The future of Great County is in its road-building. We have already studied the roads in the western part of the county and are now laying out for the citizens of the eastern part of the county. We hope to have all the roads finished to the edge of the city by the end of the year. The roads in the eastern part of the county are much better than those in the western part. We are making great strides in this area and we hope to have all the roads finished to the edge of the city by the end of the year.
