ASTORIA'S NEW ENTERPRISE

HIGH-CLASS CLAY PRODUCT PLANT TO BE ESTABLISHED WITHIN THE CITY LIMITS—TESTS MADE AND PRODUCT CAN BE SEEN AT THE ROOMS OF THE CHAMBER OF COMMERCE.

Astorian is to have a new industry at once that bids fair to place her among the foremost manufacturing cities of the Northwest—a modern high class clay product plant which will be in time equal if not superior to any enterprise of its kind on the coast.

The general reader perhaps, may be a little skeptical as to the claims made by the promoters of this enterprise for you have not yet had the opportunity to see the results of the test work that has been made under the auspices of the Chamber of Commerce. Those who are interested in this matter are kindly urged to be present at the meeting of the Chamber of Commerce tomorrow night.

At this meeting will be exhibited various clay products made from your own clays as follows: Drain tile, possessing unique qualities, not only for drain tile but for a type of clays used in the manufacture of unglazed earthenware flower pots and kindred clay products.

Brick of all kinds including face brick, paving brick and common builders will be exhibited and other various characteristics discussed from a scientific and commercial standpoint for the last 25 years trying to get

The artistic qualities of these brick brick plant. It has recently demon-

strated beyond a reasonable doubt that you have the material in abundance. It is now up to the interested citizens, if they desire this industry here, to further encourage the project to a successful termination by their financial support.

Capital has been offered from outsiders but if they get control of the industry its location might be a serious proposition to the welfare of the city of Astoria. It is presumed that Astorians want the industry and its monthly payroll. Now is the time for action and to get in on the ground floor, as you will receive first consideration at all times. Hence, it evidently is advisable for the home people to take the lead in this assured enterprise.

It should be the policy of the company to stick close to manufacturing lines and other mercantile interests supply the various wants of its employees. Live and let live should be the motto. Patronize first those who patronize the enterprise, in "honor preferring one another." You will not be slighted but given a fair show to go in with your eyes open.

You will not be asked for much—\$15,000 will finance this proposition for a dry-press brick plant with a daily capacity of from 14,000 to 15,000 brick. You will be asked to subscribe for stock at \$100 per share to be paid in full when the proper amount is fully subscribed. No stock gambling scheme, but straightforward square dealing on honest business principle is what is wanted to build a plan tright to run right.

Incorporation under the laws of the State for the above amount will safely start the enterprise. Articles of incorporation can provide for an extension of the plant when necessary without further legal proceedings. When stock is subscribed to warrant going ahead, directors will be chosen by the stockholders who will manage the enterprise. The element of non-productive capital and idle equipment will at all times be avoided as much as possible.

In this connection those who wish to further investigate as to the standing and character of the party doing the test work and promoting the enterprise will find on file with the manager of the Chamber of Commerce, J. H. Whyte, a dozen recommendations which you are invited to look into.

Some are from bankers, large business houses, professors of colleges, preachers, editors, attorneys at law, brick factories, and note in particular the one from the general manager of the street railways of Oakland, Cal.

These recommendations are from parties in the East and in the West. Note also the further qualifications of a college degree of bachelor of science which speak for itself.

To build a plant to manufacture both face building and paving brick, would require more capital than the above mentioned sum. It would mean the manufacture of brick by both the dry-press and stiff mud process. The latter process however, requires an extensive and expensive system of drying the products of the waste heat plan from hot kilns.

But when the dry-press process is once installed and operated successfully circumstances will doubtless warrant in a short time the extension of the plant to not only include paving brick but terra cotta, drain tile and other clay products as ornaments, flower pots, etc.

"One Touch of Nature Makes the Whole World Kin."

When a rooster finds a big fat worm he calls all the hens in the farm yard to come and share it. A similar trait of human nature is to be observed when a man discovers something exceptionally good—he wants all his friends and neighbors to share the benefits of his discovery. This is the touch of nature that makes the whole world kin. This explains why people who have been cured by Chamberlain's Cough Remedy write letters to the manufacturers for publication, that others similarly ailing may also use it and obtain relief. Behind every one of these letters is a warm-hearted wish of the writer to be of use to some one else. This remedy is for sale by Frank Hart and leading druggists.

TEA

Moneyback means that the tea is good and well worth the money.

Can't mean anything else.

Your grocer returns your money if you don't like the Schilling's Best; we pay him

At Greenwood Tomorrow—

All that was mortal of the late Edward H. Utzinger arrived in this, his home city on yesterday's noon express from Portland. The remains were accompanied by Miss Marie Utzinger and Albert Utzinger, the brother and sister of the lamented young Astorian. The casket was met at the train by the family and a group of devoted friends and escorted to the home now bereft. The funeral will transpire tomorrow, Monday, at 1 o'clock, at Grace Episcopal Church, and interment will be had at Greenwood; the pallbearers being Messrs. Henry Scheef, Chris Simonson, Arthur Grimberg, Arthur Berry, Chester Ellsworth and Hans Frederickson.

NEW TO-DAY

Just Opened.

First-class Dressmaking and Ladies' Tailoring. Mrs. McLeland, 159 Ninth street.

The Commercial.

One of the coziest and most popular resorts in the city is the Commercial. A new billiard room, a pleasant sitting room and handsome fixtures all go to make an agreeable meeting place for gentlemen, there to discuss the topics of the day, play a game of billiards and enjoy the fine refreshments served there. The best of goods are only handled, and this fact being so well known, a large business is done at the Commercial, on Commercial street, near Eleventh.

"Modern" Delights.

When a man passes under the hands of a barber he wants the best skilled treatment to be had in that line. In Astoria, the man in search of such manipulation, goes direct to Petersen's "Modern" shop, at 572 Commercial, and gets it in any of the six chairs maintained.

The very best board to be obtained in the city is at "The Occident Hotel." Rates very reasonable.

does not wane as time progresses. The system used, that of furnishing the finest the market affords, and all can be obtained, in Astoria, is a plan that will always win, coupled as it is with the best of cooking and prompt service. A common saying nowadays is "Get the Palace habit."

The Clean Man.

The man who delights in personal cleanliness, and enjoys his shave, shampoo, haircut, and bath, in Astoria, always goes to the Occident barber shop for these things—and gets them at their best.

GOOD WOOD.

If you want a good load of fir wood or box wood ring up KELLY the WOOD DEALER,

The man who keeps the PRICES DOWN.
