### The Chamber of Torture

Is the spartment to which the unhappy sufferer from inflammatory rheumatism is coufined. If, ere the crisis of pain is reached, that fine preventive, Hostetter's Stomach Bitters, is used by persons of a rheumatic tendency, much unnecessary suffering is avoided. Nervines, anodynes and sodalives, avoided. Nervines, anodynes and sodalives, while having none but a specific effect, are yet very desirable at times. Yet can they produce no lasting effect upon theumatism, because they have no power to eliminate from the blood the rheumatic virus. Hostetter's Stom-ach Bitters does this, and checks at the outset a disease which it allowed to gan beadway. It is next to impossible to distodge on to do more than relieve. Eheumatism, it should be re-membered, is a disease with a fatal tendency from its proneness to attack the h-art. A resort to the Bitters should, therefore, be prompt. Dyspepsis, kidney compliant, ma-taria and nervourness are relieved by it.
