FOR MUSIC CENTER DYNAMITE BUILDING

Lillian Nordica to Establish a Great Institution

Chicago Police Troubled With Bomb Throwers

IS A WORTHY UNDERTAKING

WAR AMONG THE GAMBLERS

Will Establish Musical Institution Similar in Every Respect to the Magnificent Festival House at Bayreuth, Founded by Richard Wagner

The Explosion Shatters Windows But Nobody Hurt—Fifteen Cases of This Kind During the Last Year Without a Clue.

NEW YORK, July 9.—Active work has begun on the plans for the administration building of the Lillian Nordica festival house to be erected by the singer at Harmon on the Hudson. This is the first of the group of the handsome and artistic buildings that fostered by the prima donna and three men and women of wealth and society, who are to make up the board of managers and patrons, will go to make up a musical institution similar in every respect to the Wagner festival house in Bayreuth, Bavaria, founded by the late Richard Wagner.

CHICAGO, July 9.—Terror was caused in the Chicago Automobile Club and in three five-cent theaters last night by the explosion of a bomb in the rear of 260 State Street. The six story building of No. 260 State St. is where the two men, leaders of one faction of Chicago gamblers, have their offices and the bomb was set off, apparently by the person who has been responsible for the "dynamite war" among gamblers.

As soon as the administration building at Harmon is completed, Madame Nordica will open it as an headquarters from which the work on the building will be directed by an executive staff now being gathered for the preliminary work in connection with the practical construction of the opera house and the buildings to be devoted to the teaching of music and voice culture.

The explosion broke every window in the rear of the first floor of the State Street building. Members of the automobile club, which is directly in the rear, facing the Plymouth Court, though a gasoline tank had exploded and fled from their building. Audiences numbering several hundred persons in the nickel theaters located in the same block where the explosion occurred made a hasty exit.

The building will be grouped in a semi-circle at the very top of a high hill while ample space has been reserved for a dormitory for both men and women as well as a club house which will be an elaborate feature of the musical colony.

In the hotels in the block similar conditions existed. Guests fled into the street and it was some time before they could be induced to return to their rooms.

SENATOR FULTON SAYS HE'S NOT AFTER MR. CAKE

PORTLAND, July 9.—The Telegram tonight says: So far as he is concerned, Senator Charles W. Fulton is not participating in any effort to have someone other than State Chairman W. M. Cake conduct the Taft campaign in the Fall. Also, he resents the manner in which his name has been used in this connection.

The police were unable to find any trace of dynamite or powder. The order of the burned gunpowder, however, gave a clue to the cause.

Last winter there were no less than fifteen similar explosions close to buildings occupied or owned by the different gambling interests of Chicago. The police have never been able to find the parties responsible.

"I wish it distinctly understood," declared the Senator this morning, "that I have had nothing to do with the reported movement to unseat Mr. Cake during the campaign. My name has been used and it is said that I am instrumental in an effort to remove Mr. Cake. This is false. I have no knowledge of such a move, and I do not know who has been using my name in the matter. It is unjust to Mr. Cake and to myself.

WATER MEN MEET

Underground Water Supply Decreasing Owing To Waste.

CHICAGO, July 9.—A despatch to the Tribune from Indianapolis, Ind., says: At a meeting here yesterday of representatives of water plants owned privately and by municipalities and attended by state health officers, Marshall O. Leighton of the United States Geological Survey, discussed the decreasing underground water supply.

"I do not see why there should be occasion to have a new campaign manager. I would be satisfied and content to have Mr. Cake continue as chairman and conduct the campaign. How did the story start, anyway? I have been unable to run it down, and all I know is what I have read in the press. We want an active manager in this coming presidential contest, and Mr. Cake is an active man.

In Chicago the first artesian well was drilled in 1864, and the water rose eighty feet above the surface, or three feet above Lake Michigan. The flow has long since ceased, until now, the water stands fifteen or twenty feet below the surface. Mr. Leighton assigned the following causes for the decline of the underground water supply:

"But kindly make this emphatic," continued the Senator, "that I have never at any time undertaken, instigated or desired to have Mr. Cake supplanted by anyone else, and that my name in this connection has been used without my permission, consent or knowledge. My name has literally been dragged in, why I do not know."

Waste of water, surface draining by ditching for cultivation, over development of underground waters and deforestation.

TO DEPORT INDIANS

HELENA, Mont., July 9.—Governor Norris yesterday addressed a letter to the Commissioner of Indian Affairs at Ottawa, relative to the deportation of a large band of Cree Indians who, while Canadian charges, have been roaming throughout this state. The Indians participated in the Riel rebellion and with its suppression came to Montana. The State Department arranged with Canada for their return but soon after dissatisfied with conditions in the north they returned to this state and now are at the point of starvation. Hence the letter to learn if the original allotments are still available. A number of Indians have agreed to return.

AFTER THE MURDERERS

Sheriff And Posse Start Out After Montenegrins In Montana Wilds.

MISSOULA, Mont., July 9.—Sheriff H. B. Campbell and a large force of deputies, heavily armed with repeating rifles, will leave for Taft, today to take up a new trail of the Montenegrins who last Sunday murdered Holmes Hayes at the west end of the St. Paul Railroad tunnel. One of the five men who committed the crime was brought to the county jail in Missoula to prevent a lynching by the infuriated Americans at the big railroad camps. His name is Nicholas Perimige.

LONE ROBBER'S WORK.

SPOKANE, July 9.—A lone highwayman attempted to hold up the west-bound passenger train on the Great Northern near Naples, Idaho, at 2:30 o'clock this afternoon. He got nothing but escaped after exchanging several shots with the crew and passengers of the train. It is thought he was hit and he was seen to fall just before entering the brush a short distance from the train.

NO CHOLERA THERE

MANILA, July 10.—Gov. Gen. Smith has appointed a new insular commission and confirmed the appointment of Ignacio Villamer to be attorney general to succeed Gregorio Araueta, G. R. Harvey to be solicitor general, the office having heretofore been vacant, and Isidoro Paredes to be judge of the First Instance, to succeed Newton W. Gilbert.

 Search for further supposed victims will go on to-day.

FIREPROFF BRICK IMPRACTICABLE

In the reports of the recent great conflagrations such as overwhelmed Baltimore and San Francisco, and in the investigations of detached fires, it is found that brick is an excellent fireproof material, says a writer in the fireproofing number of Cement Age, New York. If it were practicable to construct a building with walls, floors, partitions and roof of brick, and with weight carrying members encased in courses of brick laid in cement mortar, the result would possibly be a fireproof structure. It is not practicable, however, for reasons that are manifest. The use of brick in certain construction means loss of floor space. In the walls it means loss of light. In brief, it is both cumbersome and costly as a structural material to use brick. A substitute possessing all its virtues as a fireproof material, something vastly more economical and quite as durable, is found in concrete. Concrete means conservation of space, increased lighting facilities, low cost, absolute resistance to fire and water, rapid construction, which in turn means economy for labor as well as material; great rigidity and the ability to withstand earthquake as well as fire. It is adaptable for foundations, walls, floors, window girders, beams, roofs, doors, window frames and stairway. From the foundation to the peak of roof or top of tall chimney, a building may be constructed entirely of concrete.

ASTORIA'S ANNUAL REGATTA

COMMITTEE MET LAST NIGHT, AND DISCUSS MANY IMPORTANT ISSUES CONNECTED WITH THE COMING REGATTA

From the business transacted at the meeting of the committee for the 14th annual regatta last night, the indications are that this year's water festival will undoubtedly be the best in the history of Astoria.

Contract has been entered into between the committee and Mr. Arnold, the well known carnival manager and all-around show man, who has managed the concessions every year for the regattas here, to again furnish all the land attractions. Mr. Arnold will furnish three free attractions every day, which will include a balloon ascension and a slack wire performer. But the feature act of the daily free shows will be what is called a "Slide for life." A wire will be fastened from some high point in the city and a man will slide down, a distance of 300 feet, hanging by his teeth, with his body decorated with American flags which will float behind him, while making his swiftly descending trip.

Ed. O. Gloss, the captain of the Portland Rowing Club, who is well known here as having taken an active part in the water events of the previous regattas, was in town yesterday and attended the meeting last night, Mr. Gloss made a proposition, in regard to the water sports, which the committee considered very fair and are considering, and in all

probability will accept, and if they do, all the water event will be under the management of Mr. Gloss, who can arrange an excellent program. The feature event would be a single oar race for the championship of the Pacific Coast, between himself and Donaldson, the crack oarsman of Victoria, British Columbia.

In view of the fact that the saengerfest of the last regatta was such a decided success, the committee has accepted Professor Enna's proposition and will have the Norwegian and Swedish organizations down for two performances at the Astoria Theatre, namely, a Saturday afternoon and a Sunday evening performance, of regatta week.

Mr. Staples was appointed a committee of one to endeavor to interest the loggers in this community to enter into a log-rolling contest. The subscription committee will start out Monday morning at 10 o'clock to raise funds.

DIARRHOEA

There is no need of anyone suffering long with this disease, for to effect a quick cure it is only necessary to take a few doses of

Chamberlain's Colic, Cholera and Diarrhoea Remedy

In fact, in most cases one dose is sufficient. It never fails and can be relied upon in the most severe and dangerous cases. It is equally valuable for children and is the means of saving the lives of many children each year.

In the world's history no medicine has ever met with greater success.

PRICE 25c. LARGE SIZE 50c.
