### COMMON COUNCIL IN SESSION

(Continued from page 4)

to believe that the evils of gambling have been and are being suppressed and prohibited. Therefore, be it resolved, by the common council of Astoria, that the Mayor appoint a committee of five members of the common council to investigate such rumors and employ a stenographer to take the testimony and report the evidence to the common council. Adopted.

Tallant-Grant Packing Co. et al vs. City of Astoria. Copy of restraining order from collecting assessment on Bond street. Referred to city attorney.

A motion to remove the arc light at Forty-fourth and Bond streets to a point 60 feet, was passed.

Report of city surveyor in regard to work done by W. A. Goodin on the improvement of Irving avenue, Eighteenth street to east line of Shively's. Amount due account of same, \$507.24. Adopted.

Report of city physician in regard to sanitary condition of Adair's Astoria, Thirty-fourth and Duane streets. Referred to street committee who were instructed to extend the sewer.

Report of committee on streets and public ways in regard to constructing a sewer on Eighth street from Harrison to Lexington avenue, recommending that the bid of L. A. Carter to construct said sewer for the sum of \$1475 be accepted. Adopted.

Bids for constructing a sewer on Eighth street from Harrison to Lexington avenue. Lowest bid of L. A. Carter was \$1475. Report accepted.

Specifications for the improvement of Eleventh street from south line of Exchange street to north line of Franklin avenue. Accepted and placed on file.

Specifications for the construction of a sidewalk on Exchange street from west line of Sixth street to a point 17 feet west of east line of Fourth street. Accepted and placed on file.

Report of the Chief of Police: Tabulated statement showing the number of men of the force during the year (1907); number of arrests for different crimes; disposition of cases, fines and forfeitures; sundry licenses collected, the cost of feeding the prisoners, the cost of pound. Calls

## YOUNG MAN HAS NEW THEORY

### Human Life Seems Centered In Stomach. All Else Is Secondary.

The immense success which has followed L. T. Cooper during the past year with his new preparation has exceeded anything of the kind ever before witnessed in most of the leading cities where the young man has introduced the medicine. Cooper has a novel theory. He believes that the human stomach is directly responsible for most disease. To quote his own words from an interview upon his arrival in an eastern city: "The average man or woman cannot be sick if the stomach is working properly. To be sure, there are diseases of a virulent nature, such as cancer, tuberculosis, diabetes, etc., which are organic, and are not traceable to the stomach, but even fevers can, in nine cases out of ten, be traced to something taken into the stomach. All of this half-sick, nervous exhaustion that is now so common, is caused by the stomachic conditions, and it is because my remedy will and does regulate the stomach that I am meeting with such success."

digestive apparatus that is doing its full duty, getting every particle of vitality out of all food by transferring it to the bowels in a perfectly digested state—this above all else brings health."

Mr. A. C. Brock, chief of the Brock Restaurant, Market District, Boston, Mass., who is a staunch believer in Mr. Cooper's theory and medicine, has this to say: "I had chronic indigestion for over three years. I suffered terribly, and lost about thirty pounds. I was a physical wreck when I started this Cooper medicine, a month or so ago. Today I am as well as I ever was in my life. I am no longer nervous, my food does not distress me in the least, and I have a splendid appetite. I am gaining flesh very rapidly—in fact, at the rate of a pound a day. I would not believe any medicine on earth could have done for me what this has done. It is a remarkable preparation and Mr. Cooper deserves all his success."

We recommend the Cooper preparations as being remarkable medicines.—Chas. Rogers & Son.

### A WELL ATTENDED MEETING

#### INTEREST SHOWN IN THE WORK OF ASTORIA'S COMMERCIAL BODY—CHAMBER IS GAINING GROUND.

The Chamber of Commerce held its regular meeting last night which was the largest in point of attendance for a long time. Considerable interest was manifested throughout and important matters referred to proper committees with promises of good results. Manager Whyte read a report on various matters that had come before the body which was listened to attentively. In general, the report was as follows:

**The Quarterly Dinner.**  
From time to time the subject of having a quarterly dinner has been mentioned by the members of this organization. Whether or not we determine to carry out this idea at this time, it seems to me that the occasion of the visit here of President Clark and his fellow officials could be made the occasion of a dinner but I would by all means suggest that the number of seats be limited to 50 or 60 as we were entirely too crowded at the last dinner. I think that this quarterly dinner proposition could well be left in the hands of our reception committee, Mayor Wise, chairman. I do not believe anybody has better ideas about such matters than Chairman Wise and the able committeemen who are serving with him.

**The Navy Shooting Range.**  
Since our last meeting Chairman A. R. Cyrus of the special committee on the navy range, Judge C. J. Trenchard of that committee, F. A. Fisher and myself, visited Fort Stevens for the purpose of ascertaining whether or not we could get a shooting range of the proper size for the navy within convenient landing distance, somewhere on the site of the Fort Stevens reservation. We found a site that would be most desirable so far as location is concerned but it is to be measured before we are able to speak authoritatively as to the size, and Colonel White, in charge of the fort, is now preparing the measurements which will be in our hands in a few days. Chairman Cyrus has also written to Secretary Metcalf of the Navy Department, asking for a blueprint of the plans and specifications. One of the questions that we have to decide is what is a convenient distance from ship landing. Chairman Cyrus has also written the Secretary of the Navy asking specific instructions with regard to the meaning of convenient distance from landing.

In case that the present range within the reservation of Fort Stevens is not found to be large enough, Mr. Cyrus' committee will continue a search for other possible sites.

**The Automobile Beachway.**  
Chairman F. A. Fisher of the Good Roads Committee of the Chamber of Commerce together with Judge C. J. Trenchard of the County Court, last week made a personal examination of this end of Clatsop Beach for the purpose of ascertaining the best way to connect a short road with this end of the branch automobile road. Judge Trenchard and the County Court have already had an estimate made of the pile bridge across the mouth of the Necanicum River at Seaside and they will complete this at the earliest possible date.

In case we can complete this automobile beach road in time for the annual bicycle races there is no doubt but what we can pull some of them off on this beach road. We desire furthermore to have a formal opening of this beach road and Chairman F. A. Fisher through your manager has presented to the Pacific Coast Admen's Association, an invitation to visit this beach automobile road and take the first ride over it after it is opened.

I have recently walked over this entire beach at low tide, a distance of 16 miles, and I wish to assure you that it is in every way superior to Palm Beach, Florida, over which I have also walked and ridden several times. I wish to impress upon the members of our Chamber the importance of this automobile road. From an advertising standpoint it is superior to any other movement that could possibly be undertaken. There will be more men of money visit Clatsop County because of this automobile road than there would be because of your railroad or because of any other enterprise that you could possibly undertake and men of money are always good things to have around and you will get more associated press notices out of the completed automobile beach road than you could out of the residence

of your United States Senator or in five business concerns of Astoria. Judge Trenchard is thoroughly familiar with these facts and conditions, so also is F. A. Fisher, Chairman, and they are doing all they can to complete the road by early springing.

**The Chataqua Association.**  
Accompanied by the engineer of the Astoria and Columbia River Railroad, Mr. Habersham, by the Rev. C. L. Owen and Mr. Ben Ward, a real estate man, on Friday last we visited all of the available sites for the Chataqua grounds from Holliday below Seaside to Carnahan. Tomorrow morning we will continue a pedestrian trip from Carnahan to Fort Stevens. As soon as all of the sites have been seen it will be up to the Chataqua Committee to say which one they prefer. As soon as they have chosen a site, the Chamber of Commerce will do all it can towards securing that site for the Chataqua Association. The Chataqua Association desires to hold a lecture course on the grounds this summer. This movement is very important and means that there will be fully 1000 people encamped for two weeks in this Country from all parts of the state, also from Idaho, Montana and Washington. Chataqua people are universally educated people and it is a matter of extreme importance to this country to secure the Association for Clatsop Beach and I am now doing all I can and will say that President Clark and Supt. McGuire of the Rail Road Co. are assisting us in every way.

At the request of Manager John H. Hartog of the Eugene Commercial Club, I offer this resolution for consideration and ask that it be adopted: "Resolved, That the Chamber of Commerce of Astoria hereby puts itself on record as being most heartily in favor of assisting the University of Oregon located at Eugene in every way possible to become the greatest educational institution in the Northwest, that under no consideration does the Astoria Chamber of Commerce believe that the appropriations for the State University made by the Legislature should be reduced. We believe that the State University is in every sense of the word, the school of the people and that any state can only become great as its people advances in the cause of education."

I wish to introduce this resolution and ask that it be adopted: "Resolved, That the Chamber of Commerce of Astoria hereby puts itself on record as favoring the appropriation bills now before Congress providing for the completion of the military defenses at the mouth of the Columbia River, bringing the State of these defenses up to the most modern condition and constructing barracks and quarters at Fort Stevens necessary to properly man these defenses; and that a copy of this resolution be sent to each of our representatives in Congress."

**Lincoln Memorial Park Association.**  
Mr. B. F. Allen, a member of this organization and chairman of the local committee in charge of the movement to secure funds to purchase Lincoln's farm and the home where he was born, desires to call the attention of the members of this organization that any one contributing 25 cents toward the Lincoln Park Association will be given a membership in the Park Association. This is a patriotic movement which deserves the close consideration of all patriotic citizens.

#### Report of the Special Committee on the Port of Astoria.

Astoria, Feb. 17, 1908.  
To the President and Members of the Chamber of Commerce:  
Gentlemen:—Your committee on "Port of Astoria" begs to report progress and requests further time. The legal question has been considered by the lawyers on the committee with no very definite result. On motion of the joint committee of the common council and your committee it was ordered that the chairman of the committee appoint three members and your chairman, making a committee of four to "thrash out" a bill that would stand before the courts and which would be satisfactory to all concerned, and report on the — day of March, A. D. 1908. I have appointed on that committee, A. M. Smith, F. J. Taylor and W. C. Taylor and W. C. Logan. This committee will meet at stated times in the Chamber of Commerce rooms and will be pleased to have suggestions from any one interested in the matter. Yours truly,

G. WINGATE,  
Chairman of Joint Committee, "Port of Astoria."

One of our enterprising and energetic members Mr. MacBeth has presented a new advertising idea. He proposes to have a sign painted like the one you see here before us tonight and placed at 100 of the prominent stations throughout the State

where it can be read. He figures that it will cost about \$350 to have the signs painted and placed and if there is no objection the matter could properly be referred to the promotion committee.

#### Brick and Pottery Manufacturing Proposition.

Mr. Lew Ogan, of Tesla, Cal., who has been in correspondence with this organization for some time is with us this evening and he has a number of samples of what he is able to turn out. We have sent him some samples of shale, coaline and clay. He has tried them and has them with him tonight. He will speak for himself and I will now ask him to do so.

Mr. Ogan gave a very interesting talk on the possibilities of the use of the fine clay that can be found in this section. He has made exhaustive tests of samples secured by him and has looked over the country and finds that Providence has been good to this locality in placing such fine deposits of valuable so easy of access. He said that he thought it up to Astoria to profit by her advantage in that respect. Other sections without the supply of this class of raw material had the enterprises allied to it and that brick were shipped to this coast from the east. Tests have shown that the material is here to produce three distinct colors, and that paving brick, faced brick and terra cotta work can be made from this clay to advantage. He spoke of the very profitable results of one plant with which he was very familiar and of which he had the plans. His remarks were keenly listened to and the whole matter was then referred to the manufacturing committee. Mr. Ogan afterward showed his samples, the results of his tests to various members of the body who became much interested.

Before adjourning a vote of thanks was tendered to Colonel White, of Fort Stevens, for his courtesies and interest in the work of the Chamber.

The resolutions suggested in the report of Mr. Whyte regarding state appropriations for the University of Oregon and favoring appropriations for military defenses at the mouth of the Columbia River were passed unanimously, and the report of the committee on "Port of Astoria" was received as a report of progress and the further time asked for was granted. Two new members, E. A. Coe and J. C. Swope, were admitted and placed on the roll and the resolution introduced at the previous meeting, changing the meeting night to the second and fourth Mondays of the month was passed.

#### TO CURE A COUGH OR COLD.

The following formula is a never failing remedy for coughs or colds:  
Two ounces of glycerine, one-half ounce of Concentrated oil of pine, one-half pint good whiskey, mix and shake thoroughly each time and use in doses of a teaspoonful to a tablespoonful every four hours.

This, if followed up, will cure any cough that is curable or break up an acute cold in twenty-four hours. The ingredients all can be gotten at any drug store.

Concentrated oil of pine comes put up for medicinal uses only in half ounce vials in tin screwtop cases designed to protect it from heat and light. Other oils of pine are insoluble and are likely to produce nausea and cannot give the desired results.

#### For Old Bones.

"Did you say the Rogenses are a very thrifty family?"  
"Indeed I did. You know the skeleton in their closet?"  
"Yes."  
"Well, they have sold it to a medical school."—Harper's Weekly.

#### Next Trial.

"The new Thaw trial will be along different lines."  
"So?"

"Yes; there will be a consistent plot, an intelligible libretto and no interpolated specialties."—Louisville Courier-Journal.

#### Another Name For It.

"Was Mrs. Gabbleton in the witness box this afternoon?" asked the judge's wife.  
"Yes," answered the judge, "but it was more like a chatterbox during the time she occupied it."—Chicago News.

#### This May Interest You

Foley's Honey and Tar cures the most obstinate coughs and expels the cold from the system and it is mildly laxative. It is guaranteed. The genuine is in the yellow package. For sale by T. F. Laurin.

#### Responsibility.

"Has he a proper sense of responsibility?" asked the earnest patriot.  
"I don't know," answered Senator Sorghum. "I sometimes fear he is one of those people who are so anxious to be financially responsible that they forget to be morally responsible."—Washington Star.

## FRANTIC WOMEN

Organic disturbances of the feminine system act like a firebrand on the nerves of women, often driving them fairly frantic.

A nervous, irritable woman is a source of misery not only to herself, but to all those who come under her influence. That such conditions can be entirely overcome by taking

### LYDIA E. PINKHAM'S VEGETABLE COMPOUND

is proven by the following letters.

Mrs. Mary Wood, of Christiana, Tenn., writes to Mrs. Pinkham:

"I had the worst form of female troubles and my nerves were all torn to pieces; sometimes I suffered so much that it seemed as though I could not live."

"I began to take Lydia E. Pinkham's Vegetable Compound and now I feel like a different person. Your medicine is worth its weight in gold, and I cannot say enough for your advice."

Mrs. Wallace Wilson, Thompsonville, Conn., writes to Mrs. Pinkham:

"I was all run down, nervous, and could not rest nights. Doctors failed to help me. Lydia E. Pinkham's Vegetable Compound restored me to perfect health."

### FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, irregularities, periodic pains, backache, etc.

Why don't you try it? Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

### EMILY REED SURVIVORS

(Continued from page 1)

no food nor water since Thursday. Mate Dubie says that When the Reed struck the bark immediately broke up. The swirling water prevented the four men from getting aft to where the captain was and it broke up all but one life boat. The men jumped into this and cut the lashings but before they had completed this they were carried by a sea clear of the decks. They were swept toward the stern and as they passed some one threw them a rope but it fell short. Only one oar was left in the boat and that was a broken one. They tried to work back but the undertow carried them out to sea. They then set their course northward hoping to fall in the path of some of the steamships.

On Sunday they sighted a steamer at 2 o'clock in the morning. She stopped and they hoped for rescue, but she soon got under way again. The cook gave up then and a few minutes later died. At about 7 o'clock on Sunday morning they sighted Tatoosh Light. The weakened men could not manage the boat very well but by the afternoon had got it headed for Neah Bay. The mate says that Sunday was the worst day they experienced. They continually saw all sorts of vessels but all were too far away to observe the unfortunates.

### PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

### Better Than He Knew.

The hour had come for the language lesson in a government Indian school. Among the words on the board to be put into sentences was the word "singular." The teacher explained that it meant queer, peculiar, odd, uncommon. Tommie Stewart, a half breed Crow Indian, twelve years old, produced a result of diligent labor, showing a bit of humor in his makeup and keen observation as far as the Indians were concerned, at least. He wrote the following sentence:  
"If a man have no wife he is singular."—Harper's Weekly.
