GREAT CAMP

Thunder Mountain Attracting Wide Attention.

(Journal Special Service.) BOISE, Idaho, April 3.-A representative of the Central body of the Miners vestigating Thunder Mountain. Because of the discharge of so many men from Colorado mines, many miners in Colora-do are idle. Induced by the stories of er Mountain richness, it was decidof to send a union representative to Idaho to make an investigation. It is understood that he has returned home satisfied that Thunder Mountain is all that has en claimed for it. To a friend he said: "My report will result in probably 3000 miners going into the Thunder mountain district this year. They will organise their camp at once and put it on a 44 sasis, taking into consideration the high rice of provisions. It is understood that if a union is organized there the demand will be on the basis of cost of living in ordinary mining camps. If the cost is 30 per cent higher there, then the demand will be that 30 per cent more than 34 a day be paid, each miner paying for his own board.

lay be paid, each miner paying for his own board."

Information has been received from the East to the effect that Pittsburg companies interested in Thunder Mountain have contributed \$20,000 toward the completion of the wagon road from Boise to the gold camp.

This subscription is in pursuance of an agreement under which \$10,000 has been raised among the people of Boise for the purpose. It is the intention to push the road through, starting just as soon as the condition of the snow will permit. It is believed that stages and teams can go late the camp before July 1.

The lady was about to make a voyage to New York to spend her holidays with some relatives there, while her husband stayed at home to work and supply her with the necessary funds. After placing his wife on a Cunard liner the husband withdrew to the landing stage and addressed a group of men who were lottering about, in the following terms:

"Which of you would like to earn a couple of shillings?"

Two or three answered in the affirmative and the gentleman, after selecting his man, gave the following order:

"You see that lady dressed in black, standing at the ship's side? Well, that is my wife. She will expect me to stand for at least twenty minutes and wave my handkerchief to her until the ship is out of sight. You understand? I have no time to waste; my wife is very short-sighted, so it will do just as well if you take my place."

WEATHER DELUSION.

How Money, Thought and Energy Have Been Frittered Away.

Considerable money and not a little thought and energy have been frittered away in recent years in various parts of the world in efforts to chings weather conditions by the use of high explosives. Extensive experiments in this line were conducted in Kansas and Texas several seasons ago, the special atm in these being to break a prolonged drouth and produce a rain by firing off heavy cannon No valuable results were derived from these tests. Within the past year experiments on a larger and more elaborate scale have been conducted in the winegrowing districts of Italy and France with a view of preventing hallstorms by the use of cannon specially contrived for the purpose. The efforts made in this direction in the counties named were successful enough to attract widespread attention in Europe, have led to the calling of a "congress" to discuss the subject and devise measures for the extension of the system of alleged prevention. Repeated efforts have been made to interest our department of agriculture in the European experiments, and Prof. Willis L. Moore, acting secretary of agriculture, has recently issued a statement in regard to the matter. In this he expresses the opinion that the idea of pre venting hall storms or producing rain by the use of explosives is a delusion, and that "efforts should be made to prevent its spread in this country." The energy expended by nature in the production of a storm of any kind, says Prof. Moore, probably exceeds the energy of all the steam engines and cannons in the world, and it is utterly vain and useless to endeavor to combat nature along these lines. These are the views of a man who has made a life long study of weather conditions, and they are undoubtedly sensible and right. The notion that the fir ing off of cannon can either produce rain or prevent hall has about as little of reason or scientific principle in its favor as the Keely motor or the invention of a perpetual motion machine, over which many lives have ben wasted and a vast amount of money has been expended .-Leslie's Weekly.

"PLEASE KISS THE BEARER."

The Rev. Dr. John Henry Barrows. president of Oberlin College, who formerly preached to a Chicago congregation tels a pretty story concerning an experience of his own that may be worth passing along. It was at the time that Dr Barrows was making arrangements for holding of a great congress of religions here. He had an immense correspondence to take care of, and found it necessary to employ a stenographer. The young lady was pretty. It is not to be inferred that there are any but pretty lady stenographers, but the one employed by Dr-Barrows was especially comely.

The doctor fitted up a workroom on the third floor of his house, where he and the stenographer toiled hard day after day undisturbed by callers and well away from the noises of the streets.

The work of preparing for the congress. was making arrangements for

day, undisturbed by callers and well away from the noises of the streets.

The work of preparing for the congress was still going forward on the 14th of February, when the doctor's little son became excited over the sending and receiving of valentines. The boy had been runing about the neighborhood handing love rokens to the children he knew and many had come to him, when he remembered he had a father up on the third floor, in addition to the one in heaven. Going to his mother he proposed they send up a valentine.

"Well," said Mrs. Barrows, "it is very nice of you to remember father. How would it do for me to write\a valentine for him and let you take it up?"

The boy was delighted with the idea, and his mother wrote upon a sheet of

"Please kiss the bearer." This she placed in an envelope which was properly sealed and addressed to the loctor. The boy started upstairs with his doctor. The boy started upstairs with his valentine, but he had been running a good deal during the morning and his logs, were weary. When he had reached the second floor he met the pretty stenographer, who had started out after postage stamps or something, and asked her if the wouldn't be kind enough to hand the note to his father.

She took the envelope, gave the child a pat on the cheek and ran back upstairs, where perhaps prompted by feminine curlosity, she walted while Dr. Barrows opened his valentine and read, in his

They were told that there was plenty of everything. So they ordered a lot of things to be brought, and rejoiced in the idea of plenty—milk, eggs and butter being occasionally scarce; but nothing came. Then they finally sent for the official again.

ficial again. Where are the eggs?" "Where are the eggs,"
"There are no eggs, may it please your highness."
"No eggs! Well, where's the milk?"
"May it please your highness, I cannot find any milt." find any milk. "Cannot find any milk? What do you mean? Where are the cows?"
"There are not any cows, your high-

"Then why did you say there were plenty of supplies?" "To please your highness."

THE JOURNAL TRADING CHECKS The trading checks appearing in the Journal's advertisements are the simplest and most direct appeals that have been made to the good sense of alert

and painstaking shoppers. Just look at the columns of the Journal today. Here you have a chance directly before you to save money.

In H. E. Edwards' furniture advertisement a coupon appears good for fifty cents. Cut one out and take it to the Edwards establishment and it entities you to a fifty cent reduction on a \$5 purchase. The prices of goods are given in the advertisement, and it is like finding money to be allowed to use these coupons as cash.

In the Chase Paint & Oil Co.'s advertisement a ten cent coupon appears, good for ten cents in payment of \$1.00 worth of goods.

Save up your coupons and try how the Shrewd people have immediately taker hold of it. It is exclusively used in the columns of the Journal, and smart shop-
