## THE VESSEL IS SAFE

Emma Claudina, Due at Seattle on July 31, at Last Heard From at Nome.

SAILED FOR NORTH MAY 11

It Was Feared That the Northwestern Commercial Company's Vessel Was Lost With All on Board

Seattle, Sept. 13.—The overdue steamer Emma Claudina, which sailed from Seattle for trading ports along Sibuyan coast on May 11 is today reported as having reached the roadstead off Nome. The vessel went forth under charter to the Northwestern Commercial Company and was expected in this port on her return voyage not later than July 31. It was feared that the vessel was lost with passengers and crew.

## TRACKLESS TROLLEY.

Only American System of Its Kind Will Operate in Massachusetts.

Hull, Mass., is to have the first and only trackless trolley system in the United States, says the Boston Journal. It will run from Nantasket point, a distance of two and a half miles, over the highway.

The trackless trolley is the latest system of passenger transportation and is in successful operation in Germany. It is nothing more than a number of electric automobiles running between given points on a regular schedule. Instead of the automobile carrying storage batteries to supply power to run

TRACKLESS TROLLEY CAR.

the motors propelling the carriages the power is supplied by a double trolley, one wire carrying the negative and the other the positive current. The carriages can run all over the road, pass each other without interference and will be noiseless, clean and can be stopped almost instantly.

There has been much complaint over the operation of the trolley system in Hull. The railroad commissioners have been asked to remedy the difficulty and have failed to give satisfaction to the residents of the town. The trackless trolley will not come under their jurisdiction, and no rails need be laid. The highway commissioners may have a little something to say about how they shall use the road, however.

It was learned recently that the carriages to be used will seat forty people and will resemble very much the big automobile used by a Boston firm in touring the city.

## Photographing on Linen.

Some interesting demonstrations have been carried out in London with a new photographic art material called "photolinol." This fabric is composed of linen, which is thoroughly permeated with the photograph, producing a high translucency. One very picturesque effect obtained by this means is that the picture, when colored and viewed with a reflected light, bears a very strong resemblance to an oil painting, the lines of the weaving of the linen appearing similar to the canvas in the painting. Photolinol is waterproof and indestructible, while the photograph does not fade in the sun, as it appears to be woven into the material. The process is a secret one, but its commercial utility and value are already asserted, since it can be employed for curtains, screens or theatrical scenery.

## A ROMANCE OF POLITICS.

How the Daughter of Candidate Fairbanks Became Mrs. Timmons. Romances seem to be the usual thing in the family of Senator Fairbanks, Republican candidate for vice president.

## HAIR TELLS CHARACTER.

Color of Hair Said to Indicate a Person's Temperament.

Many people believe that blonde, or light hair denotes affection and dark hair constancy. A person without hair is not devoid of character; far from it. The disposition of the average bald-headed man is to show such solicitude for the welfare of others, that he neglects himself. A germ causes baldness. Prof. Sabouraud, of Paris, France, inoculated a rabbit with Dandruff germs, causing it to become totally bald in five weeks' time. To rid the scalp of these dangerous germs it is necessary to apply Newbro's Herpicide.

"Destroy the cause—you remove the effect."

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

Eagle Drug Store, 351-353 Bond St. Owl Drug Store, 649 Com. St., T. F. Laurin, Prop. "Special Agent."

## IT IS A MATTER OF HEALTH

There is no substitute

When the senator himself was a young man, attending the Ohio Wesleyan university, he fell in love with a young lady student who helped him edit a college paper, and she is now Mrs. Charles W. Fairbanks, society leader, president general of the D. A. R. and vice president of the Junior Republic.

Years after this romantic acquaintance had culminated in a wedding another young lady was a student at this same college—Miss Adelaide Fairbanks, daughter of the former editor of the college paper and his one time associate. Miss Adelaide was a beautiful girl, and one of the students of the sterner sex fell deeply in love with

MRS. JOHN W. TIMMONS.

her. But there was a misunderstanding and the two parted when college days were over, not expecting to meet again. Miss Fairbanks, both by reason of her personal charms and of the position of her father and mother in Washington and Indianapolis society, received a great many attentions. Her graceful figure, flashing eyes and magnetic manner won her many admirers. She married, but soon became a widow. Some time afterward in visiting at the home of the late Senator Hanna she met Ensign John Wesley Timmons, U. S. N., of the battleship Kearsarge, and recognized in him her former sweetheart at college in Ohio. The old friendship was renewed, and they were married last September.

## Thrift in Norway.

To encourage working people to establish homes of their own Norway has founded a bank for workingmen. It lends money at 3 1/2 and 4 per cent and gives the borrower forty-two years in which to pay the loan. The total cost of the house must not exceed \$100, and the area of land must not be more than five acres.

## Vienna.

More than five-eighths of the area of Vienna is covered by woods, vineyards, parks and gardens.

## The Infant Prodigy.

Christian Henry Heineck, who was born at Lubek in 1721, was called the "infant prodigy." He only lived to be four years old, but at the time of his untimely death was "highly educated."

## Newton's "Optics."

Sir Isaac Newton's treatise on "Optics" attracted no attention in his own country until it had made a profound sensation in France.

## The Paris Rat Pound.

Among the sights in the city of Paris is a regular rat pound, where the services of the rodents are utilized for removing the flesh from the carcasses of dead animals. A horse thrown in overnight is quite stripped by morning, and it is the regular work of men in charge to remove the polished bones.

## Denmark's Colonies.

As early as 1618 Denmark established colonies on the Coromandel coast and in Malabar and Bengal. All these colonies afterward passed by quiet purchase into the hands of Great Britain.

## A Hot Mine.

There is a gold mine in Australia which is 3,000 feet deep, and the various tunnels are so hot that cold water has to be continually sprayed over the miners working the lode. The temperature is usually about 108 degrees, and the men have to work almost naked in order to stand the heat.
