

FOUR EXPEDITIONS

American Museum of Natural History Sending Them Out

PALEONTOLOGICAL SPECIMENS

One Party Will Go to the Montana Fields to Search for a Specimen of the Horned Dinosaur—No Complete Specimen of Which is Found.

NEW YORK, April 28.—Preparations are being made at the American Museum of Natural History to send out four expeditions into as many states in the west in search of Paleontological specimens.

At the head of the first party are Dr. W. D. Mathew and Albert Thomson. They will go to Nebraska where they will confine their investigations to the ancestry of Mammals, such as three toed horses.

The second party goes to Wyoming for an investigation of the deposits of the Cenozoic period which is placed some two million years in the calendar of the scientists.

The third party, by going to Montana will get into a period of the history of the world which is two million years behind the Eocene period, or a matter of four million from the present time.

Barnum Brown of the Museum will head this party and their search will be directed especially toward finding in the Montana fields the horned Dinosaur, no complete specimen of which is found.
