**STORK VISITS CONEY ISLAND.**

**One of Smallest Infants On Record Is Born On Beach.**

NEW YORK, June 26.—In the midst of a throng of women and children the stork descended on the beach at Coney Island yesterday afternoon, and only the quick action of Dr. T. L. Howard and Dr. C. F. Holtzhausen, of the Reception Hospital, saved the lives of Mrs. Lena Hargran and her infant. Mrs. Hargran, who lives at Bay street and Bath avenue, went to Coney Island with a friend to spend the afternoon on the beach at Seaside Park. Suddenly there was a commotion on the beach, and after several whispered consultations Mrs. Hargran's companion caused an ambulance to be summoned.

Dr. Howard and Dr. Holtzhausen found the woman in a critical condition and quickly removed her and her infant to the hospital. The child was the smallest bit of humanity the physicians had ever had in the hospital, for it was only seven inches long and weighed less than two pounds. The physicians held out little hope for the infant until a suggestion was made that it be hurried to the incubators in Dreamland.

Wrapped in cotton and reposing in the arms of Dr. Howard the infant was conveyed in an ambulance to the pleasure park, where the gate keepers, not having been informed of the reason for its sudden appearance, refused to permit the driver to enter.

The appearance of Dr. Fischel, in charge of the incubators, ended the argument at the gate and the ambulance rolled through the crowd of pleasure seekers in the park. As it came to a stop Dr. Howard leaped from the rear seat and hurried into the building with the infant. There were hardly any signs of life when the bath, with stimulants and oxygen, soon restored signs of life to the child. It weighed exactly one pound and eleven ounces, according to the incubator house scales.

Mrs. Hargran was taken to the Kings County Hospital for treatment.

**COLORADO'S BIG DAM.**

Corporation Formed With Capital of \$10,000,000 For Irrigation.

NEW YORK, June 26.—Arrangements were completed yesterday whereby J. G. White & Company, engineers and contractors of No. 43 Exchange street, who have constructed several electric traction lines in the Philippines, will build what probably will be the largest dam

in the world, at a point nine miles north-west of Denver. This proposed dam with its auxiliary systems, which, so far have been planned, will cost more than \$4,000,000 and will be used for irrigation purposes.

The financing of the proposition has been arranged and includes the formation of a corporation with approximately \$10,000,000 of capital stock.

The new dam, which will be known as the Standley dam, will be almost a mile and a quarter long and have a height of 150 feet. It will contain 10,000,000 cubic yards of material. The magnitude of this Colorado dam can be appreciated by noting the fact that the new Croton dam of the New York City water supply system contains less than 1,000,000 cubic yards of material. The contemplated dam will be used for irrigation purposes and is to be erected for a consolidation of several irrigation companies in Colorado.

By means of it 5,000,000,000 cubic feet of water, enough for the regular irrigation of more than 100,000 acres of land, will be impounded. The flow of five rivers is to be confined in the reservoir which the dam will form.

**UNNECESSARY NOISE.**

**New York Aldermen Establish What Is Known as Quiet Zones.**

NEW YORK, June 26.—The aldermen have passed an ordinance to insure quiet in streets containing hospitals by establishing "Quiet zones" and indicating them by signs at street corners. Teamsters and motormen must send their vehicles through these streets slowly and quietly. The motormen may not ring their gongs except in danger and children must not play in the streets. The ordinance was framed in compliance with the wishes of the Society for the suppression of unnecessary noise. The Mayor is expected to sign it readily and it will then become a law.

**Remarkable Rescue**

That truth is stranger than fiction, has once more been demonstrated in the little town of Felora, Tenn., the residence of C. V. Pepper. He writes: "I was in bed, entirely disabled with hemorrhages of the lungs and throat. Doctors failed to help me, and all hope had fled when I began taking Dr. King's New Discovery. Then instant relief came. The coughing soon ceased; the bleeding diminished rapidly, and in three weeks I was able to go to work. Guaranteed cure for coughs and colds. 50c and \$1.00 at Charles Rogers Drug Store. Trial bottle free."

**STARTING THE PONIES.**

Horses On Metropolitan Tracks Will Be Given a Moving Start.

NEW YORK, June 26.—Mr. Cassidy, who acts as a starter on all metropolitan race tracks except the one at Brighton Beach, has been notified by the steward of the club that in the future he may start horses in any manner he deemed best, either from a standing start or while they are in motion, but that his work must show improvement no matter which method he employs, or another man will be engaged to fill his place. There has been much criticism of the starting this season. Cassidy, under the rules, has hitherto been compelled to send the horses away from a standing start. In reply to criticisms for many poor starts, Cassidy maintained that he could give satisfaction with the moving start, a system he employed in the west. He is now given a chance to employ this method.

**STEEL RAILS ADVANCES.**

Pennsylvania Demands Better Rails And Must Pay More.

NEW YORK, June 26.—The Herald today says that the Lackawanna Steel Company has made demands upon the Pennsylvania Railroad for a higher price than \$28 for the steel rails ordered for delivery next year.

The situation in the steel trade precipitated by the Pennsylvania Railroad in demanding better rails and furnishing specifications therefor, which according to the Herald, the steel companies admit cannot be made profitably at \$28 a ton, is by far the most interesting one that has been created since the steel rail controversy began.

If other roads follow the action of the Pennsylvania, according to the Herald, it is considered that there will be a radical change in rail prices.

**FOREST FIRES IN CANADA.**

FORT WILLIAM, Ont., June 26.—Forest fires are raging along the line of the Canadian Pacific Railroad on both sides for miles east of here. Trains running on the Lake Superior division travel through dense clouds of smoke. People living within the region are in the greatest terror. The losses to the Canadian Northern Railway will be large. Six bridges were destroyed. The settlers have had to fight desperately to save their homes.

We don't care if you are skeptical; we don't care if you have no confidence. It makes no difference to us. Hollister's Rocky Mountain Tea will do the work or no pay—that's fair. 35 cents. Frank Hart.

**IT MAKES A DIFFERENCE.**

It makes all the difference in the world to the convivial man where, and what, he drinks. Most men desire beauty and cleanliness, and handsome appointments in the saloon they patronize regularly, as well as the essential pre-requisite of genuine wines and liquors that are served to them. And these things are so particularly and properly conspicuous at Otto Sund's elegant resort, the Commercial, at No. 509 on the street of that name that they account thoroughly for the fixed and splendid custom he enjoys. There is nothing allowed to pass his counter but the best and choicest in every department of indulgence, and the service behind it all, is the most pleasing and satisfying in the city.
