ELECTRICAL OPERATIONS

Many Power and Light Plants—Great Enterprise for the Coeur d'Alenes.

There is great activity in all kinds of electrical operations in Oregon, features being the large number of lighting and power plants either in construction or in contemplation.

This was the report made by one of the largest electric concerns of Portland. Others confirmed the same report.

Among one of the largest plants being handled by Portland concerns, is that of the Washington Power Company, of Spokane, upon the falls at that city. This is in the hands of the Portland General Electric Company. The contracts for plant and supplies already reach \$150,000. This proposition is for conveyance of electrical power to the Coeur d'Alenes mines, the farther and being 30 miles distant from the power. Transmission this long distance involves the proposition of the amount of power lost in transmission, which the General Electric engineers expect to be not to exceed 10 per cent. The improvement of the power calls for utilization of 5,000 horse power. For the present it is expected to deliver 3,000 horse power. The transmission wires are being especially constructed, and are of "0" gauge, or about three-eighths inch thick.

Work is progressing favorably, so the General Electric reports, and the plant is expected to be in operation for the mines in June next. The plan is to furnish power, for those mines, through the entire heart of the rich Coeur d'Alenes region, for hotels, pumps, drills, and in fact all operations, and the enterprise is regarded of the utmost importance for the development of that section. It is the consummation of projects long in contemplation.

ASTORIA.

(Journal Special Service.)

ASTORIA, Sept. 15.—A deal has been closed in this city whereby a party of Minneapolis will take over the holdings of the Neocanic Spruce Lumber Company. The purchase price is reported to be in the neighborhood of \$125,000. The deal has been pending for some time, but to its consummation members of the company strenuously objected. The company has owned and operated a small mill at Seaside for several years, while it had control of some thousands of acres of choice timber land along the Neocanic and O'Hanna creeks. All the timber land goes over to the Eastern people. Representatives of the latter are reported to have made the statement that they would put 12,000,000 feet of spruce in the water during the winter months, and that the present mill at Seaside would be enlarged to twice its capacity. The enterprise will do much to advance the interests of Seaside.

Work on the new Catholic church is progressing satisfactorily.

OREGON CITY, Sept. 15.—A smash-up which broke the fronts of both cars and shook up the passengers, occurred at 12:15 a. m. this morning in the new cut at Milwaukee Heights on the O. W. P. & R. Company's electric line. No one was injured. Car No. 30, which was in the Gladstone wreck several months ago, was dead-heading from Oregon City to Milwaukee, being in charge of Motorman O. The place where the cars met is between banks, with a heavy grade and on a curve. They are all hand-made throughout and the finest work of the kind ever turned out in the city. Some of them contain over 2000 pieces, which have been inlaid. The joining is perfect and must have required weeks of patient toil. The design is unique, and the entire work is perfectly symmetrical. In one of the tables is contained 20 different varieties of wood, those showing up to the best advantage perhaps being Oregon hush maple and oak. The former is curly and in its high polished state is a thing of beauty.

BEAUTY.

HOW IT CAN BE OBTAINED

How to Make a Marvelously Perfect Complexion and Restore Youthful Looks.

HOW TO REMOVE PIMPLES, FRECKLES, MOTH, BROWN PATCHES, BLACKHEADS, OILINESS AND ALL DEFECTS FROM THE FACE, NECK AND ARMS.

There is nothing more beautiful than the human face with its vivacious countenance, its sparkling eyes, its perfect symmetry and perfect harmony. But the crowning glory of the face is a radiant complexion with its lively glow, its youthful tinge, and its fine, smooth texture.

But the question is can such a complexion be attained? In this wonderfully progressive age of art, literature and science, of the steam engine, the mighty cannon, the electric motor, the wireless telegraph and the ponderous turbo-making machines; what is there that is impossible? By a careful study of the nature and texture of the skin, and a thorough research in the realms of chemistry and compounding of ingredients, a remedy has been at last perfected that will accomplish these results.

This remedy is **Mrs. A. Ruppert's Face Bleach**. It is not a cosmetic to cover up, but it is a subject. It can positively guarantee every woman it will do all I claim. Its action on the skin cannot fail to remove every defect. It is a well-known fact that the blood in order to cleanse itself is constantly throwing off its impurities through the pores of the skin; now if the pores are not kept open, the impurities of the blood cannot escape, but collect below the surface, and produce all manner of skin troubles, such as PIMPLES, FRECKLES, MOTH, RINGWORMS, ECZEMA, ACNE AND NUMEROUS OTHER SKIN DISEASES AND DISCOLORATIONS.
