

## REPUBLICAN MANAGEMENT

### Governor Odell on New York Campaign.

### HUGHES MADE FIGHT

### Alleged that There Was no Excuse for Losing State Ticket.

### INFLUENCE ON ELECTIONS

### If Bryan and Hearst Make a Combination, Which is Probable, They Will Be a Hard Combination to Defeat.

NEW YORK, Nov. 13.—Former Governor Odell, in an interview, stated today, that the management of the Republican campaign in New York was the "most astute" he ever knew. The whole Republican ticket, he said, might just as well have been elected. As the result now stands, it looks like a Democratic victory and leaves the Republican party in bad shape with the national campaign coming on.

The Republicans, he declared, made no campaign at all, but put the burden on Governor Hughes' shoulders. Odell stated that the people of this state have always resented interference on the part of the president of the United States in their local elections, and he hinks the interference of President Roosevelt did more harm than good. Odell says that Hearst is greatly strengthened as a political factor by his campaign and that while he might not be elected President, he was a man to be reckoned with in the future.

He said that a combination of Bryan and Hearst would be a hard one for the Republicans to beat, and believes that Hearst and Bryan had a complete understanding prior to the election in the state by which Bryan was to support Hearst for governor and Hearst is to support Bryan for the presidency. Should this plan be carried out, the Republicans are not sure of winning the next election.

### SLAYER ARRESTED.

### Murderer of Harry F. Smith at Pittsburg Captured.

PITTSBURG, Nov. 13.—The police tonight express confidence in having under arrest the slayer of Harry F. Smith, who was killed at his home by burglars. Charles Buccini, an Italian, was arrested last night with a wounded hand. He had a bullet extracted today. It is 32-calibre, the size of that fired from Smith's gun. Buccini has been identified by people who declare that they saw him at Smith's home. Rewards for the slayers of Smith and James F. McMillan, who was murdered a week ago, have been augmented by \$1,000 offered by the city. Many holdups occurred today, the robbers in every case escaping. Wholesale arrests are being made of men without apparent occupation.

### DEVIL ROUTED.

SEATTLE, Nov. 13.—T. H. Gourlay, leader of the Church of God's Children or the People of the Apostolic Faith, in explaining why he and his congregation made so much noise at night that the neighbors could not sleep, said:

"We were casting the devil out of a woman and in order to do it we were forced to sing and shout. It was a hard task, but I believe we accomplished the desired result."

Chief of Police Wapenstein informed Gourlay that he would have to use some other means of getting the devil out of his people.

### STOLE MORE LAND.

### Standard Oil Company to be Indicted in Kern County.

SAN FRANCISCO, Nov. 13.—The Call today says:

It became known in federal circles yesterday that recent locations of land in Kern county by agents of the Standard Oil company have been made the subject of investigation by government officials. As a result it is asserted indictments will follow. The land was taken up by the petroleum combine ostensibly for the gypsum deposits, but in reality for oil purposes. That the character of the land had been carefully studied is shown by the fact that a flowing oil well has already been developed.

The inquiry is being made through the office of United States Attorney Devlin of San Francisco. Federal agents have been at work for several weeks in Kern county. From their preliminary reports it is believed that the manner in which the land was secured will warrant indictments on the part of the federal grand jury.

The information secured by these agents will be placed in the hands of United States Attorney Robert T. Devlin, who will in turn forward it to Washington to the attorney general.

### WHALER ARRIVES.

SAN FRANCISCO, Nov. 13.—The whaling steamer Bowhead which left here April 29, 1903, arrived here yesterday from the Arctic with a catch valued at over \$100,000.

The Bowhead secured eleven whales and brought home 20,000 pounds of bone and 370 barrels of oil.

## CRIME IN PITTSBURG

### Various Cities are Taking Precautionary Measures.

### EXTRA POLICEMEN APPOINTED

### Crime Epidemic Continues and Eight Burglaries and Hold-ups Occurred at Pittsburg and Vicinity in Twenty-four Hours.

PITTSBURG, Nov. 13.—Almost simultaneously with the numerous burglaries and cases of highway robbery in this city, comes reports from throughout Allegheny and adjoining counties of like crimes accompanied by violence. In dispatches to the Associated Press last night, no less than eight such cases were reported within a hundred miles of Pittsburg, some of them attended with fatal results.

In line with steps taken by the Pittsburg city authorities the officials of neighboring boroughs began last night to take precautions against any "epidemic of crime" in their bailiwicks.

At Sewickley last night an ordinance was passed by the local council increasing the police force and calling upon the police to apprehend all suspicious characters. The borough council of Sharpsburg, also a neighboring borough, empowered the police commissioners to employ as many additional men as was deemed necessary.

### CURRENCY QUESTION.

### Views Expressed at the Meeting Were Not Altogether Harmonious.

WASHINGTON, Nov. 13.—For more than five hours today, the Currency Committee of the American Banking Association and the New York Chamber of Commerce discussed the formulation of principles which are to form the basis of legislation for the issuance of emergency currency in times of financial stringency. These principles will be recommended to congress for enactment into law at the coming session.

Although the views expressed today were not altogether harmonious at all times, the discussion showed an evident disposition to reach a common ground. The discussion today developed a sentiment in favor of currency to be issued during the periods of financial stress, as is done in various European countries.

## BRITISH SHIP GALENA HARD ASHORE AT CLATSOP

### Dence Fog and Southwest Gale Responsible for the Great Misfortune.

### CAPTAIN HOWELL WAS IN CHARGE OF DECK

### Vessel Was Out From Junin, Chili, and Bound for Portland—In Ballast and Had Been Off the Columbia Bar for Nine Days Trying to Enter This Port.

### BRACES FOULED WHEN HER ATTEMPTED TO WEAR SHIP

### ROCKETS WERE DISCHARGED IN THE EARLY DAWN, BUT DENSITY OF FOG MADE THEM INEFFECTUAL—CREW OF THIRTY ALL SAFELY LANDED IN SHIP'S LIFE-BOAT—FOUND SHELTER AND RELIEF AT NEARBY FARM.

Just as the day was breaking yesterday morning, or to be correct, at 6:40 o'clock, the fine British four-masted bark Galena, Captain Howell, 59 days out from Junin, Chili, in ballast, for Portland, with thirty people all told, on board, went ashore on the Clatsop sands, at a point two miles north of Gearhart Park. There was a dense fog prevailing at the time, and when it lifted it was only to reveal the ship in a smother of breaking water and the shore almost directly beneath her.

Captain Howell was, himself, in charge of the deck, and immediately gave the necessary orders to wear ship, but just as the men buckled down to a swift haul on the braces, they fouled aloft and before they could be cleared, she had slipped on the beach and was a victim to the mischance of a blinding fog, supplemented almost immediately by a smashing gale from the southwest, which struck the coast at that hour. It was soon evident that she could not be saved and the captain ordered rockets sent up, but the density of the fog prevented their being seen for any considerable distance, and as the vessel was pounding heavily, and swinging dangerously, the starboard life-boat was called away and all hands were safely landed in a few moments.

Not a soul was hurt, or lost, and the party took up a line of march directly inland, making the West farm-house in short order, where all possible relief was extended to the tired, cold and hungry outfit. There they rested during the day, coming to this city on the evening grain from Seaside, in charge of First Officer S. B. Thompson, who reported instantly to Vice Consul P. S. Cherry, who installed the men at the Central hotel and provided for their care and comfort in all ways.

The vessel struck just at the turn of the flood and the sea swung her stern inshore, so that when the tide went out she was lying on a line diametrically opposite to the course on which she approached the coast. She was steering nor-by-east when she got into trouble, and the wind was out of the south-west and blowing at a swinging rate. The masts and spars held and the only sign of disorder aloft is a split mizzen upper-top-sail. She was carrying upper and lower top-sails, fore and aft, the fore-sail and the spanker and she rests easily on an even keel.

Captain Howell, the second officer and the steward remained with the ship, while the first officer and twenty-six men came on to town.

A guard was sent over from the fort and another from the Point Adams life-saving station and these will remain on duty until other arrangements are made for the safe-keeping of the ship's stores and moveables.

The Galena picked up the Columbia river lights nine days ago and has been beating off and on all that time and contending with a succession of gales and was running short of some of her staple supplies in the food line. She has no sickness aboard and is in

prime condition in all ways, and her men speak kindly and regretfully of her unhappy fate. They are a fine body of sailors and seem thoroughly well disposed toward their officers and the kindly people who first met the exigencies of the untoward hour yesterday morning.

This is the second British vessel to be lost within the past month on the Clatsop sands, and this one lies about seven miles to the southward of the Peter Iredale, her predecessor in misfortune. Just what steps will be taken for her restoration are not yet discussed at the consulate, but she will be guarded carefully against all subsequent losses, either from sea or from land.

The Galena is owned by T. Shute, Glasgow was built in 1890, by Stephens & Sons, at Dundee was of 2,294 tons gross register and 2,169 tons net; has a length of 292 feet, is of 42 feet beam and 24 feet depth of hold and is a fine, staunch vessel, and not unlike the Peter Iredale in general appearance, though a larger and heavier craft.

### AGAINST JAPANESE.

### Efforts to Secure Legislation Against Japs Attending School.

SAN FRANCISCO, Nov. 13.—The Call will say tomorrow that Secretary Metcalf, before leaving for Washington today, confided to a few intimate friends that the sentiment of the people of San Francisco, if not the whole state, was opposed to allowing Japanese or Chinese children to mingle freely with Caucasian children in the public schools, and that it is likely that a statute providing that Asiatic children shall be taught in separate schools will be strengthened at the coming session of the legislature. As a lawyer, the secretary told the Call, that his opinion was that the treaty with Japan guaranteed Japanese children equal rights with children of the most favored nation, and that the provisions in the California statutes of that kind would be unconstitutional.

### MAY BE AVERTED.

### Strike Situation in New York is Apparently Settled.

NEW YORK, Nov. 13.—There is no longer any danger from a strike of the railroad employees of the east, as the situation with reference to the demands of the members of certain organizations was considerably cleared today. The New York, New Haven & Hartford and the New York Central came to an agreement with the committee representing the firemen of the two roads regarding the status of the new electric locomotives and the adjustment committee of the Erie locomotive engineers announced late today that it had come to an agreement with the officials of that system. The question of wages and hours will be the subject of further meetings and railroad officials anticipate no difficulty in coming to an agreement.

### HENEY ACCUSED.

### Abe Rueff Charges District Attorney of Accepting Money.

SAN FRANCISCO, Nov. 13.—Information was given out last evening that within a few days action will be taken by a member of the board of supervisors charging Francis J. Heney with accepting fees from outside forces in payment for services performed in his official capacity. This course has special reference to a fund of \$100,000 guaranteed by the citizens to pay the costs of his war on the grafters.

The commencement of these proceedings marks the next move of the accused grater to hamper the efforts of the district attorney and oust Heney from the office he now occupies.

When informed of the proposed action last evening Heney refused absolutely to talk.

"I have nothing to say whatever," said he. "I am not worrying about any move the supervisors may make." Detective Burns was more than talkative on the question, however.

"Why, such action would be simply ridiculous," said he. "If any of the supervisors contemplate it, they must be crazy. Now as to the \$100,000 fund, we have no hesitation in saying that Mr. Heney has not and will not touch a single cent of it, neither did he ever intend to do so. I don't know what disposition will be made of the money, but I do know that Mr. Heney will not get any of it."

Rueff made public a cablegram, received from Schmitz last night announcing that Schmitz was sailing from Baulonge Saturday. He will reach New York Friday.

## ATTEMPTED MURDER

### Believed General Rheinbot Threw Bomb Himself.

### TO RETRIEVE FORTUNES

### Alleged That the General Shot His Supposed Assailant to Get Rid of Hi mand Story is Generally Believed.

MOSCOW, Nov. 13.—Although Gen. Rheinbot received a hundred messages, including one from the Emperor, today, congratulating him on his narrow escape from assassination, there are ugly rumors in Moscow that Rheinbot was the author of the plot against his own life. It is thought that he had schemed thus to retrieve his falling fortune and stave off his retirement, it having been decided upon in official circles to relieve him from duty.

Rheinbot, at the time the alleged attempt was made, was following the usual foot path on a rough narrow alley. The bomb exploded in a manner highly suspicious. Pieces were picked up to show it had been more than an imitation and perfectly harmless. The original theory was that the bomb would not go off because the dynamite was frozen. Now the police explain it was a fuse bomb and that the social revolutionists had discarded these missiles long ago. Regarding the shooting of his assailant, while he was being held by a policeman, it is asserted that the bomb thrower did not have a revolver, that he fired at no one, and the general is alleged to have shot him to get rid of him.

### DISCOVERED A COMET.

CAMBRIDGE, Mass., Nov. 13.—A comet, which could be seen through a small telescope, was discovered Saturday night by Holger Thiel at Copenhagen, according to a dispatch received today at the Harvard college observatory from Professor Kreutz of Kiel, Germany.

Two observations were made of the comet, one at eight hours 12 minutes and 12 seconds p. m. (Eastern standard time), in right ascension, 9 hours 15 minutes, 21.3 seconds, declination plus 12 degrees 16 minutes 50 seconds; the second at 11:13:09 p. m. in right ascension 9 hours 16 minutes 13.3 seconds, declination plus 12 degrees, 28 minutes 31 seconds.

## MILITARY MANEUVERS

### Chinese Considered Poor in Military Tactics.

### DEFICIENT IN NERVE

### The Officers are Considered More Deficient Than the Soldiers and Navy.

### JAPANESE AND SAN FRANCISCO

### Newspapers Claim the Action of San Francisco School Board Relative to Japanese a Disgrace to American Manhood.

VICTORIA, B. C., Nov. 12.—The steamer Empress of Japan which arrived today from the Orient, brought news of the Chinese military maneuvers in North China. Japanese correspondents who accompanied the maneuvers are unanimous in stating that while the operations showed distinct signs of progress, the Chinese troops are not yet qualified to range themselves against occidental soldiers. The men are considered deficient in nerve, the movements of the various bodies are not properly co-ordinated, and there was want of uniformity. The education of officers is considered especially defective. Two armies marched at first around each other's flanks and their encounter was consequently belated. Unlike the previous years maneuvers there was no prearrangement. The northern army under Viceroy Yuan Shih Kai was defeated at first, one of its wings being broken and forced to retire. The southern army under Viceroy Shang Chih Tung then assumed the offensive but was unable to dislodge Yuan's forces and exposed its own flank when the northern army, taking advantage of the strategical blunder recovered its lost ground and forced the southern army into retreat. The troops engaged numbered 36,000. They marched well and had a good appearance as to arms, horses and equipment.

It was noticed that the queues were docked. Yuan Shih Kai's verdict was that there was want of uniformity in the armies, greater practice in musketry was necessary and other improvement needed. The southern army was greatly inferior to the northern force in equipment.

Japanese newspapers received by the Empress of China are filled with comment regarding the anti-Japanese demonstration at San Francisco. Some write very bitterly. The Nippon says the "Proceedure at San Francisco is disgraceful from the point of view of American manhood. It is an echo of the cry of the unfit to be suffered to survive. Seeing themselves threatened with submergence in the struggle of life they fall back upon weapons universally condemned by civilization."

The battleship Satsuma, 19,000 tons, will be launched at Yokosuka, November 15. The emperor will be present at the launching and the occasion will be celebrated, this being the first battleship to take the water from a Japanese dock.

### DANGER SIGNAL OUT.

### Governor Hughes Wears Red Cap in the Adirondacks.

NEW YORK, Nov. 13.—A special dispatch to the Times from Camp Killcare in the Adirondacks, where Governor-elect Charles E. Hughes is recuperating from his election labors, says Mr. Hughes took precaution yesterday, while taking his exercise in the woods, to wear a bright red cap. There are many hunters in the forests now looking for deer, and the red cap was worn as a danger signal.

Mr. Hughes himself, the dispatch says, does not care for hunting.
