Sales Room News-Herald Building, Commercial St. between 8th and 9th near Postoffice.

Mail Orders Promptly Filled. Your Money Back on all goods if not Satisfactory.

**Dairy Separator**  
A cream separator should be thoroughly washed every time after using. A brush should be used on every part and piece, using 5 per cent solution of borax or other good washing powder. Rinse in hot water, or steam if possible. They should then be left to dry while hot. Wiping with an ordinary clean cloth contaminates utensils with innumerable bacteria.

The bacterial contamination in milk is increased from three to five times by running it through a separator bowl which has been used and only flushed and left standing several hours. If only flushed while using for several

days the contamination increases several times more, and such milk would be likely to be detrimental if fed to calves.

The use of washing powder in flush water reduces the number of bacteria in the following batch of milk that is run through and cleanses the separator more than hot water alone, but not sufficiently to warrant that method of cleaning.

The use of a cream separator that is thoroughly washed reduces the number of bacteria in milk one-fifth to one-fourth.

Improper cleaning is detrimental to a separator on account of the rust that accumulates on dirty or damp places. This may shorten the life of the machine many months, depending on the degree of cleanliness employed.

Running milk through a dirty separator is similar to running it through a dirty strainer with all of the filth of the previous milking left in it from twelve to twenty-four hours. The millions of undesirable bacteria from the dirt, manure and slime lodged in the separator bowl spoil all the milk, to a greater or lesser degree, that passes through the machine.

When properly used, a cream separator is a clarifier and to a certain extent a purifier of milk, but when carelessly used it is a source of filth and contamination.—Kansas Experiment Station.

A Prize Jersey Cow.

BOOM'S NIGHTMARE.  
First prize Jersey cow at Minnesota state fair, 1905; owned by Mrs. S. B. Thomas, Missouri.—Hoard's Dairyman.

**Simple Home Cheesemaking.**  
For "just a good cheese recipe that can be used at a country home without much cost" Orange Judd Farmer submits the following by C. F. Doane:  
Use milk three or four hours old that has been held at about 70 degrees and that has not as yet commenced to sour. Heat to about 86 degrees, add commercial rennet at the rate of three ounces, or eighty-five c. e. teuble centimeters, to 1,000 pounds of milk. Allow to coagulate for about thirty to

forty minutes, break the curd with a spoon or three cornered stick until the particles are the size of the end of the small finger, heat slowly to about 100 degrees, stirring almost constantly in the meanwhile, and allow to stand at 100 degrees until the curd becomes very firm. Roughly it may be stated that it will require about two and a half hours from the time the curd is broken.

Drain off the whey and stir the curd fifteen or twenty minutes, allowing to cool slowly. Salt at the rate of two and a half pounds of salt per 1,000 pounds of milk; put in a mold, square or round, and apply considerable pressure. This should not be less than 100 pounds to each cheese. A thermometer, a tin vessel for heating and a measure for measuring the rennet extract, and the rennet extract itself, can be purchased from any supply house.

**Churn When the Cream is Ready.**  
After cream is obtained there are

issues held from churning too soon and too late. Colonel Curtis used to say in his institute talk: "When the cream is ready to churn, churn. Let your supper go; let your wife's wish to do the churning pass unheeded; grab the dash and churn, and, if the minister calls, don't stop; keep at it and invite him to help. But don't put off the churning." I suppose he wished to emphasize in his graphic way the importance of avoiding waste. If not properly ripened, cream will not gather well; if too ripe it is "eaten up" by acids instead of by your customers, says C. E. Chapman in Ohio Farmer.

**Cheese Trade of 1905.**  
Although this is a great dairy country, its imports of cheese, coming principally from Italy and Switzerland, exceed its exports. The exports of cheese decreased more than one-half in 1905, but the increased exports of butter made up a part of the loss.

**Best Time to Feed Silage.**  
In a well kept barn that is properly ventilated there is but little danger of tainting the milk by feeding the silage before milking. It is better, however, to make it a practice to feed silage immediately after milking, says a dairy authority.

**Talent.**  
The world is always ready to receive talent with open arms. Very often it does not know what to do with genius. Talent is a docile creature. It bows its head meekly while the world slips the collar over it. It backs into the shafts like a lamb.—Holmes.

**The Paradox.**  
Hamand—Since Walker Tighs inherited \$1,000,000 he is a paradox. Eggbert—What's the answer? Hamand—He is both the richest and poorest actor on the stage.—Chicago News.

An excess of levity is as impertinent as an excess of gravity.—Hazlitt.

**Not Representing Industry.**  
"I suppose you represent the great American industries?" said the tourist. "I used to," answered Mr. Cumrox, "but circumstances persuaded me to retire and enjoy my prosperity. I now represent one of the great American Indolences."—Washington Star.

**Insult to Injury.**  
"Why are you angry at him?" "He started to kiss me the last time he called, and I indignantly ordered him to stop."  
"And didn't he?"  
"Yes, he did! Stopped and apologized."—Houston Post.

**Interested.**  
Gunner—I saw the Kentucky colonel out in the rear of the hotel looking at the spiral fire escape. It appeared to tickle him.  
Guyer—Yes; he thought it was some newfangled corkscrew.—Columbus Dispatch.

**For Kidney and Bladder Troubles**  
RELIEVES IN 24 Hours ALL URINARY DISCHARGES  
**SANTAL CAPSULES MIDY**  
Each Capsule bears the name MIDY  
Beavers of counterfeiters.  
For sale by all druggists.

**MEN AND WOMEN.**  
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous.  
Sold by Druggists, or sent in plain wrapper, by express, prepaid, for \$1.00, or 3 bottles \$2.75. Circular sent on request.

A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year, four months \$1. Sold by all newsdealers.  
**MUNN & Co** 361 Broadway, New York  
Branch Office, 625 F St., Washington, D. C.

# FOLEY'S KIDNEY CURE

Will positively cure any case of Kidney or Bladder disease not beyond the reach of medicine. No medicine can do more.

**FOLEY'S KIDNEY CURE** strengthens the urinary organs, builds up the kidneys and invigorates the whole system.

**IT IS GUARANTEED**  
**TWO SIZES 50c and \$1.00**

**Passed Stone and Gravel With Excruciating Pains**  
A. H. Thurnes, Mgr. Wills Creek Coal Co., Buffalo, O., writes: "I have been afflicted with kidney and bladder trouble for years, passing gravel or stones with excruciating pains. Other medicines only gave relief. After taking FOLEY'S KIDNEY CURE the result was surprising. A few doses started the brick dust, like fine stones, etc., and now I have no pain across my kidneys and I feel like a new man. FOLEY'S KIDNEY CURE has done me \$1,000 worth of good."

**No Other Remedy Can Compare With It**  
Thos. W. Carter, of Ashboro, N. C., had Kidney Trouble and one bottle of FOLEY'S KIDNEY CURE effected a perfect cure, and he says there is no remedy that will compare with it.

**SOLD AND RECOMMENDED BY**  
Sold and Recommended by CHAS. ROGERS, Druggist.
