

DON'T MISSTHIS GREAT MONEY SAVING OPPORTUNITY

Larson's Mammoth Mid-Winter Sale is now on in full swing. The Word **BARGAIN** has never before obtained the significance which it has at this sale--only standard goods which were part of our regular stock are offered. No importation of cheap trash to palm off as regular goods is ever tolerated in this store. Read the marvelous reductions below and convince yourself.

The Following Bargains Can't Help But Interest You

Suits	
\$25.00 Suits	\$17.50
22.50 Suits	15.80
20.00 Suits	14.00
17.50 Suits	12.25
15.00 Suits	11.00
12.50 Suits	8.75
10.00 Suits	6.00

Overcoats	
\$22.50 Overcoats	\$15.80
20.00 Overcoats	\$14.00
17.50 Overcoats	12.25
15.00 Overcoats	10.50
12.50 Overcoats	8.75
TOP COATS	
\$15.00 Topcoats	\$10.00

High Top Working Shoes	
\$7.50 High top shoes	\$5.50
7.00 High top shoes	5.00
6.00 High top shoes	4.50

Boy's School Shoes	
The kind they can't wear out	
In sizes from 11 to 2	\$2.00
In sizes from 2 1-2 to 5 1-2	2.25
Boys Hightop Waterproof Shoes	
In sizes from 11 to 2	\$2.50
In sizes from 2 1-2 to 5 1-2	2.75

Dress Shoes	
\$5.00 Dress Shoes	\$3.50
4.50 Dress Shoes	3.25
4.00 Dress Shoes	3.00
3.50 Dress Shoes	2.75
3.00 Dress Shoes	2.25

AUTOMOBILE VS. AIRSHIP.

Automobile Club and Aeronautical Society May Consolidate.

NEW YORK, N. Y., December 29.—The automobile may now become a vehicle for the common people. The aristocrats of the automobile world have taken to flying machines. The Automobile Club of America has concluded an arrangement with the Aeronautical Society for the use of the old Morris Park race course for experiments with heavier-than-air machines. Henceforth the idle young millionaire, instead of endangering his neck in a 200 horsepower racing machine, will find excitement in tests of skill and daring up among the clouds, or as near to the clouds as his flying machine will carry him.

Automobile manufacturers can only view this departure with alarm. They have not forgotten what happened to the bicycle industry when the fashionable world abandoned the wheel for the motor. Alert bicycle manufacturers who discerned the trend of the times converted their bicycle plants into automobile manufacturing. It will now be up to the automobile manufacturers to begin making flying machines. All this is very beneficial to the new science of aerial navigation, and there appears no reason why the public should have an inclination to complain. When the millionaires quit demanding higher and higher priced machines the manufacturers will be compelled to turn their attentions to the making of good machines which may be sold to people in moderate circumstances at reasonable prices. The racing automobile is the highest priced machine now made, and about the least useful. If the

time and talent which go into the making of racing machines were devoted to producing machines of more practical use, the public would be bound to be the gainer. The danger is that this talent will be drafted for the production of racing air machines.

"Drink of Water."
A glass of cold water slowly sipped will produce a greater acceleration of the pulse for a time than will a glass of wine or spirits taken at a draft. In this connection it may not be out of place to mention that sipping cold water will often allay the craving for alcohol in those who have been in the habit of taking too much of it and may be endeavoring to reform, the effect being probably due to the stimulant action of the sipping.

An Impertinent Question.
A young man hurriedly entered a restaurant and sat down at the table nearest the kitchen. With shuffling feet the waitress advanced.
"Have you frog legs?" the young man anxiously inquired.
"No, indeed. Rheumatism makes me walk like this," the waitress indignantly replied.—Judge's Library.

Evasive.
The Professor—And how did Phocion shamefully evade his duty? The Freshman (who doesn't know)—I have been taught, sir, never to speak ill of the dead.—Cleveland Plain Dealer.

Goodness Nose!
When the clerk informed the customer that the handkerchiefs were \$7.50 each the latter remarked:
"No, sirree! That's too much money to blow it!"—Judge's Library.

Piles Cured in 5 to 14 Days
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 5 to 14 days or money refunded. 50 cents.

RELIGIOUS ACROBATS.

Dangerous Aerial Slide Annually Performed in India.

India offers many curious things in the way of religion, and the strangest of them all is the aerial slide, which is performed annually at Kulu, in the Himalayas. At a point where there is a cliff overhanging a precipitous gorge several hundred feet in width and a hundred feet in depth a rope is made fast to the rock. The other end of this is carried across the gorge and there secured to a stake. The total length of the rope between the two points is when drawn taut 2500 feet, and the end attached to the cliff is several hundred feet higher than that fastened on the opposite side of the ravine. Thus a slide is contrived, and it is a dangerous one to all appearance.

It is down this incline that the performer has his path. For the latter journey a sort of saddle is provided made of wood, with holes in it, through which the rope passes. But before a start is made the whole length of the rope is wet to prevent the saddle from catching fire from the friction. The performer sits astride this seat, and to his legs are fastened bags of sand, which serve two purposes—they enable him to maintain an upright position during his lightning-like descent, and they increase the momentum. The lower end of the rope is carefully wound with bits of carpet to check the speed before the stake is reached. Without this precaution the performer would be dashed to pieces.

The terrific velocity of the descent for the first few hundred yards is shown by the stream of smoke that trails from the wake of the saddle, despite the fact that the rope has been wet. Afterward the incline diminishes somewhat, and the pace becomes correspondingly slower. By the time the goal is reached the performer is a standstill without disaster.

This slide in the air is supposed to reveal the will of the gods as to the crops of the approaching season. If the perilous trip is accomplished in safety a plentiful harvest is assured. Naturally, therefore, every care is taken to minimize the dangers of the performance. The ceremony is of ancient origin, and those who engage in it as a job form a small caste apart.—New York Tribune.

Hoarse cough and stuffy colds that may develop into pneumonia over night are quickly cured by Foley's Honey and Tar, as it soothes inflamed membranes, heals the lungs, and expels the cold from the system.

ROYAL STRONG ARMS

Famous Monarchs That Rivalled the Mighty Samson.

AMAZING FEATS OF MUSCLE.

The Emperor Maximilian Could Lift Three Men With One Hand—Augustus the Strong of Saxony Carried a Horse and Its Rider on His Back.

Curiously enough, a large percentage of the notably strong men of history have been of royal blood. One of the earliest of these royal athletes was Maximilian, called "Maximilian Hercules" because of his great strength. He was the son of a peasant and had an enormous physique. He became a common soldier and was finally made emperor by acclamation of his fellow soldiers during a stormy period of Roman history.

Maximilian's strength was prodigious. It was said that on foot he could run down a fox, that he could lift three men with one hand and that by gripping the wheel of a chariot with one finger he could resist the pull of three horses. Like most men of great physical strength, Maximilian was a heavy eater. History records that his daily allowance was forty pounds of meat and eighteen bottles of wine.

Augustus the Strong of Saxony was another of these royal Samsons. He would often seize two of his courtiers, grasping one with his right hand and another with his left, holding them up at arm's length and playfully twirling them about.

On one occasion the horse ridden by one of his attendants became balky and refused to budge. After some minutes of coaxing the king dismounted, placed his Herculean shoulder under the horse's chest, grasping it by the fore legs, and calmly walked away with both horse and rider. This remarkable performance was witnessed by a number of courtiers and attendants.

King Richard of England ("Coeur de Lion") had tremendous strength. During his captivity in Germany he gave a terrible demonstration of his physical powers. The son of one of the wardens was a youth locally renowned for his muscular strength and in his assurance invited the royal captive to an exchange of buffets. The young man by a cast of the dice won the right to the first stroke and struck the king a staggering blow on the side of the head. It was then the king's turn, and he landed a blow just behind his opponent's ear so heavy that the man was instantly killed.

This incident is used in Sir Walter Scott's famous historical novel "Ivanhoe," where King Richard, the "Black Knight," and the jolly outlaw Friar Tuck have an exchange of buffets, without, however, any fatal result.

Dom Pedro I, emperor of Brazil, is also on the list of royal strong men. On the occasion of a carnival he arranged matters so that he was standing on the bow of the royal barge between two of his stately courtiers. Suddenly in the midst of the festivities the king reached out, grasped a courtier with each hand, and after holding them for a few moments squirming in the air and begging to be released, he relaxed his grip and allowed them to drop plump into the water, amid the frantic applause of the huge crowd that had assembled to view their monarch. The king joined heartily in the general hilarity, but what the drenched courtiers thought about this exquisite joke is not recorded.

Peter the Great of Russia, like Charlemagne, possessed great physical as well as mental power. His years of work as blacksmith and ship carpenter had so developed a naturally powerful physique that he was believed to be the strongest man in Russia.

The story is told that a certain blacksmith in a little country town had boasted that he was the only blacksmith in the world who could lift his own anvil. The emperor, hearing of the blacksmith's boast, disguised himself as a workman and with a single companion set out for the blacksmith's village. On learning of their errand the blacksmith, without a word laid aside his tools and, grasping the anvil with his brawny hands, lifted it with great effort about a foot from the floor. Then Peter took hold of the anvil, raised it a foot, two feet, three, higher and higher, till he finally swung it to his shoulder and calmly walked away with it.

Charlemagne was said to be the most powerful man physically of his time. One of his favorite feats of strength was to break the heaviest horseshoe by gripping it with one hand.

A worthy successor of Peter the Great was the late Czar Alexander III, who was one of the strongest men in the world. He was often called "the Russian Samson." The czar's regular visiting card was a Russian coin somewhat larger than our silver quarter, which he would bend almost double with his powerful fingers.

Alexander was also fond of breaking horseshoes, and it is said he never found one he could not break in two. He could take two fresh packs of cards and by gripping the ends with his hands tear them straight down through the middle.

It is said that on one occasion a woman companion expressed a wish for a bouquet holder in which to place a large bunch of roses. The czar took a pewee tankard from a table nearby

and with a few movements of his powerful hands fashioned it into a rough but picturesque and quite efficient bouquet holder.—W. R. C. Latson in New York Tribune.

LET US TELL YOU ABOUT

Tungsten Electric Lamp
 Greatest advance in lighting methods since the invention of incandescent lamps.

EXAMPLE—
 32 C. P. Ordinary electric lamp consumes 110 watts per hour
 32 C. P. "Tungsten" electric lamp consumes 40 watts per hour
 Saving 70 watts per hour

By using "Tungsten" lamps you can get 275 per cent increase in light for the same cost or in other words can have the same quantity of illumination for 35 per cent of the cost of lighting with ordinary electric lamps.
