MEXICO'S SYSTEM OF PEONAGE. Contrary to Law, but Carried on Without

Medeutation. A system of peopage or slavery is exensively carried on in Chiapus, and Ita. eridors are novel and interesting. The slaves nearly all come from the mubble class of Spaniards, and are not talls to as is generally supposed. The sonal custom is for a family who may love a boy 10 or 14 years of age to take he child to some plantation-owner or unily of the first-class and propose that shall take a position as servant on adition that an advance of \$10 or \$15 made to the parents. The contract - generally stipulates that the child dall receive a certain amount as wages, and that the sum shall be placed to its credit until the money advanced has been paid, when the child will again be As the child grows older and becomes able to earn more money its parcuts, so it happens in nearly every case, my and two bread, and packed so needs generally asks for money for its soun personal use, and thus bound to its master it must continue in slavery un-

> The humane and ingenious | ment of his debts from his first owner, advance the amount. If any attempt ished until he is willing to take up the years again. This system of slavery is contrary to the ctatute law of the country, but it has been in operation so long that in this part of the Republic it is exercised on without molestation.

Owing to the ignorance of the middle brown it is seldom that a slave berights, and there are very few cases of reliable on these exceptional cars resently occurred in the City of San Cristobal, in this State, the slave that a young woman who was the property of a family to whom she owed a large debt. A prominent army officer, takened in that city at the time, bename enamoved of the girl. He infor a sther what her rights were under the law, and she lost no time in leaving the family, without taking any statement of the debt or attempting to find another master. Owing to the influonce of the army officer all offorts of the family to have her arrested and winded were unsuccessful.-Philadel

AN ODD LIBRARY.

Hooks on Botany Bound in the Bark of Trees and Plants.

At Warthenstein, in Germany, there is perhaps one of the most curiously priginal collections of booles extent This consists of a botanical collection. Curvarily the books present the common appearance of a block of wood, and that is the first impression; but a minute examination reveals the fact that each is a complete history of the particular tree which it represents. At the back of the book the back has been crasved from a space which allows the cientific and common names of the tree to be placed as a title. One side is: formed from the split of the tree, showing its grain and natural fracture, the smooth tel carnibled. One end shows the region is lost by the naw, the other the book it is found to conta. I the facilty seeds, leaves and other products of the tree. These are supplemented by a well-printed description of its knows, would leating and manner of growth. place in this wonderful, useful and calmable collections.
