It is a pretty well established fact now that the cause of Benjamin Suitor's snicide at Westport was the dis grace brought upon the family through the father refusing to honor another son's checks which came to him through the London & San Francisco

Upon hearing of the trouble which was threatening his brother Robert in Portland, Benjamin is said to have asked his father: 'Are you going to dishonor those

thecks and see brother go to jail?"
Not receiving a satisfactory reply the young man is alleged to have hastily said:

"Well, all right then; good-bye."

He then turned on his heel and en-tering another apartment, blew his brains out with a revolver.

Robert Suitor, Sr., is now called upon to defend himself in a civil suit for \$95 brought in the justice court for wages alleged to be due his surviving son. #### OREGON CITY.

(Journal Special Service.)

OREGON CITY, April 15 .- The fishing season opened in the Clackamas and Willamette Rivers at 12 M. last night, and a carload of salmon was sent on the trolley line from Gladstone early this morning. These salmon were caught in the Clackamas, and it is claimed that the run of salmon is larger than for several years past. It is alleged that some of the salmon had been in cold storage for several days past, but it might be difficult to prove this allegation. Fishermen operating in the river near Oregon City

reported small catches this morning. A. B. Rintoul, superintendent of the new woolen mill at Eugene, has been visiting relatives here for the past your n two or three days, and stated that the mill will be ready for operation by the middle of May.

#### SHIP BUILDING.

The Washougal, La Camas Transportation Company is contemplating the building of another steamboat to run from Portland to some point up the Columbia not yet determined. It is to be built with the idea of securing speed, as a fast passage boat, said the agent, is the only kind which the public demand. Another boat would be built by this company immediately, he said, were it possible to have the work done. The boat and shipyards here at present are running over with orders and it is simply impossible to get the work done. Asked why this con-

dition exists, he replied:
"They say that they are short of shipcarpenters and can not turn out work as fast as they otherwise would be able to

Other river men interviewed on the same subject stated that the boat and shipbuilding industry here is carried on very slow, but no improvements were suggested. It is the general opinion, however, that plenty of skilled workmen could easily be secured if they were advertised for and the proper inducements offered them to come and remain here, They claim that shipbuliding should be among one of the greatest industries of Portland, and it would be it men of capital and enterprise would take hold of the project and build it up.
