

Barrington Hall The Steel Cut Coffee

Is just pure Mocha and Java prepared in a new way. The coffee berry is cut up (not ground) by knives of almost razor sharpness into small uniform particles. Thus it is not crushed, as by the old method of grinding, and the little oil cells remain unbroken. The essential oil (food product) cannot evaporate and is preserved indefinitely. This is one reason why a pound of Barrington Hall will make 15 to 20 cups more of full strength coffee than will any coffee ground the old way; why it excels all other coffee in flavor and why it will keep perfectly until used.

But the main thing about Barrington Hall Coffee is that it can be used without ill effect by those who find ordinary coffee injures them, because the yellow tannin-bearing skin and dust (the only injurious properties of coffee) are removed by the "steel-cut" process. A delicious coffee not a tasteless substitute.

MYSTERY CLEARED.

KANSAS CITY, April 21.—All mystery surrounding Mrs. Marie Louisa Hunt, the elderly woman whose negotiations for securities and realty has been puzzling the local bankers and police, was cleared today when the police received a telephone message from Frank C. Hunt her son, a mining engineer at Galena, Kan. Mr. Hunt telephoned the police that the woman was his mother. He asked them to hold her, and that he would come to Kansas City to take care of Mrs. Hunt.

In his talk with the police, Mr. Hunt said that the woman had visited in Yuma, Ariz., where she had a relative named Clymer, but had never been in Los Angeles, as she claims. MYSTERY IS SOLVED

Bones are the Remains of a Party of Englishmen.

TABLET IN AN OLD CHURCH

The Graves Were Discovered by Accident the Other Day While Workmen Were Excavating For a Foundation For a Gun Mount.

NEW YORK, April 21.—The mystery of the unmarked grave containing a number of skeletons, found the other day at Hancock, on Sandy Hook, seems to have been solved. It is now believed that the bones are the remains of a party of Englishmen who were cast away on Sanday Hook in 1783 and buried where their frozen bodies were found. The graves were discovered by accident the other day while men were excavating for the foundations for new gun mounts which are to be placed in the fort which is one of those designed to protect New York harbor.

The support solution to the mystery is found in the inscription on the tablet on the sacristy of Old Trinity Church. The inscription is as follows:

"At Sandy Hook lie interred (The bones of) the Honourable Hamilton Douglas Hallyburn, son of Sholto Charles, Earl of Morton and heir of the ancient family of Hallyburton, of Pitcur, in Scotland, who perished on the coast with twelve more young gentlemen and one common seaman in the spirited discharge of duty on the 30th or 31st of December, 1783. Born on the 10th of October, 1763. A youth, who possessed a vast fortune, served in the British army with a manly courage and seemed to deserve a better fate. This plain monumental stone is erected by his unhappy mother, Katherine, Countess Dowager of Morton, to his dear memory and that of his unfortunate companion James Champion, Lieut. of Marines; Alexander Johnson, Geo Paddy, Robert Haywood, Midshipman; Charles Gascoigne, Andrew Hamilton, Wm. Scott, David Reddie, Wm. Tomlinson, Wm. Wood, Young gentlemen; George Towers, common seaman. Castaway, all found dead and frozen and buried in one grave."

MUD PIES.

May Save the Lives of Three Men Accused of Murder.

CHICAGO, April 21.—A mud pie may save the lives of three men who are being tried for murder in Judge Chitrau's court.

Upon the proof that Samuel Divorken, the slanna, once beat a little girl because she made a mud pie near a building which he was watching depends the substantiation of the defense's assertion that he was of a violent temper. They claim that he engaged in a fight with Arthur Chambers, Fred Bastine and Arthur Pyre-card because he was angry and thus met his death. It was his uncontrollable temper, they say, that led him into the combat.

One year ago, Divorken was stoned and kicked to death while watching a building in Loomis street. Several children, one of whom is a sister of Divorken, have been subpoenaed and their testimony will be introduced to prove that Divorken brought his death upon himself.

Hanging is the penalty asked by the state.

TEN STOWAWAY ON BOAT.

NEW YORK, April 21.—What comes pretty near being the record for stowaways is held by the United Fruit Steamer Norwich, which has arrived here with ten more passengers than her officers knew she had aboard when left Port Antonio Wednesday.

The day after the vessel sailed, three faces peered cautiously over the edge of the after hatch. Their owners proved to be Jamaican negroes and they were hurried to the poop for safe keeping. On Friday the watch captured two more and Saturday four more crawled out from among the banana bunches which made up the steamer's legitimate cargo. Another appeared Sunday. The men are now being conditioned after their period of confinement and scanty diet preparatory to being sent back to Jamaica on the return trip of the Norwich.

LOCAL OPTION LOSES.

CHICAGO, April 21.—The saloon forces were generally successful in the 40 or more towns and villages in Illinois which voted on the local option question today. In the larger communities almost without exception they voted to retain their dramshops.

PLENTY OF ROOM.

CHICAGO, April 21.—The hotel keepers of Chicago promise that every visitor to the Republican National Convention in June will be well taken care of. Wonderful Paraffin.

Paraffin was at first a useless by-product of the oil refineries, but has now a thousand uses. Besides the use of paraffin for candles, 2,000,000 blocks of refined paraffin are sold every year for an infinity of purposes. A liberal arrangement with a chewing gum maker gave him the foundation for a million dollar fortune. Paraffin was applied to Cleopatra's needle in Central park, New York, when the surface of the obelisk began to scale off, and it stopped it. Stone fronts of houses are protected the same way, an application every three or four years being sufficient to prevent disintegration. Paraffin is made into colored crayons which will stick on glass as well as paper. Paraffin is used in laundries to whiten the clothes and in polishes, the surface of starched pieces. It is used for sealing canned fruits or any thing put up in bottles by home folk, manufacturers, druggists or chemists. It is used generally as a substitute for beeswax, tallow and sealing wax and for insulating wires.
