ANOTHER WONDER OF SCIENCE

Biology has Proved that Dandruff is Caused by a Germ

Science is donig wonders these days in medicine as well as in mechanics. Since Adam lived, the human race has been troubled with dandruff, for which no hair preparation has heretofore proved a successful cure until Newbro's Herpicide was put on the market. It is a scientific preparation that kills the germ that makes dandruff or scurf by digging into the scalp to get at the root of the hair, where it saps the vitality; causing itching scalp, falling hair, and finally baldness. Without dandruff hair must grow luxuriantly It is the only destroyer of dandruff. Sold by leading druggists. Send 10c in stamps for sample to The Herpi-cide Co., Detroit, Mish.

MURDERERS ARE ARRESTED

Harris' Wife Had Left Him on Account of Non-support, Taking Her Children, Which Causes Fight in Which Albert Brandt Is Killed,

Chicago, Sept. 4.-Albert Brandt, an engineer, 32 years old, was mortally wounded in a fight yesterday with his prother-in-law, Thomas Harris, for the possession of Harris' 18-months-old daughter. Brandt was taken to the County hospital, where he died an hour

Harris married Brandt's sister four vears ago. Mrs. Harris left her husband soon after her mariage because she said ne would not support her. After her first child was born he induced her to return to him, but she left him again six months ago, taking her two children with her. Since then it is said, Harris has made three attempts to kidnap his baby daughter. Each time Mrs. Harris or one of her brothers recovered the child.

Harris went to the residence of Brandt's mother yesterday, accompanied by his brother, Stephen, and demanded the child. A fight ensued, in which the Harris brothers were beaten with a hammer wielded by Albert Brandt. At the time he was shot Brandt had in his hand a revolver with which he was attempting to repel the Harris brothers. After he fell, his brother Simon seized the weapon and fired several shots at Thomas Harris.

After the shooting the Harris brothers escaped, but were captured four hours later.

GOVERNOR LAFOLETTE SCORED.

Rev. McArthur Says Governor's Criticism of Rockefeller Is Vulger.

New York, Sept. 4.—Defense of John D. Rockefeller and denunciation of Govnor Lafolette of Wisconsin, who denounced him, were the features of the sermon delivered last night by the Rev. Robert S. McArthur, who has just returned from a summer lecturing tour on the Chautauqua assembly platform. from which so much of value to science Dr. McArthur made special reference to will come, were made on a seaweed the head of the Standard Oil company and declared them to be exaggerations which only served to excite sympathy for the person against whom they were

"Governor Lafolette's attack on Mr. Rockefeller," said Dr. MacArthur, "is positively fierce.. His criticisms of Mr. Rockefeller is cruel, coarse and severe to the utmost extreme; it defeated its own object, creating sympathy for Mr. Rockefeller. The governor was guilty of exaggeration which reacted against himself and in favor of the object of his denunciation. The pendulum is swinging toward favorable judgment of Mr. Rockefeller largely because of the criticisms in a monthly magazine article of members of his family. I hesitate not to affirm that the writing of these articles is creating a reaction in favor of Mr. Rockefeller. And I know whereof I affirm when I say that Governor Lafolette shocked his audiences. There is a vast amount of arrant hyprocrisy in public speakers' denunciation of millionaires. Probably all of these speakers would be millionaires if they could." Dr. McArthur paid a glowing tribute

to William J. Bryan, speaking of him as the foremost figure on the platform "Mr. Bryan delivered a lecture, entitled 'The Prince of Peace,' which is one of the greatest treasures of our

time," said Dr. McArthur, "It is

really a sermon and he frequently de-

livers it on Sundays." Dr. McArthur characterized Governor Folk's addresses as models of patriotism and the governor as a man of the noblest ideals.

By controlling the direction of the flow of the nutrition in this plant, Dr. Setchell made buds grow where they had not grown before, and made the buds at the end of the plant which had been the strongest under normal conditions dwindle away. This is the first investigation along this line in the field of botany, and the results thus far ch tained are of such widespreading importance as to throw a new light on the regenerative process altogether. Professor Setchell believes that the problem of polarization may be solved by experiments on the same line that his recent, experiments has opened up,
