Hops, Wool, Hides, Etc.

Wonderful Eczema Cure.

"Our little boy had eczema for five years," writes N. A. Adams, Henrietta, Pa. "Two of our home doctors said the case was hopeless, his lungs being affected. We then employed other doctors but no benefit resulted. By chance we read about Electric Bitters; bought a bottle and soon noticed improvement. We continued this medicine until several bottles were used, when our boy was completely cured." Best of all blood medicines and body building health tonics. Guaranteed at Charles Rodgers' drug store. 50c.

THE SCIENCE TRUST

Clearing House for Diffusion of Scientific Knowledge.

THE SMITHSONIAN INSTITUTION

The Gains That Will Accrue to Science Through This Consolidation of Interests Be Of Greatest Value—Will Erect College Building.

WASHINGTON, May 6.—Although the railroad trust, the beef combine, and the Standard Oil trust have been and are under severe fire by the government, a new trust has been formed at the national capital, that will have not only the hearty endorsement but the active support of the Administration. This is the Science Trust. Secretary Charles D. Walcott, of the Smithsonian Institution, has copied modern methods of high finance, and the Institution hereafter will be the clearing house for the diffusion of scientific knowledge. With one bold stroke Secretary Walcott has amalgamated the National Academy of Sciences and the American Association for the advancement of Science, and brought them into a close working partnership with the Smithsonian Institution as their headquarters.

Members of the National Academy of Sciences, which held its convention here only last week, were invited by Secretary Walcott "to deposit their archives and records in rooms supplied for the purpose, in the Smithsonian Institution, where the secretary of the Academy can have access to them and attend to such business as may be necessary in connection with the affairs of the Academy." The secretary of the American Association for the advancement of Science was extended a similar invitation. It has just been announced that Arnold Hague and Dr. L. O. Howard, secretary for the respective societies, have sent in formal letters of acceptance.

The gains that will accrue to science through this consolidation of interests will be of the greatest value. In the first place, the consolidation will centralise the efforts of scientific men, bring them closer together in their chosen lines of work, and lend to research that stimulation that comes of competition. In addition, by giving a fixed headquarters, savants of other countries will be attracted, and the interchange of ideas will result in great good. No better field could be found for the establishment of this Scientific Trust. The government departments offer unlimited opportunities for investigation at first hand, while the Army and Navy Medical Museum, the National Museum, the Carnegie Institution, the Library of Congress, the Botanical Gardens, and the various noted and extensive collections of scientific and medical books, all will be at the command of the investigators. This field will be enlarged within the near future, when the George Washington University attains the goal it has in view. The University is undertaking a campaign to install itself as the representative seat of learning of the United States.

As the University will devote special attention to its graduate department, it naturally will draw from foreign countries a great number of scholars of a scientific turn of mind. Thus the University and the new Scientific Trust will work in harmony. At the present time the University has collected, locally upwards of \$135,000, with which to purchase a site for the erection of a suitable battery of college buildings. Once the amount needed, \$200,000, is raised by patriotic citizens of the District of Columbia, the University will appeal to the patriotism of Americans. In every state in the Union to provide funds, with which to establish an adequate endowment. Coming so soon after the inception of the University campaign the action of Secretary Walcott almost insures that Washington will become the center of scientific interest of the world.

Quick Service Excellent Meals Good Berths. The Life Insurance muddle has started the public to thinking. The wonderful success that has met Ballard's Horehound Syrup in its crusade on Coughs, Influenza and Bronchitis and all Pulmonary troubles has started the public to thinking of this wonderful preparation. They are all using it. Join the procession and down with sickness. Price 25c, 50c and \$1.00.

How Much Do You Spend Every Year For Cigars?

You buy a lot of cigars in a year's time, don't you? How many of them are good and how many are bad? If it's too much trouble to figure that out, at least you can estimate how much you'd save and how much more enjoyment you'd get if you could be sure beforehand that every cigar you buy would be a good one.

We have solved your problem by stamping the "Triangle A" on the boxes of the best cigars made. We know that by making this "Triangle A" mean "good cigars" to you (and we have to prove it with the cigars alone) we get your continued patronage.

Isn't it plain enough that we MUST produce cigars that prove our claims?

The American Cigar Company cannot jeopardize its interests by misrepresenting qualities and leading the public to expect better quality than is actually in the cigars themselves. The "Triangle A" really means better cigars for you—and you'll find the proof worth seeking.

For convincing proof of the better quality for which the "Triangle A" stands try

The New CREMO

Every box is extra-wrapped with glassine paper, sealed at each end with the "Triangle A" merit mark, assuring cleanliness and proper condition.
