra creamery," and must pass a chemical test before leaving the dairy.

It is all furnished in three-pound cans prepared after a prescribed process. The cans must be made of the best charcoal tin, redipped before soldering. The milk from which the butter is made must all be sterilized. The butter will have to be packed at the place of manufacture. The cans will be sealed after a special process making them absolutely air-tight, and will then be wrapped in paper and packed in heavy wooden cases. These will be filled with sawdust, closed and then bound with two iron bands.

The contractors are required to give a guarantee that it will remain in good condition for two years from the day

of delivery at the New York navy yard. For such butter they will be paid at the rate of 27.2 cents a pound.

But before it is accepted, Uncle Sam will put his own men to work to determine whether it comes up to his specifications. At the chemical laboratory, established at the yard for just such purposes, the butter will be given three separate tests. As soon as it arrives at the yard, sample cans will be selected at random and the contents tested as to the quantity of salt, the amount of water and the amount of general impurities they contain.

If the percentages are found to be in accord with the stipulations in the contract, the butter will be accepted. It must all grade above 93 and contain less than 13 per cent of water. Iowa farmers will furnish a good part of the amount. A Sioux City creamery is to furnish 250,000 pounds, and one at Monticello will turn out 100,000 pounds. Pennsylvania dairies will furnish the balance.

Greasing Boat Bottoms With Butter.

It is only within the past year that the jack tars have been getting such a large quantity of butter. The new ration which went into effect last year includes a liberal allowance, and it is highly appreciated by the man-of-war's men. In order that none of it should be put to a wrong use the navy department has deemed it wise to issue special orders that no butter shall be used for machinery lubricating purposes or for greasing the bottoms of boats, launches and cutters that are to take part in races.

Wonderful things can be done with half a million pounds of butter. Two hundred and fifty tons would be sufficient to spread enough slices of bread to hand one to each voter who will step into an election booth this fall to cast a ballot for Roosevelt or Parker. One pound would be sufficient to spread 30 good-sized slices, so the amount to be furnished on the contract would cover 15,000,000 slices, which may be expected to go around. It will require 166,667 cans to contain it all.

Figuring the height of each can at six inches, there would be enough to reach 6944 feet into the air. If the pile stood in front of the Eagle building and toppled over in the direction of New York, the top can would be apt to land on the head of some citizen on Park row across the river.—Brooklyn Eagle.

WORLD'S FAIR NEWS-NOTES.

Nineteen entries for the airship contest at the World's Fair have been received.

Two exhibitions are given daily on the rifle range of the forestry, fish and game department at the World's Fair. Geronimo, the famous Apache Chief, now at the World's Fair, is kept busy making bows and arrows, carving canes and writing his autograph for visitors at the Indian school.

Exhibitors of the wonderful properties of the X-ray are given daily in the German section of the Palace of Education at the World's Fair.

A large captive balloon is now making many ascensions every day at the World's Fair, carrying passengers and rising to a height of 800 feet.

Col. J. A. Shafer, of Panama, has been appointed official delegate of the Republic of Panama to the World's Fair.

Organ recitals by prominent organists of the country are given daily on the largest organ in the world in Festival hall at the World's Fair.

One hundred and fifty jirukishas are in use at the World's Fair to carry visitors over the grounds. They are propelled by native Japanese jampans.

Two 750 candle power searchlights are operated on the two towers of the Philippine weather bureau on the Philippine reservation at the World's Fair.

The Alaskan hide exhibit at the World's Fair includes raw and dressed hides of every fur-bearing animal in that country. One skin of a polar bear measures 11 feet 3 inches.

There are 103 varieties of apples shown in the Indiana exhibit in the Palace of Horticulture at the World's Fair. The commissioners have made an effort to exhibit every kind of apple grown in the state.

A map of America and the Philippine islands embroidered on Just cloth is shown in the educational building at the World's Fair. The map is the work of the pupils of the public schools at Laog Bocos Norte.

Three typewriters especially made for exhibition purposes and valued at \$1150 each are shown in the Palace of Liberal Arts at the World's Fair. They have mother of pearl keys and gold and silver trimmings. Each machine

is finished in different combination of colors.

The United States bureau of forestry has a fine display in the forestry, fish and game palace at the World's Fair. The exhibit shows how to plant trees most advantageously on a farm, and a model of a farm is used in the demonstration.

Banqueting in mid-air is quite the thing at the World's Fair. Several banquets have been given lately in a car on the Ferris Wheel. A special car has been set aside for this purpose, as has a wedding car.

End of Bitter Fight.

"Two physicians had a long and stubborn fight with an abscess on my right lung," writes J. F. Hughes, of DuPont, Ga., "and gave me up. Everybody thought my time had come. As a last resort I tried Dr. King's New Discovery for Consumption. The benefit I received was striking and I was on my feet in a few days. Now I've entirely regained my health." It conquers all Coughs, Colds and Whoops and Lung troubles. Guaranteed by Chas. Rogers' drug store. Price 50c and \$1.00. Trial bottles free.

G. A. R. TO BOSTON.

Special train leaves St. Paul Saturday, August 13, for the national encampment over the official route for the Minnesota delegation—the North-western line to Chicago.

For full information call on or write H. L. SISLER, General Agent, 123 Third Street, Portland, Ore.

WEN ARE POWERLESS

To Fight Against Diseases Unless They Strike at the Underlying Cause.

To treat Dandruff, and Falling Hair, with irritants or oils on which a parasitic germ will prosper, is like scooping water from the ocean to prevent the tide from rising.

You cannot accomplish a satisfactory cure without having a right understanding of the fundamental causes of the trouble.

You must kill the Dandruff Germ. Newbro's Herpicide does this because it is specially made to do that very thing.

When the germ is removed, the hair has no choice but to resume healthy growth and beauty.

"Destroy the cause, you remove the effect."

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

MISCELLANEOUS BUSINESS OPPORTUNITIES

FOR SALE—At Gaston's Feed and Sale Stable, one Coffax Roller Feed Mill; one 20-horsepower Motor and Starter Box; 80-foot 4-ply Rubber Belt; one pair Butchers' Wall Scales; also 800 good Sacks.
