QUIET ON ASTORIA'S WATERFRONT

STEAMSHIP SARK LEAVES OUT FOR AUSTRALIA—FENWICK'S BIG LINE OF DUTY—PANAMA OFF FOR COOS.

The Norwegian steamship, lumber laden for Port Pirie, Australia, yesterday evening sailed outward. Her master had assumed to stand for certain things in a business way and stoutly refused to accede to anything not entirely consonant with his views of the situation, but when he discovered that he could not clear at the custom house without the formal "clearance" of his agents here, and that his contumacy was likely to cost his owners several hundred dollars a day, he gave in to the charterers, and went on his way as all good masters do.

The Hammond Lumber Company's fine steamer Geo. W. Fenwick, now at the company's mill docks in this port, will take on a million feet of lumber here, and then proceed to Gray's Harbor to finish loading; after which she returns to the Columbia river for one of the company's huge log-rafts, which she will tow to, and deliver at, San Francisco, going thence to San Pedro with her cargo and discharge. This would indicate that the Fenwick is a powerful and useful craft in all ways.

The steamship City of Panama was one of the early get-aways from this port yesterday morning, leaving out for Coos. Among her passengers was Tom Huden, one of Astoria's active young marine engineers, who goes to Coos Bay to accept a good position on one of the many fine launches in that harbor.

The steamer Sue H. Elmore will sail from the O. R. & N. docks at high noon tomorrow for Tillamook Bay points. Among her passengers will be Alta Geisy, the well known

TEA

Linger longer over it; let it be steaming hot from the earthen pot; and the loveliest woman pour it.

known insurance man, of Portland, who goes out on a summer visit with his brother, John Geisey, at Bay City.

The steamship Melville Dollar entered this port yesterday morning, with part cargo from Seattle and Tacoma, having 40,000 sacks of flour from each of the Sound ports. She went on to Portland without delay and will finish loading there, for the Orient.

The Simpson schooner Virginia has finished loading at the Columbia mills, at Knappton and will clear for Molendo, Peru, today. She will be followed at the mill docks by the Mabel Gale and the Gale by the steamship Boveric, on the quickest possible order of despatch.

The steamship Geo. W. Elder will sail for her California ports from the Callender docks at 5 o'clock this morning.

The steamship State of California will depart for San Francisco at 4 o'clock tomorrow afternoon from the O. R. & N. piers here.

BACK TO JAPAN.

Japanese Of New York Tender Minister O'Brien A Luncheon.

NEW YORK, Aug. 6.—Thomas J. O'Brien, United States minister to Japan, who sails for that country on August 12, will be tendered a luncheon by the Japanese society of New York next Tuesday. Invitations have been sent to about 200, including President Roosevelt, the members of all the legations at Washington and many prominent army and navy officers and government officials. Mr. O'Brien was formerly minister to Denmark and was sent to Japan a year ago. He has recently been visiting his home and the reception and luncheon will be in the nature of a farewell.

SERIOUS CHICAGO STRIKE.

CHICAGO, Aug. 6.—Unless a settlement is made today the strike of electrical workers in the West Park system may involve 3,000 park employees affiliated with the Associated Building Trades. Indorsement of the strike was voted by the building trades workers employed by the west parkboard. Should the threat be carried out, all new construction and improvement work now under way in the West side parks will be tied up. In addition to that the parks will be in darkness until lamp men and other electrical workers are obtained by the park commissioners.

FOR GREAT SCHOOL MENDED WITH NAIL

Mrs. Russel Sage Has Very Important Plan

FOR WEST POINT TRAINING

Would Establish Training School in Military Branches and to That End May Buy an Island in the Hudson River, it is Said.

NEW YORK, Aug. 6.—It is learned from friends of Mrs. Russell Sage that she is thinking seriously of purchasing Constitutional Island in the upper Hudson opposite West Point, and presenting it to the United States government as a site on which to erect the world's greatest military preparatory school, a school that will be to West Point what Eton is to Oxford and Lawrenceville is to Princeton.

She is very much in earnest about this project. She will send a representative to West Point within a few days to look into the matter and put her in possession of all the facts concerning Constitutional island, the attitude of the West Point authorities toward the idea and whether congress is likely to give its sanction in the event of Mrs. Sage obtaining title to the property. Mrs. Sage would like to give to West Point a preparatory school, it is said, where boys, particularly those from remote places where the public schools are not the best, can receive the preparatory education necessary to pass the rigid examination required of all candidates for cadetships at the United States military academy. In recent years the percentage of cadets who have been lost to the army as a result of their inability to pass the West Point entrance examinations has been very large particularly in the mathematical branches. It is to remedy this that Col. Scott, Superintendent at West Point and the higher officials of the war department are anxious to acquire Constitutional island and utilize it for a training school for West Point cadets. President Roosevelt is said to be in favor of the plan to establish such a school and it is certain that even if Mrs. Sage does not present the island to the government a determined effort will be made in the next congress to get an appropriation.

Whether Mrs. Sage is considering also the advisability of giving the money with which to build such a school the friend who told of the Constitutional island plan said he did not know.

KENTUCKY BLAZE.

MIDWAY, Ky., Aug. 6.—This town, half way between Lexington and Frankfort, was the scene of a fire that for a time threatened the town with destruction last night. The fire, which is believed to have been of incendiary origin destroyed five warehouses of the S. J. Greenbaum distilling company entailing a loss estimated at \$300,000. The amount of insurance is not known but it is believed the loss is amply covered. The flames, caused by the burning of the 47,000 barrels of whisky which turned a creek nearby into a fiery stream, could be seen for ten miles. The flames, as they coursed down the surface of the creek destroyed the Southern railroad trestle and half a dozen negro cabins.

EXCITEMENT IS FEVERISH.

Antipodeans Are Preparing Great Welcome For American Fleet.

AUCKLAND, Aug. 6.—The excitement in Australia grows feverish as the Atlantic battle ship fleet draws near. Workmen are engaged in completing the decorations and the illumination and the water front of the town presents a fine spectacle.

Everywhere are the intertwined flags of the United States and England and everywhere Americans and Britishers are fraternizing. The government buildings will present a perfect blaze of light, arranged to depict the fighting top of a battleship. The fleet is expected to arrive Sunday morning.

TOKIO, Aug. 6.—The exchange of conventions relating to the trademark and copyright treaty between Japan and the United States took place today.

Surgeons Use Novel Method to Set Broken Arm

DRIVEN IN WITH HAMMER

Bones of a Bad Fracture Wouldn't Set, so Hospital Surgeons Prepare a Nail and Drive it in to Hold the Bones in Place.

NEW YORK, Aug. 6.—Mending a broken arm with a nail is the extraordinary feat in surgery which has just been performed successfully by Harlem hospital surgeons. It was a plan resorted to after usual methods had failed and when the case seemed to be hopeless. Now the limb operated upon is as sound as ever it was. Charles Nelson, 15 years old, was injured in a car wreck. He sustained a severe fracture, which caused one bone to lap over another. He was taken to the Harlem hospital and the arm put in a splint but the bones did not set. Thereupon the surgeons resolved upon the novel method of treatment. The lad was put under the influence of ether, and an incision was made in the arm just above the wrist joint. What is called the shaft of the bone was pried open and the two overlapping bones were set together. Meanwhile a steel nail about an inch and a half long had been carefully sterilized and medicated. A vice of cotton and other material was made for the arm and with an ordinary hammer the nail was driven into the arm, piecing both bones in much the same fashion as two boards would be fastened together. The splints were then replaced.

Nelson returned to the hospital yesterday and it was found that his arm was as strong as it had been before the accident. A few minutes later the boy was playing ball in the street.
