PORTLAND-ASTORIA SPEEDWAY.

There should be no let-up in the work of securing a splendid, scenic speedway between the metropolis and this city, and thence to the Clatsop coast resorts; it is one of the chiefest and most desirable things new under consideration and will contribute immensely in the davelopment of the entire river and coast country.

Portland automobilists are deeply interested in the project and any showing of the kind by the people en route will be met with generous measure by them at any time, and it behooves the officers and citizens of the three counties to reach an amicable and thorough understanding so that by another season the "devil wagons" may be spinning both ways to the enjoyment and profit of all concerned, and that means everybody within ten miles of the right-of-way; for the man with the automobile is the man who is usually able to spend money and invariably does it with lavish goodwill, and the better his road the freer his purse.

He wants a highway on which he can "go," and as long as the going is fine and unimpeded he balks at nothing short of down-right robbery. But aside from all such considerations, it is a valuable asset to every community to have a broad, fine, far-reaching road from its own gates to everywhere; they are multiplying all over the east with extraordinary rapidity, and there is no reason why the far west should not have some specimens of the high-art of speedways; nobody is barred from them, and once properly laid, they require no more cost for working than any other good road, and are a standing credit to the community through which they pass We feel certain that Clatsop will keep up her end of such a proposition, and Columbia county is the cheapest to operate of the three counties involved. having the most level land, and she will hardly disparage so notable an advantage as a magnificent and permanent course for the purpose named.

OLD-FASHIONED HONESTY.

Day by day what is known as real, off-fashioned honesty is becoming painfully rarer; the now and expansive doctrine of policy-honesty is usurping its place as an attribute of daily life, in every concievable walk and phase of human contact. The worst deature of the universal lapse lies in its adaptation by the very children, who might be relied upon some day, to reinstate the one-time code of dignified personal obligation, and restore the old sense of security, now all but eliminated from the affairs of men.

There is a cold indifference, a spacious esiculation, a deliberate acceptance, with regard to individual honor nowadays, that frankly pre-supposes every man to be dishonest. This is heartbreaking to the older generations who were raised to the happier conviction recommend Doan's Kidney Pills to any that most men were necessarily honest

and square. The dollar has won out in the contest with principle, and is now asserting its dominion with a rawness for which there is no parallel among the savage things with which we have to deal. Its consciencelessness is the most dangerous of its many-sided, evil nature and influence; and the mind and heart devoted to the study of human conditions can find but bimsy ground for hope that society will ever reverse the rule, at least, shall drive us to the resumption of the nobler and more natural ethics of human intercourse, and forces us to the upper levels from which we have so

swiftly and willingly descended.

We know that suc hideas as these are

'old fashioned" and out of place in publie print or place, but it does not do any harm to revert once in a while to the simpler and sweeter things and take measure of the space and direction of our own retrograde movement.

ASTORIA IS A BIDDER.

If Uncle Sam is hunting for a sequeserect his new Pacific Coast navy yard, we cree his new Pacific Coast navy yard, we beg to remind him that Astoria is a bidder from now on, for the plum. From MAY the Straits of Fuca to the Mexican line, there is no such place for such an establishment as within the mouth of the great Columbia River; not down its thract, at Vancouver; nor in its gullet. at Portland, but just back of its teeth. or behind its epiglottis, Tongue Point; anywhere in its safe and capacious maw, and handy to Astoria.

This is an ideal location for a great piant of the kind. There is ample communication and transportation and instant touch with all the sources and schemes of civilization; there is quick despatch to be had in and out; there is safety of the most impregnable kind; there is every element of convenience peculiar to naval yards and docks, good water spaces and depths, shelter, security and natural vantage of every kind thing that means the betterment of desired for huge concerns of government

We respectfully suggest that this matter be made the unanimous business of all Astoria and that every agency at the command of the city and section be put in motion, to the convincing of the powers that be in this behalf. We might is well have the navy yard here as the other good things headed this way, and the government itself had very much iar and conspicuous fitness of the local iar and conspicuous fitness of the locale and the strategic value that makes it super-eminent.

COMFORTING WORDS.

Many an Astoria Household Will Find Them So.

To have the pains and aches of a bad back removed; to be entirely free from annoying, dangerous urinary disorders is enough to make any kidney sufferer can be brought about will prove comforting words to hundreds of Astoria readers.

Mrs. Captain C. G. Groves, of 824 Raleigh street, Portland, Or., says: ing the course of about three months "Lapse of time has not lessened the confidence I have had in Doan's Kidney Pills since February, 1903, when I publicly recommended them. I had used them in treating kidney trouble of several years' standing. It originally started with dull aching in the small of my back over the kidneys. Colds aggravated the trouble and made the pain sharp and acute. Any extra exertion would bring on a prostrating attack. I had tried various remedies for the trouble without avail, but Doan's Kidney Pills began to help me right after I started using them. They gradually banished the backsche and pain in the loins, strengthened the kidneys and helped me in every way. I can conscientiously sufferer from kidney complaint."

Plenty more proof like this from Astoria people. Call at Charles Rogers' drug store and ask what his customers

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Chamber of Commerce Reaches Important Point.

Want Dredge For Harbor To Fort Stevens - Whyte's Report Pleases -New Members and Much Enthusiasm-Advertising Gone Over-Fine Showing

That the business men of Astoria are united in pushing this city ahead and of land he is now offering to inquiries above any other city in the northwest and deserves special commendation for is evident from the rousing Chamber of having done so. Commerce meeting which was held last

At the meeting last night there were Stevens; another had to do with the fishing industries and the fishery comsalmon season and see if possible if there were any grounds for the current information that the present season is an extremely poor one. Another question was the subject of annexing War-Secretary Whyte's report was given and

The dredge proposition was one of up for discussion and a resolution was this land was obtained and the colonipassed to the effect that an effort be made to get the government to give especial attention to deepening the channel between Fort Stevens and Astoria. Tht need for this is obvious.

Deep draft vessels sometime experience difficulty over this part of the channel and the sands are continually, drifting down and are not far enough out to catch the current which the jetty makes in the river. The W. S. Ladd has been operating in this portion of the river but to the minds of the members of the Chamber of Commerce there is a great addition needed in the work and a strong effort will be used to get the government to furnish an additional

That the continued reports emanating from Astoria to the effect that the salmon season here is very bad and that none of the canneries are receiving searcely any fish will do harm to the ominunity the Chamber of Commerce is that labor will be in demand at have fully come to realize. The fishery and report on the question.

The members of the organization were greatly pleased with the work that had been accomplished since the last meeting. The advertising which has been done was gone over by Mr. Whyte in detail and the result gave a splendid of work which this entailed on the staff, it was decided that some of the more by the Chamber of Commerce. Five new members were initiated into the association last night.

They were: Messrs. C. S. Dowe, Minchew, Williams, Carnahan, and Edson, The Following is the Secretary's Report to the Chamber of Commerce.

The first advertisements for our advertising campaign were inserted on the 3rd of July and since that date we have grateful. To tell how this great change received several thousand letters, inquires in answer thereto. This is in pursuance of the well-defined plan of the Promotion Committee to use each of 65 ads which have been written durand then to use thereafter only those which the committee then believes will be of the greatest advantage to Astoria. We have on the table be-

us tonight advertisements that save so far been inserted and the replies thereto.

The first advertisements inserted were those which the Committee believed would probably be of the greatest assistance in colonizing lands. There seems to be no doubt of the fact now that we can colonize land very successfully in this county, if we may be able to judge results in any measure from of our advertising from the standpoint of the number of replies received.

In order to sell the largest possible amount of land to outsiders, desirable people from the East, we wish to have the co-operation of the largest possible number of people who have land for sale. Van Dusen & Company and T. R. Davies are so far giving the princi-

pal assistance in this direction, both of whom are answering letters personally and trying to secure the inquiries for Clatsop County. I am very confident both will be completely successful. Mr. Davies went out and bought the tract

We wish to have all of the land listed night. Fully 100 members were present there is for sale in this county and in and they were full of enthusiasm and this section, as we can in that way ucloyalty and will go the limit for any-celerate our efforts towards bringing in settlers. But the most important and helpful work that can be done in this direction, of course, is for those who several vital questions brought up and have land for sale to make all the necdiscussed. One concerned the deepening essary arrangements to answer the inof the channel between Astoria and Ft. quiries promptly and directly. If we had a tract of ten thousand acres of land ready for settlement in small tracts mittee was asked to secure information of ten, twenty and forty acres each, and concerning the present reported slack the requisite facilities for answering inquiries promptly, it is altogether likely we could colonize it entirely during the next six months. Such a feat would mean the settlement of probably 700 families of thrifty tillers of the soil in renton, which was merely discussed, this county, something most greatly desired, and something that could not fail greatly appreciated by the members to materially advance the interests of the entire county, and especially those of Astoria. It would make but little the most important which was brought difference in what part of the county

> the newcomers would be in Astoria. Such a work of colonization would prove most profitable to any of our business men. It would not take a large sum of money to buy a tract of at least 1000 acres. Mr. Davies has bought several hundred acres on his own acount and I confidently predict that the results he shall achieve will infuse a new Iffe into the colonization work, such that business men of Astoria, even if they are not inclined to help in this colonization work because of the good t would do to the community, will desire to take a hand in it because of the dair profits they may make out of it. And it is perfectly right and proper that there should be fair profits from such an important work. In no other way can colonization be successfully done.
