MEN ARE POWERLESS

To Fight Against Disease Unless They
Strike at the Underlying Cause.

To treat Dandruff, and Falling Hair,
with irritants or oils on which a para-
sitic germ will prosper, is like scooping
water from the ocean to prevent the tide
from rising.

You cannot accomplish a satisfactory
cure without having a right understand-
ing of the fundamental causes of the
trouble.

You must kill the Dandruff Germ.
Newbro's Herpicide does this because it
is specially made to do that very thing.

When the germ is removed, the hair
has no choice but to resume healthy
growth and beauty.

"Destroy the cause, you remove the
effect."
Sold by leading druggists. Send 10c. in
stamps for sample to The Herpicide Co.,
Detroit, Mich.

HOW STORMS BREED

Anthropological Expert Makes
Remarkable Discovery.

HE STUDIES ARIZONA DESERT

After a Four Months Trip in the Great
American Desert Dr. W. J. McGee Dis-
covers Mystery of Storm Breeding
Belt of Arizona.

Chicago, Sept. 7.—A dispatch to the
Record Herald from St. Louis, Mo.,
says:

Dr. W. J. McGee, who was head of the
Anthropological Department of the
World's Fair, was in St. Louis yester-
day on his way back to Washington
after a remarkable four months expedi-
tion in the Great American Desert,
Arizona, where he says he discovered
how storms are bred in the region,
which has long been termed the "Storm
breeding belt."

The ground here is perfectly level and
the radiation from the earth's surface
is consequently even. The heat radi-
ation, with the desert is of course very
great. The strong radiation, by its regu-
larity keeps the aqueous vapor above
the earth in a stable condition.

"When the vapor moves eastward,
over the mountains and meets the irregu-
lar radiation that comes from the un-
even surface of the earth, a precipita-
tion of the vapor results, causing rain
and storms."

PIUTES LAST GATHERING.

Meet to Celebrate First Invasion of
Famous Old Chief Tecopah.

Los Angeles, Sept. 7.—What is likely
to be the last gathering of the Piute
Indians is now in progress at the Pah-
rump ranch, on the Ivanechah Bullfrog
road, where at least two hundred mem-
bers of the tribe are gathered from all
parts of Nevada, Arizona and elsewhere.

The occasion is the first invasion of
the famous old chief Tecopah, whose
last resting place is about a mile from
the ranch at Pahrump.

The first event of the gathering was
the gambling games that lasted two
days. Then there was a big dance par-
ticipated in by all the tribes, besides the
Piutes, there were Indians of two other
tribes to pay their respects to the mem-
ory of the dead chief.

FRESHMEN RECEIVE ADVICE.

College Fraternities Handled Without
Gloves by University President.

Stanford University, Cal., Sept. 7.—
Dr. John Caspar Branner, acting presi-
dent of Stanford University, in his an-
nual address to the incoming freshmen
class, gave the new students a most se-
rious talk in regard to the future con-
duct in the university. He spoke at some
length on the extravagance in which
some college men and women indulge,
and in this connection he handled the
college fraternity and sorority situa-
tion without gloves. He denounced the
practice of rushing men from the train
to the club house and there pledging
them before what they knew what they
were getting into. At Stanford the
competition has become so keen that the
only way by which the weaker and less
desirable fraternities can maintain them-
selves is by carrying the freshmen off
their feet and forcing them to join be-
fore they have had an opportunity to
look over the field and find which course
is best suited to them.

Are You Engaged?

Engaged people should remember that,
after marriage, many quarrels can be
avoided, by keeping their digestions in
good condition with Electric Bitters. S.
A. Brown of Bennettsville, S. C., says:
"For years, my wife suffered intensely
from dyspepsia, complicated with a tor-
pid liver, until she lost her strength and
vigor, and became a mere wreck of her
former self. Then she tried Electric
Bitters, which helped her at once, and
finally made her entirely well. She is
now strong and healthy." Chas. Rogers,
druggist, sells and guarantees them, at
50c a bottle.

WATERMELON DAY AT ROCKY FORD

Rocky Ford, Colo., Sept. 7.—Forty
tons of watermelons and unlimited
quantities of all kinds of fruits were at
the disposal of the hundreds of visitors
who were here today for the annual
Watermelon Day celebration. Water-
melon day was established for the pur-
pose of advertising the great fruit lands
of this section and the celebrations have
fulfilled all the hopes of the promoters.
Among those in attendance today were
farmers and fruit-growers of Nebraska,
Kansas and California. The Rocky Ford
district claims to be in the banner water-
melon section of the country. Some of
the specimens of the fruit exhibited to-
day were marvelous both as to size and
quantity.

NEW TRIAL REFUSED.

Reno, Nev., Sept. 7.—The Supreme
court of Nevada has handed down a de-
cision denying a motion for a new trial
in the case of John Hancock, charged
with murdering two men on the desert
ten years ago. Hancock was arrested
as he was being discharged from San
Quentin a few months ago, and was
brought to Nevada for trial. He will
be hanged next Friday morning.

REMARKABLE CASE

Works Three Hours After Skull Is
Fractured.

ARRIVES HOME UNASSISTED

Wagon Box Which Workman is Repair-
ing, Falls, Striking Him on the Head,
Fracturing the Skull. He Walks
Home and Dies.

Chicago, Sept. 7.—After working three
hours and walking to his house unas-
sisted while suffering from a fractured
skull, Benjamin S. Schooley 45 years
old died yesterday. Schooley was em-
ployed in the repair shop of an express
company, as a wheelwright. A heavy
wagon box, which he was repairing,
slipped from its supports and fell on
him. He recovered consciousness with-
in a few minutes and finished his day's
work, and walked to his house unac-
companied. He soon became delirious
and died a few hours later. An exami-
nation showed that his skull had been
fractured.

TRUST CAUSES TROUBLE.

American Investor Trust Menaces Pros-
perity of New Zealanders.

London, Sept. 7.—The Times corre-
spondent of Wellington, N. Z., says:

The operations of the American Har-
vester Trust are seriously menacing the
prosperity of New Zealand implement
makers. The manufacturers recognize
that even a protective tariff of twenty
per cent would be unavailing.

A deputation today asked the govern-
ment to prevent the trust from doing
business. The Premier, replying to the
deputation, asked its members if they
wanted war with the United States, ad-
ding that he did not think the country
would stand such prohibition or that the
agricultural members would agree to a
prohibitive tariff. He said, however,
that something might be done if the local
manufacturers would agree not to raise
prices. The Premier intimated that the
government would proceed with the
monopolies prevention bill.

MEXICAN CONTRACT LET.

Mazatlan, Tex., Sept. 7.—In connec-
tion with the proposed Guaymas-Guad-
alajara railroad, Governor Canedo, of
Sonora has received the following from
Vice-President Ramon Carrol:

"The contract for the extension of the
Sonora railway into the state of Ja-
lico has been duly signed and a de-
posit of \$240,000 has been made by the
Southern Pacific interests to guarantee
the construction of the line from Guad-
alajara to Guaymas. Work will be start-
ed out of Mazatlan north and south at
the same time. Four hundred kilo-
meters of track will be built in the first
two years and at least 150 kilometers
in each succeeding year until the line
is completed.

Got Off Cheap.

He may well think, he has got off
cheap, who, after having contracted
constipation or indigestion, is still able
to perfectly restore his health. Noth-
ing will do this but Dr. King's New Life
Pills. A quick, pleasant, and certain
cure for headache, constipation etc.
25c at Chas. Rogers' drug store; guar-
anteed.

RECORD IS BROKEN

Sale of Steel Rails for Past Week
Largest in History.

PIG IRON MARKET IS QUIET

Substantial Evidence is Furnished of
Great Prosperity in the Iron Business
Both Present and Prospective by Tre-
mendous Sales of Past Week.

Cleveland, Ohio, Sept. 7.—The Iron
Trade Review in its current issue says:

Sales of rails since the price of \$28
for 1906 delivery was announced last
week have been tremendous, breaking all
records and furnishing substantial evi-
dence of great prosperity in the iron
business, present and prospective. It is
estimated that these orders for rails for
1906 placed within a week will amount
to 650,000 tons and orders for several
hundred thousand tons are pending.

Although the United States Steel Cor-
poration has booked very large orders,
it has not alone enjoyed the unexpected-
ly heavy business from the railroads.
The Colorado Fuel and Iron Co.,
reports its entire rail output sold for
the year 1906 and the Tennessee Coal
Iron & Rail Company, the Lackawanna
Steel Company and other interests are
well supplied with orders. Among the
bookings of the past week were the fol-
lowing.

Chicago & Northwestern, 10,000 tons;
Burlington, 50,000; Santa Fe, 50,000;
Milwaukee & St. Paul, 65,000; Wisconsin
Central, 22,000; Great Northern, 40,000
tons.

Accompanying the orders for rails are
many orders for cars and locomotives.
The Pennsylvania system has ordered
15,000 steel cars. Other railroads have
bought liberally and inquiries for at
least 75,000 steel and wooden cars are
pending. The announcement of an ad-
vance in \$2 per ton on structural shapes
although not expected, is received by the
trade as being justified by market con-
ditions.

Orders for over 20,000 tons of struc-
tural steel were placed at Chicago last
week. The market for pig iron is quiet,
but in nearly all selling centers there
is an improved tone. The demand for
plates and steel bars continues very
strong and the trade would not be sur-
prised to hear of an advance on these
products at an early date. The American Ship Building Com-
pany has placed contracts for plate and
for three large freighters and other large
contracts are pending. There is already
considerable complaint about car short-
age. This is practically true concern-
ing coke, for which the demand has be-
come so strong that the railroads are
finding it difficult to give prompt ship-
ment. Some jobbing interests also com-
plain that they cannot get cars prompt-
ly.

NEW THEORY ADVANCED.

Harvard Astronomer Says the Moon
Was Once Part of the Earth.

San Francisco, Sept. 7.—Professor W.
H. Pickering of Harvard, the astron-
omer, is here en route home from a visit
to the Hawaiian islands. He makes the
interesting statement that although he
had never seen the volcanoes of the
Hawaiian islands previous to his recent
trip there he recognized in them old
familiar friends. He says he met their
ancestors from afar, as it were, through
a telescope, and that they are similar
to those of the moon—that is those of
the engulfment variety.

While in Honolulu Professor Pick-
ering delivered a lecture in which he ad-
vanced the theory that the moon was
originally a part of the earth and was
thrown off, and that the Hawaiian is-
lands were about in the center of this
lunar genesis. The space that was left
when the moon material was thrown
off was the Pacific ocean. The large
volcanoes of Mauna, Loa and Kilauea on
the Island of Hawaii and Haleakala, on
Maui, were, Mr. Pickering stated, in
many ways exactly like those he had
observed through a telescope on the
moon.

Two kinds of goods and
trade; a bargain's a bargain
and moneyback. One makes
friends, and the other loses
'em.
