Rheumatism
Is one of the troubles peculiar to this season, owing to the overworked condition of the liver and kidneys, which are unable to expel the impurities from the blood. Hood's Sarsaparilla is wonderfully successful in curing this disease. It neutralizes the acid in the blood and permanently cures the aches and pains which other medicine fails to relieve.

Flashed to the Roof.
A rather ingenious method of repairing the roof of a standpipe was reported to recently by the water works department at Napoleon, O. Some time ago, in a violent wind storm, the roof was blown off, together with the upper part of the ladder leading to the top. Since then several plans for making the repairs have been considered, but the following was decided upon as the most feasible: The water was withdrawn from the standpipe and a raft was built inside. When the water was turned on the raft, laden with workmen and their tools, was gradually sent upward at the rate of 35 feet per hour, it requiring five hours to make the ascent. Hooks and pulleys were then attached to the pipe and material was drawn up on the outside, while the men performed their work, using the raft for a platform.

CONSULTING A WOMAN.
Mrs. Pinkham's Advice Inspires Confidence and Hope.

Examination by a male physician is a hard trial to a delicately organized woman. She puts it off as long as she dare, and is only driven to it by fear of cancer, polypus, or some dreadful ailment.

Most frequently such a woman leaves a physician's office where she has undergone a critical examination with an impression, more or less, of discouragement.

This condition of the mind destroys the effect of advice; and she grows worse rather than better. In consulting Mrs. Pinkham no hesitation need be felt, the story is told to a woman and is wholly confidential. Mrs. Pinkham's address is Lynn, Mass., she offers sick women her advice without charge.

Her intimate knowledge of women's troubles makes her letter of advice a wellspring of hope, and her wide experience and skill point the way to health.

I suffered with ovarian trouble for seven years, and no doctor knew what was the matter with me. I had spells which would last for two days or more. I thought I would try Lydia E. Pinkham's Vegetable Compound. I have taken seven bottles of it, and am entirely cured."—Mrs. JOHN FOREMAN, 26 N. Woodbury Ave., Baltimore, Md.

Portlanders Break Overland Record—New Yorkers Have Hard Luck.
Seattle, Jan. 7.—William Welch, Frank Rekolle and W. Devine, of Portland, Or., who arrived here today from the Klondike, claim to have broken the overland record from Dawson to Skagway. They left Dawson, December 12, and arrived at Skagway, December 29.

Hopes to Be Received Officially at Washington.
General Miller Has Been Ordered to Land His Troops at Ilo Ilo at Once.
Washington, Jan. 9.—Senator Agoncillo, who is in Washington as the representative of the Philippine government, has asked to be recognized by the United States as such, and to be accorded the same rights as the other diplomats. His request is now in the hands of Secretary Hay.

TO ACT ON THE DEFENSIVE
The letter of Senor Lopez further states that he is instructed by Senor Agoncillo, in view of recent developments, to urge the advisability of an understanding between the American government and the representative of the Philippine people as to the relations between the respective nations; such understanding to be reached either at Washington, through the joint representatives of the two governments, or in the Philippine islands, in like manner. The letter concludes with an expression of the earnest hope that the friendly relations heretofore existing between the two nations may ever be maintained.

WILL FORCE THE ISSUE.
General Miller Has Orders to Proceed Against Ilo Ilo.
Chicago, Jan. 9.—A special to the Times-Herald from Washington says: President McKinley has decided to force the issue with the Filipinos. His decision may result in a battle at Ilo Ilo.

STEAMERS MAY BE CRUSHED.
Yukon Craft Will Be in Danger When the Ice Breaks.
Seattle, Jan. 9.—News from Dawson state that a number of Yukon river steamers will be lost when the ice breaks up in spring. Some were caught in very unprotected places, and can scarcely escape being wrecked. The Robert Kerr, of the Moran fleet, is stuck fast on a bar 50 miles below Circle City. The fine steamer Armoil, of the Alaska Exploration Company's fleet, was caught by the ice while fast on a bar some 30 miles below Forty-Mile.

Open Door in the Philippines.
Washington, Jan. 7.—Senator Frye, of the American peace commission, said in the senate committee on commerce today that it was the understanding of the American commissioners that an absolute open-door policy was to be observed by the government of the United States with reference to trade in the Philippines, and that other countries were to be given the same facilities as the United States in that trade.

May Exclude Americans.
Vancover, B. C., Jan. 7.—Much talk is heard over the province in the speech from the throne at the opening of the provincial legislature today, that a bill will be introduced to exclude aliens from taking up or working placer mining claims within the province. The importance of this is in no way to be gainsaid, for it will shut Americans out of the Atlin country completely, and it will preserve Atlin's riches for British subjects alone. At present Canadians are not allowed to take up mining claims in the United States.

Leach Lake Indians Pardoned.
Washington, Jan. 7.—The president has pardoned the 12 Leach lake Indians sentenced to various terms of imprisonment, and fined at the late term of the United States district court of Minnesota for resisting the United States marshal in making an arrest.

Secret Treaty Respecting China.
London, Jan. 7.—The Shanghai correspondent of the Daily Mail says: According to Chinese report, a secret treaty exists between Great Britain and the United States to prevent any further alienation of Chinese territory.

Killed in a Gravel Pit.
Fullerton, Cal., Jan. 7.—Martin and Hilary Nichols, boys, were killed today in a gravel-pit by a cave-in. They were talking out gravel when the slide occurred.

The Tax on Beer.
Washington, Jan. 6.—Attorney-General Griggs, in a recent opinion, holds that the tax to be assessed upon beer in case of attempted evasion and willful failure to affix the stamps should be at \$2, and further that the additional tax to be assessed upon beer stored in warehouses on June 14, 1898, should be \$1 a barrel, and not 92 1/2 cents.

QUICK TIME FROM DAWSON.

Portlanders Break Overland Record—New Yorkers Have Hard Luck.
Seattle, Jan. 7.—William Welch, Frank Rekolle and W. Devine, of Portland, Or., who arrived here today from the Klondike, claim to have broken the overland record from Dawson to Skagway. They left Dawson, December 12, and arrived at Skagway, December 29.

Antone Grobetski and Albert Bernard, two young men from New York, met with very hard luck on the way out. They broke through the ice on the Thirty-Mile river and were in the water some time. They finally were rescued and cared for by the police. Grobetski lost \$2,800 in gold, which was tied on his sled. He arrived here today a dejected pessimist. His partner is at Tagish house in the police hospital, and will lose both feet as well as several fingers. Grobetski will need to have a toe amputated.

DAY IN CONGRESS.
Several Bills of Minor Importance Passed in the Senate.
Washington, Jan. 7.—In the absence of the president, on account of illness, Frye (Rep. Me.) was president pro tem at the opening of today's session of the senate. Berry (Dem. Ark.) presented a protest from J. E. Murray, camp of United Confederate veterans of Arkansas, against the adoption of the proposed amendment of Butler (Pop. N. C.) to the pension appropriation bill, providing for payment of pensions to Confederate soldiers.

Aiding an Oregon Industry.
The Portland linseed oil works are desirous of establishing a flax center at Dallas, and offer the farmers the following proposition: First, we will furnish plain, clean seed to each farmer who will sow from 20 to 30 acres or more, this growing seed to be paid back in harvest of crop. Second, we will guarantee the farmer \$1 a bushel of 50 pounds clean and L. & B. cars Portland. Any further information regarding the successful handling of the flax crop will be cheerfully furnished by E. E. Larimore, manager Portland Linseed Oil works, Portland, Or.

Improving Gas Plants.
A new plant, double the size of the present works, will soon be built at Spokane by the Spokane Falls Gas Light Company, which now estimates spending \$20,000 in improvements. The consumption of gas in that city has doubled within the past two years, necessitating an increase in capacity.

Bond Sale.
The sale of the \$2,000 worth of bonds issued on school district No. 1, of Mason county, Washington, and to run six years at 6 per cent interest, have been sold to the directors of the school, who consider themselves quite lucky in securing the investment.

PACIFIC COAST NEWS

Items of General Interest Gleaned From the Following Pacific States.
The Country's Apple Crop.
In connection with demand in the East and in Europe for our fruit, we quote from the Orange Judd Farmer in regard to the extent of the apple crop: This crop in the United States is smaller than it has been since reliable statistics have been collected. The total supply from the 1898 crop of the United States is 27,000,000 barrels, as compared with something over 40,000,000 barrels last year and 70,000,000 in the record-breaking crop of 1896. The failure is widespread, reaching from the Pacific coast to Maine, and in none of the states does the output of fruit approach an average. (This is not true, however, where the crop is not a failure.) In the great apple states of the Central West the crop is almost a total failure, although the situation in Michigan is better than elsewhere, having about two-thirds of the bumper crops of 1896. New York has only one-fifth of a full crop. The failure is attributed to the fact that during the blooming season there was an excessive rainfall, which washed out the pollen and prevented proper fertilization by insects, while a cold wave added to the injury, and subsequent moist, humid weather was very favorable to the development of fungus diseases. The Ontario crop is decidedly short. The crop of Europe is reported below the normal.

De Wolf Hopper's Big Business.
De Wolf Hopper has good reason to be highly elated over the success his new opera, "The Charlatan," has received on the road. Washington started the ball rolling to the tune of \$10,000 a week, a like result was achieved in Baltimore, and now Boston has beaten the Washington team. "El Capitano" in its palmetted days was not received with anything like the favor that has been accorded Sousa and Klein's latest effort. It was Mr. Hopper's intention to present "El Capitano" when he entered upon his postponed London season next year. But "The Charlatan's" drawing power is so strong that he has changed his plan, and will present it instead of Sousa and Klein's joint work, "El Capitano." It would appear from Washington, Baltimore and Boston critics' words that Mr. Hopper had discovered a mine of fun in the character of the wandering fakir, and has added immensely to his popularity as a comedian.

Deafness Cannot Be Cured.
By local applications, as they cannot reach the affected portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the membrane lining the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it continues you are deaf. It is the result, and unless the inflammation is quickly and thoroughly cured, it will destroy the normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh which has not been cured by the ordinary condition of the mucous surfaces. We will give One Minute Cures for any case of Deafness (caused by catarrh) that can not be cured by Hall's Catarrh Cure. Send for circular.

Propeller Racing Prevented.
To prevent the engines of a vessel from "racing" when the screws have risen above the water, Signor E. Putalo has invented an electrical regulator. The contrivance consists of two vessels of mercury, connected at the bottom by a tub and mounted fore and aft in the ship. The vessels are about half full at normal depth. When the ship pushes forward so as to raise the screws the rods connected with the resistance are submerged one after the other, so that an electro-magnet is brought into play, the whole resistance being short-circuited when the screw is entirely out of the water. The electro-magnet operates a throttle valve in the main steam pipe, which is thrown open by another magnet. By this arrangement the steam is turned off and on. From experiments it has been shown that the mercury vessels need not be more than 34 inches apart on a ship 300 feet long.

A SWORN STATEMENT.
I, C. R. Rollins, M. D., of Grass Valley, Or., voluntarily make the following statement: After having my teeth extracted by me, three in Portland, one in San Francisco and one in Spokane. With neither of these have I been able to eat a meal's victuals or even an apple or ripe peach since December 1898. I had my teeth taken out by Dr. Alder, Portland, Or., and within twenty minutes after the time they were put into my mouth I was able to eat a common hard winter apple and a piece of dried yeast cake. I have eaten every meal since with the greatest comfort and with no trouble at all. They are a perfect fit and satisfactory in every respect. Ref. Bank, The Dalles, Or.; Sherman Co. Venice Will Be Drained.
Venice without its waters would be a far less picturesque place than it actually is, says the London Chronicle. And such a state of affairs, were we led to believe, may eventually come about. The regular increase in the delta of the Po has been studied by Prof. Marinelli. Comparison of the Austrian map of about 1828 with the records of surveys made in 1893 shows that the mean annual increase during those years has been about three-tenths of a square mile; and from all known data it appears that the total increase during six centuries has been about 198 square miles. The increase is continuing and the Gulf of Venice is doomed in time to disappear. No immediate alarm need, however, be excited, for Prof. Marinelli calculates that between 100 and 120 centuries will elapse before the entire Northern Adriatic will have become dry land.

Cups for the Raleigh.
An artistic set of punch cups to be presented to the cruiser Raleigh by Mr. and Mrs. Alfred W. Hayward, of Haw River, N. C., has just been completed, says the Baltimore Sun. Mrs. Hayward, who is the daughter of Governor Holt, of North Carolina, was sponsor for the cruiser at the time of her christening. The cups are 12 in number and weigh 100 ounces. Each cup is four inches high and three inches in diameter, resting upon four dolphins, whose bodies curve gracefully about the body of the cup. They are highly polished and lined with gold. They are of the same design as the massive punch bowl which was presented to the cruiser by the citizens of North Carolina when she first went into commission. The Raleigh is a second rate cruiser that formed part of Admiral Dewey's squadron and is now on the Asiatic station.
