New Yorkers Plan to Construct Homes for Workingmen.

EACH MAY HAVE A GARDEN

Scheme Has Been Tried in England With Good Effect and Will Be Watched With Interest in This Country.

NEW YORK, N. Y., Jan. 8.—Some of the most prominent men in New York have united in an effort to create an ideal city of homes in which the poor as well as the rich may have plenty of light and air and enjoy the comforts of life. The Garden Cities Association has been formed to carry out the idea, and plans are already under way to establish on Long Island a city with all the advantages of the country.

The underlying principle of the project may be summed up in the rule, "Begin at the beginning." Instead of letting houses go up haphazard, those will make the plans all in advance. There will be a section for residences, another for factories, another for stores. Health and beauty will be the objects in view. School buildings, library, gymnasium, club, assembly hall all these will be provided for. Every citizen, however poor, will have a garden.

The President of the Garden Cities Association is John Lewis Childs, the first President is Ralph Peters, President of the Long Island Railroad, the Treasurer is R. W. Jones, Jr., President of the Oriental Bank, and the Secretary is W. D. Bliss. In 1905 Mr. Bliss was named by the United States Commissioner of Labor to investigate the condition of workingmen in European countries.

In England his attention was attracted to the "Garden Cities Idea." Six years ago Ebenezer Howard wrote a book outlining a plan for a city of ideal homes and now one is going up at Letchworth, Hertfordshire, England, an association to make the "Garden City" a success in several factories and homes have already been built on a beautiful site of 4,000 acres.

Mr. Bliss found his supporters for his plan in a roomy, healthy city near New York. Some of the members of the board of managers are Bishop Henry C. Potter, Edward M. Shepard, Dr. Felix Alder, Charles L. Fox, Canon Henry R. Bryan, Walter G. Oakman, Dumont Clarke, Dr. Percy S. Grant, F. C. Woodward, J. S. W. Young, Dr. Julian Street and Bishop Frederick Burgess.

It is proposed to finance the city on Long Island by organizing a stock company. Subscribers to the stock will receive a profit just as from any industrial undertaking, except that the profit is to be limited to 5 per cent and all income above that amount will be used for the good of the community. The territory for a whole city having been secured at the beginning, the value of land will rise as it is improved with dwellings, stores and factories. Manufacturers, it is believed, will be attracted to such a place because the conditions will insure them competent and permanent labor.

T

From the start it will be the aim of the company to supply to the workingman a comfortable home which eventually he can make his own.

The Garden Cities Association will have nothing to do with the actual financing or operation of any city, but will exercise a semi-supervisory function to see that the real purposes of the Association are carried out.

FROM THE ANTILLES.

Chamberlain's Cough Remedy Benefits a City Councilman at Kingston, Jamaica.

Mr. W. O'Reilly Fogarty, who is a member of the City Council at Kingston, Jamaica, West Indies, writes as follows: "One bottle of Chamberlain's Cough Remedy had good effect on a cough that was giving me trouble and I think I should have been more quickly relieved if I had continued the remedy. That it was beneficial and quick in relieving me there is no doubt and it is my intention to obtain another bottle." For sale by Frank Hart, and leading druggists.

INGENIOUS THEFT.

Elevator Boys Make Haul With a Block and Tackle.

CHICAGO, Jan. 8.—Detectives last night arrested Harry Hartal and Douglas Brown, elevator boys in an apartment house in West Hundred and Sixth street on a charge of complicity in an old theft of an apartment on the sixth floor of the building. It is alleged the thieves took a block and tackle and on Sunday night used them to get into the rooms of Henry Neuman, a wealthy lithographer from which they stole jewelry, silverware and furs valued at \$5,000. The police found that the block and tackle were rigged around a chimney and that while the Neumanns were at church the burglars let themselves down to a window in the apartment which they forced with a jimmy.

CARRIE NATION

certainly smashed a hole in the barrooms of Kansas, but Ballard's Horehound Syrup has smashed all records as a cure for coughs, Bronchitis, Influenza and all Pulmonary diseases. T. C. H., Horton, Kansas, writes: "I have never found a medicine that would cure a cough so quickly as Ballard's Horehound Syrup. I have used it for years." Hart's drug store.

Indigestion, constipation come and go like rent and tax day and other sorrows, if you take Hollister's Rocky Mountain Tea, the greatest remedy known to mankind. 35 cents, Tea or Tablets. For sale by Frank Hart.

THE ORIGINAL LAXATIVE COUGH SYRUP
Best for Coughs, Colds, Croup, Whooping Cough, Etc.
BEE'S LAXATIVE.
No Opium, Contains National Pure Food and Drug Law.
CONTAINING HONEY AND TAR
All cough syrups containing opiates constipate the bowels. Bee's Laxative Honey and Tar moves the bowels and contains no opiates. Sold at Frank Hart's drug store.

Lords Get Very Drunk in Upper House of Parliament.

SHOCKS THE LOWER HOUSE

Lace Will Figure in Fashionable Ball—New Theory Offered for Disappearance of Ships—French Woman Throws Acid.

LONDON, Dec. 29.—The closing of the House of Lords were marked by incidents which shocked the sensibilities of some members of the lower house of Parliament, notably those who feeling of resentment toward the peers had already been aroused by the killing of the education bill. One M. P. who had seen a noble lord carried out of the chamber by attendants and another so hilarious that he had to be kept his seat by force, was so impressed by the spectacle that he brought the matter up in Commons, though fully aware that any action in such a manner was indelictably unparliamentary. Getting recognition from the speaker, Mr. Crooks, the labor member for Woolwich, put the following question in the House of Commons:

"I beg to ask the first commissioner of works a question of which I have given him private notice—whether it is a fact, that during the course of the discussion on the merchant's shipping act amendment bill, in another place last night, the attendants of the House of Lords had to remove one of the members, who was obviously intoxicated, and that another member who took part in the debates was suffering from overindulgence in drink?" (Opposition cries of "Order.")

The Speaker—Order! Order! The honorable member has not submitted the question to me. It does not appear to me to come within the rule of urgency in any way. (Laughter.)

Mr. Flavin, member for Kerry—It was very urgent last night. (Renewed laughter.)

This closed the incident, but Mr. Crooks had succeeded in getting into the official report of the proceedings the noteworthy fact that the House of Lords, in handling lemons to the House of Commons, was stimulated by something more potent than a jealous zeal for "wise, deliberate, and well-considered legislation." Its members prate about.

Lady Aberdeen has bidden the Irish peeresses to a lace ball at the vice regal mansion in Dublin, the details of which are viewed with envious interest by London hostesses on the lookout for the novel and original. The Irish lace ball is only one of the unique functions Lady Aberdeen has planned for the season, which is to be one of the most brilliant the Irish Metropolis has ever witnessed. A special feature of the lace ball will be the quadrilles, in which lace of various descriptions will be worn by the dancers. In fact, Lady Aberdeen expects that every lady guest will wear a dress trimmed with Irish lace or crochet, while the men will appear in court dress, with Irish lace jackets and ruffles. Her excellency has expressed the wish that Irish poplin shall also be used in the ladies' dresses. Eight handed Irish reels and jigs will be introduced, and many of the old step dances of Ireland are being revived by the dancing instructors of Dublin, in preparation for those forthcoming vice regal entertainments. Another novelty planned by Lady Aberdeen is an afternoon party, at which gowns of Irish cloths only are to be worn, while the men are to come in suits of Irish manufacture. With such an impetus, it would seem that Irish society should be the gainer, no less than Irish politics has been, through the sympathetic dispensation of the Liberal regime.

Capt. Anderson, of the steamer African Prince, advances a new theory, based on a startling experience, to account for the mysterious disappearance of vessels at sea, with special reference to the many untold disasters on the Atlantic. Capt. Anderson describing the narrow escape of his vessel from destruction by a meteor on his last voyage from New York says: "I was on the bridge with the second officer when suddenly the dark night was as light as day, and an immense meteor shot towards the earth. Its train of light was an immense broad electric-colored band, gradually burning to orange, and then to the color of molten metal. When the meteor came into the denser atmosphere close to the earth,

it appeared like a molten mass of metal being poured out. It struck the water with a hissing sound close to the ship, and the consequence, had it struck the ship, would have been total annihilation, without doubt, and not a soul left to tell the story."

Capt. Anderson believes that to some such cause must be attributed the disappearance of steamers during a passage of fine weather and in the open sea, where there are no navigation dangers. "Such losses make us think of boiler explosions and other theories, which might, under circumstances of very bad weather, cause the loss and total disappearance of a steamer, but my experience on the voyage from New York has brought to my mind that ships which have never been heard from were lost by a meteor falling on them. Neither seamanship, engineering nor ordinary theory can explain the mysteries of the Atlantic otherwise.

A dramatic story of a woman's revenge was told at the Guildhall Police Court when Emile Foucault, a young Frenchwoman, was sent to trial on a charge of throwing vitrol in the face of M. Delombre, thus causing the loss of one eye and disfiguring him for life. M. Delombre, who is the son of persons of high circumstance in Paris, had been the woman's lover, and she followed him to London after a quarrel in Paris. They went to Transter's Hotel to discuss their troubles, and ordered a cup of coffee. Explaining that she had medicine to take with the coffee, Emile poured something from a bottle into the coffee cup. A little later, as they stood at the window, the girl, with the cup still in her hand, said to M. Delombre: "Either you shall marry me, or you shall kill yourself. If you are not a coward, or I will kill you. To this Delombre answered: "Marry you? Certainly not. You do not love me—indeed, you hate me, and neither do I love you." Emile repeated her demands, all the time perfectly calm. "I shall marry you," declared the other decisively, and picked up his overcoat to leave. He had got one arm in the sleeve when Emile violently dashed the contents of the cup in his face. He rushed to the door, only to find that he was locked in. In his agony he kicked one of the panels out, and his screams attracted a policeman to the scene. He was taken to St. Bartholomew's Hospital, where his terrible condition caused grave doubt at first for his recovery.

Emile was arrested, and a loaded revolver and box of cartridges were found on her. She vehemently denied offering Delombre the fluid to take his own life. She raised the cup to her lips, she said, intending to commit suicide in his presence, but a remark of his caused her to lose control herself and she flung the contents in his face. The sight of her lover's disfigurement threw her into a fit of hysterics. In court, and she appeared very distressed throughout the hearing. In her purse was found her will, dated, Paris, November 17, 1906.

Delombre's story was dramatically related by counsel, the scene at the hotel vividly described, and the denunciation of the girl delivered with unsparing force, indeed, the atmosphere of Guildhall courtroom seemed surcharged with Frenchness—the flavor of romance and crime that rarely crosses the channel having lost nothing of its Parisian quality.

The tragic death of Dr. James Lambert at South Kensington station was attended by one of the most extraordinary circumstances that perhaps ever fell to the experience of a medical man. Dr. Lambert was usually summoned when accidents occurred at the station, and when, last Sunday, a man was badly injured there, the station officials, unaware of the identity of the victim, promptly sent for Dr. Lambert to attend to the case. The doctor failing to respond, the dying man was removed to St. George's hospital, where he was recognized as Dr. Lambert himself. He had been maimed and electrocuted in attempting to jump on an electric train, just as it was starting, and, by the irony of fate, was called to attend to injuries to—himself.

The curious story of De Raylan, the Russian consular officer at Chicago, who turned out to have been a woman with two or more wives, as cabled
