**Amusing and Realistic—The long and lively films now on exhibition at the Waldorf concert hall are among the best Kinnetoscope work ever shown in this city, and include a remarkable presentation of Arabian magic and its alluring transitions; and elopment, with all its accessories of fun and danger; the tribulations of a bibulous individual and his erratic spouse, who goes with him on one of his peripatetic sojourns about the city with a grand finale in the way of his defeat and a thorough trouncing when he gets home.**

**Oregon's Board Feet—Three mountain ranges divide the state of Oregon from north to south—the Coast Range, the Cascades, which segregate the state into eastern and western Oregon, and the Blue Mountains near the eastern boundary. It is among the slopes of these ranges that is found the most valuable stand of lumber in the world—a stand estimated at 300,000,000,000 feet, board measure, and making up approximately a sixth of the merchantable timber in the United States. Converted to lumber and disposed of at, say \$12 per thousand feet, the amount of revenue derived would be \$3,600,000,000. Last year, 1,300,000,000 feet of lumber was shipped, adding to the wealth of the state the neat sum of \$15,900,000. The increase over the timber output in past years is represented in millions of dollars for example, in 1904, the sum of \$13,200,000 was derived, and in 1903, the total was \$12,000,000.—G. A. White, in Sunset Magazine for November.**

**WATER COMMISSION MEETING**

THE ASTORIA WATER COMMISSION MEET IN REGULAR SESSION AND TRANSACT CONSIDERABLE IMPORTANT BUSINESS.

The regular monthly meeting of the Astoria water commission was held last evening at the city hall. Present: President Wright, Commissioners Elmore, VanDusen, Trenchard and Fisher, and Clerk G. W. Lounsbury. The minutes of the last meeting were read and approved.

The monthly report of the clerk, treasurer and superintendent were read and approved. The clerk reported receipts for October \$3,758.65. The treasurer reported \$17,409.76 on hand in the general fund. The superintendent recommended the purchase of a meter for St. Mary's hospital, for the elevator, as it was impossible to determine the amount of water used by the gauge or indicator, which had not done a day's work since the first day of the month.

Bills amounting to \$725.46 for the month of October were read and ordered paid. The monthly pay roll amounting to \$700.25 was ordered paid.

Communication from Mayor Herman Wise relative to the new drinking fountain, asking the commission to supply water free of charge to the public, also to furnish the pipe and make the connections for the fountain, the city to pay the cost of laying the pipe and material used, was read and laid over until the next meeting in order to ascertain the cost.

Communication from Houston & Ferguson asking the commission to grant a special rate for washing away dirt at the new bank building at the corner of 11th and Duane streets, was referred to the superintendent to report to the rate committee, and they to fix the rate upon his recommendation.

Communication from A. L. Adams, relative to a communication sent him by the clerk for information as to the best method of supplying residents on the hills with water, was read. Mr. Adams recommended the building of a small reservoir with a capacity of about 2,500,000 gallons at an elevation of about 200 feet above the present reservoir, No. 2, as it was impossible to reach this district by the gravity system. The communication was filed for further consideration. The bill of Mr. Adams for services rendered was ordered paid.

Mr. Elmore, of the committee appointed to ascertain the damage done to the C. R. Thomson house by the breaking of a service pipe, stated that he had made an examination of the premises, but was unable to decide whether it was the fault of the employees of the city or not. The pipe broke on Sunday morning and Assistant Superintendent Johnson tured the water off, leaving the residents in that district without water. Complaint was made and the water turned on again and it is claimed that this was the cause of washing away the foundation under the house. The attorney for the Thomson estate claimed damages in the sum of \$50 and additional damages to the plastering in the building. Mr. Elmore stated that the committee could not agree in the matter and asked that it be referred to the city attorney for an opinion. The recommendation was adopted.

The clerk was instructed to have the superintendent purchase a meter for St. Mary's hospital elevator, the cost of which is about \$300.

Assistant Crang was sent to ascertain the gauge of the indicator on the first of the month, which is located on the top of the elevator, and in such a position as to make it almost impossible to ascertain the markings, and Crang reported that he was unable to do so. Superintendent Berswick was asked to investigate the matter, but stated that he was no sailor and sent Assistant Johnson, who reported that the amount consumed was \$4.75, but as the gauge stood at this point the month previous, it was discovered that the indicator had not done any work for the city for over a month. When Johnson was asked how he ascertained the figures, he replied that he used a pair of opera glasses, as it was impossible to get within a mile of the indicator.

There being no further business, the commission adjourned until the next regular meeting.

**Fishermen Returned—A number of Columbia river fishermen who have been fishing at Aberdeen and other points on Gray's Harbor, returned to the city yesterday. The phenomenal run of salmon the fore part of the season has almost entirely disappeared and only a nominal number of salmon are being caught.**

**Will Build Spur—A prominent resident of Seaside was in the city yesterday and states that the A. & C. railroad surveyors have been busy the past week, surveying a spur from the present depot at Seaside to the old Holliday property, known as the Seaside House, now owned by Mr. Cartwright. It is rumored that a contract will be let early next week for putting in the spur and that the intention of the company is to build an additional line from Seaside to the Seaside House, and that a commodious depot and freight house will be erected upon the property this winter. This will make the Seaside house the terminus of the road and will no doubt prove advantageous to that property.**

**Street Improvements—The certificates of the improvement of several streets were filed in the office of the auditor yesterday afternoon. The improved streets are as follows: Bond street from Sixth to the McClure line, by Birch & Jacobson, at the contract price of \$5,951; Alameda avenue between Columbia and Iwaco avenues, by John Makkala and John Wuopie, at a cost of \$5,125; Duane street between Sixth and Tenth, by Dill & Young, at a cost of \$6,055. The recommendations will be submitted to the common council next Monday night and ordinances drawn providing for the payment.**
