NOTICE OF PUBLICATION

Notice is hereby given that the State Land Board of the State of Oregon, will sell to the highest bidder, at its office in the Capitol Building at Salem, Oregon, on November 27th, 1908, at 2 o'clock P. M. of said day, all the State's interest in the tide and overflow lands hereinafter described, giving, however, to the owner or owners of any lands abutting or fronting on such tide and overflow lands, the preference right to purchase said tide and overflow lands at the highest price offered, provided such offer is made in good faith; and also provided that the land will not be sold nor any offer accepted for less than \$5.00 per acre, the Board reserving the right to reject and annul bids. Said lands are situated in Clatsop County, Oregon and described as follows:

Tide lands fronting or abutting upon a portion of the N. A. Eberman D. L. C., on the right bank of Skipanon Creek in S. E. 1/4 of Section 21, T. 8 N. R. 10 W. of W. M., beginning at the M. C. between sections 21 and 28, T. 8 N. R. 10 W., S. 89 deg. 53 min. W. 13.19 ch. from the corner to Sections 21, 22, 27 and 28; thence down right bank of Skipanon Creek N. 45 deg. 56 min. W.; 251.4 feet, along high tide line.

N. 15 deg. 38 min. W.; 201.6 feet, along high tide line.

N. 29 deg. 38 min. W.; 345.7 feet, along high tide line.

N. 28 deg. 33 min. W.; 205.2 feet, along high tide line.

N. 27 deg. 9 min. W.; 343.8 feet, along high tide line.

N. 10 deg. 30 min. W. 183.4 feet, along high tide line.

N. 20 deg. 45 min. E.; 131.2 feet, along high tide line.

N. 47 deg. 39 min. E.; 288.8 feet, along high tide line.

N. 25 deg. 6 min. E. 140.3 feet, along high tide line.

N. 8 deg. 22 min. E.; 138.0 feet, along high tide line.

N. 22 deg. 30 min. E.; 86.2 feet, along high tide line.

N. 64 deg. 4 min. E.; 140.0 feet, along high tide line.

S. 44 deg. 37 min. E.; 226.0 feet, along high tide line.

N. 80 deg. 51 min. E.; 215.3 feet, along high tide line.

North 160.0 feet, to low-tide line of creek.

N. 88 deg. 3 min. W.; 371.4 feet, along low-tide line up creek.

S. 61 deg. 13 min. W.; 94.0 feet, along low-tide line up creek.

S. 42 deg. 34 min. W.; 63.8 feet, along low-tide line up creek.

S. 28 deg. 4 min. W.; 17.0 feet, along low-tide line up creek.

S. 30 deg. 44 min. W.; 45.2 feet, along low-tide line up creek.

S. 13 deg. 36 min. W.; 41.8 feet, along low-tide line up creek.

S. 17 deg. 08 min. W.; 142.9 feet, along low-tide line up creek.

S. 39 deg. 27 min. W.; 164.5 feet, along low-tide line up creek.

S. 55 deg. 53 min. W.; 239.8 feet, along low-tide line up creek.

S. 11 deg. 16 min. W.; 186.4 feet, along low-tide line up creek.

S. 20 deg. 46 min. E.; 192.9 feet, along low-tide line up creek.

S. 27 deg. E.; 343.3 feet along low-tide line up creek.

S. 29 deg. 41 min. E.; 268.9 feet, along low-tide line up creek.

S. 29 deg. 10 min. E.; 223.3 feet, along low-tide line up creek.

S. 35 deg. 45 min. E.; 214.2 feet, along low-tide line up creek.

S. 89 deg. 10 min. E.; 72.5 feet, to point of beginning.

Containing 326 acres of tide land. Applications and bids should be addressed to G. G. Brown, Clerk State Land Board, Salem, Oregon, and marked "Application and bid to purchase tide lands."

G. G. BROWN, Clerk State Land Board Dated this September 26th, 1908.

WORK OF THE BEAVER

Feats Performed by This Industrious Little Worker.

A CLEVER HOUSE BUILDER.

He is Capable of Constructing a Dwelling as Large, Though Not So High, as a Small Haystack, and He Can Cut Down Big Trees With His Teeth.

Almost every one knows something about the beaver and that it builds dams and houses to dwell in, but very few people have seen beavers in their wild state. It is also a fact that the race of industrious little workers is rapidly disappearing. In the older districts beavers generally live in the banks of the streams they inhabit, and the sight of a beaver house is uncommon.

Where beavers do build houses, says Forest and Stream, the structures differ greatly in size, shape and location. Some are as large, though of course less high, than a small haystack; others are hardly more than six feet through at the base. They may stand either wholly on land or partly in the water and partly on the bank or wholly in the water.

They are never placed in very deep water, for a base must be built for the house to stand on reaching up to the surface, since the chamber inhabited by the occupants must be dry.

The shape of these houses on the shore approaches the conical. Those in the water are more irregular, sometimes only rounded, at others long and rather flat on top.

Within each house and connected with the water by a concealed passage through which the beavers pass to and fro is the chamber which is the animals' dwelling place.

It is large enough to contain seven or eight of them and high enough so that a beaver can conveniently sit up on his haunches. It is warm, dry and clean, for the beaver is extremely neat in all his habits.

The food of the beaver consists chiefly of the green bark of twigs and young limbs of various trees. Cottonwood bark is preferred; then comes willow, then alder, but the bark of almost any tree may be eaten.

I have known them to eat pine and white cedar. The beaver often cuts down trees of very considerable size to get at the smaller limbs, which they eat.

I have seen cottonwoods twenty inches in diameter so cut, and once on Vancouver island I found a cedar two and one-half feet through which they had gnawed down.

The work of cutting down a large tree is done by a single animal. I have seen the beaver engaged in the operation, which is as follows: The beaver sits up on his haunches facing the tree and with its fore paws resting against it. With its head turned on one side he cuts a groove above and then one below and bites out the chin, taking it off in almost the same way an axman would.

He then saves himself the trouble of gnawing all the wood up into fine cuttings. When the tree is felled the whole community attack and cut up the tender limbs, carrying them away to the cache.

Unlike many of our gnawing animals, the beaver does not sleep through the winter. He remains active, often venturing abroad during the whole of the cold weather. He must, therefore, have food, and a large part of the summer and autumn is devoted to securing this food and depositing it in caches. This food consists of the limbs and twigs of the trees most preferred by the beaver.

They are cut from one and a half to three feet long, stripped of their leaves and smaller twigs, carried to the water and floated to the cache, where they are sunk. And here comes a very curious point.

These sticks are floated to the cache and are sunk by the beaver to the bottom of the water, where they remain without any apparent anchorage. They are not stuck in the mud of the bottom or held down by weights. If you lift one to the surface it will float, but you may move it about on the bottom without its rising.

I have myself tried this with sticks from which the bark has been eaten but have never done so with the green, unpeeled limbs before the beavers had taken them into their houses. This matter to me is a very mysterious one, and I have never been able to get my hint as to how these sticks were sunk.

All through the winter the beavers visit these caches, carry the sticks to their houses, where they eat off the bark, returning the bare sticks to the water.

Sometimes it may happen that for some reason or other the cache may not contain enough to last the whole winter. In this case the beavers, if possible, get on land through some hole or piece of open water and then forage among the timber. Occasionally a combination of scarcity and severe weather may oblige the colony to emigrate during the winter to some more favorable spot.

Courting Trouble. "Look here," said the official, "there'll be trouble if your wife disregards us when we persistently tell her she must not pick the flowers."

Then, replied Mr. H. Peck, for it was no other, "why ever do you persist?"—Judge.

Be prepared to answer for the single talent committed to your charge and take no thought for the rest.—St. Bernard of Clairvaux.

Why Colds Are Dangerous.

Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgment. It is the same with all infectious diseases. Diphtheria, scarlet fever, measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by Frank Hart and leading druggists.

Smart.

Slick (to Blossom)—Is this Mr. Bloomer's office? Blossom—No. His office is on the other side of the passage. Slick (leaving the door open as he walks out)—Thank you, sir. Blossom—Hey! Come back and close that door! Haven't you any doors in your house? Slick—Yes, sir, but they all have springs on 'em. Allow me to show you, sir, my patent double back action door spring. It closes the door without a bang and will last a lifetime.

Discriminating.

"Of course," the British tourist was saying, "I understand that the winning party at your elections is the one that gets out the most voters."

"Not at all," replied the native. "It's the party that puts in the most votes." —Catholic Standard and Times.

Good Turns.

"Do Writter was telling me he expected Crittich of the Morning Bugle to do his book a good turn."

"Yes! Well, he seems to have given it two or three good turns. He roared it pretty thoroughly."—Exchange.

Setting Him Right.

"The poet was busy at his desk: 'The fire of genius is burning, oh!' queried the casual caller.

"Not so you can notice it!" replied the rhymer. "That's my cigar you smell."—Chicago News.

For a man to exert his powers in doing good so far as he can is a most glorious task.—Sophocles.
