The Golconda Extension Gold Mining Company owns the Orleans, the direct southwest extension of the now famous Golconda.
 The Orleans claim was located in 1896. Last December active work was commenced by driving a tunnel on the vein and at the present time has attained the length of 140 feet and a perpendicular depth of about 40 feet. The vein is 15 feet wide and very rich in gold. It is the intention of the company to extend this tunnel, making a cross-cut every 100 feet until backs of at least 300 feet are obtained.

The croppings, the formation and the character of the ore are identical with that of its next neighbor, the Golconda. So far as development has proceeded it has proven to the management that by further development we will be able to attain the same results as the other famous mines on this same mother lode.
 The great Sumpter gold fields within the last 35 years have produced over fifty million dollars (\$50,000,000) in placer gold. Less than 10 years ago the Bonanza mine was offered for \$500; its present value is \$3,000,000. The Red Boy was offered for \$1500; its value now is \$3,000,000. The North Pole was offered for \$3000, and has paid one million dollars in dividends in the past four months and is now being equipped with the largest stamp mill and cyanide plant

in the Western country, its value being so great that the management has refused an offer of \$3,000,000 and will not set a price on their property. The E & E years ago was sold for less than \$10,000. It has a record of over \$900,000 as a product and is now out of the market. The Columbia was offered for \$4000 and is now worth \$3,000,000, and by recent reports it is estimated they have \$90,000 tons of ore now in sight that will mill \$14 clear of all expenses. The Golconda was offered for \$700 and is now worth \$1,500,000. The new management of this famous property is now taking out ore that will run from \$50 to \$100,000 per ton and is running 20 stamps and a large cyanide plant night and day on ore that is practically inexhaustible.

The directors of the GOLCONDA EXTENSION COMPANY are positive that the success of those other companies will be duplicated in this property and that every investor will have a chance to become rich.

Get in on the ground floor. The Oregon Cracker stock sold at 10c, now scarce at 75c. The California Jumped in 8 months from 10c to 60c, and the Golconda Extension will equal the best of them. Don't delay, but get a block of stock at once, and become a millionaire. The stock is selling rapidly and the block now offered at 10c will soon be gone.

ALL THE COMPANY'S STOCK IS FULLY PAID AND NON-ASSESSABLE AND NO PERSONAL LIABILITY. 400,000 SHARES have been placed in the Treasury to secure the funds necessary to develop the property. All the other shares are pooled.

50,000 TREASURY SHARES are now offered at 10c per Share

Proceeds to be used in development. The next allotment of shares will be put on the market at an advanced price. Apply at once personally or by letter.

HEAVY TRADING

All Along the Front Street Line.

MARKET IS BOOMING

Prices Steady—The Fish Shortage—Other General Features.

The Portland market today closes an extraordinarily heavy week's business. The situation was thus summed up by the Wadhams Company, Incorporated:
 "Business has been out of sight. The fall movements are very heavy, and in fact we might say we have more than we can handle."
 It was the same story up and down entire Front street. Fall business opens with great prospects.
 In produce lines there was a general opening up, or efforts to do so, and small stocks, unless it be of melons, will go over to next week. Receipts are also in smaller lots, like peaches, as they pass out, cars now being rare. However, Oregon Cans will begin the coming week.
 The heavy receipts of poultry for a day or two, overstock again, and the price was put down 25 cents in the effort to clean up so as not to carry over.
 The shortage of salmon and halibut continues. It is a skinning for supply, regardless of the price, but the stock is so short that, as one said, there is not enough in the market to make a price on. Salmon are liable to soar, since dealers agree that only a heavy rise of the Columbia will relieve the situation. It would take two or three feet rise to help out, which would bring in the silver-sides.
 Without changing quotations on general groceries, white figs in pound packages, tend higher, and also bulk figs. The free seal on the Snider catsup has been withdrawn. There is also a slight rise in canisters, covered however in the quotation change of 1 to 15 cents. The advance is on electric light, paraffin and hotel grades.
 Hops in the forming market, ruled 1 cent off from the high point.
 The heavy, steady trade, left quotations practically unchanged as follows:

BALLIN ON THE DRYDOCK

Says Newspaper Controversies Are Dodging the Issue.

Fred A. Ballin, naval architect, does not like the newspaper controversies which have been going on relative to the drydock situation. He says that neither side is talking on the real question at issue. Here is what he says:
 "The question of union or non-union labor to be employed on the construction of the proposed dock should not be made the cardinal issue. The Port of Portland represents the City of Portland in the disbursement of money here. The members were elected by the people and for the people first, last and all the time, and if the citizens of this city and state pass a law or ordinance that eight hours constitute a day's labor, the Port of Portland has no right to invite or accept outside bidders on public work, if such outside bidders are not subject to the same restrictions as regards hours of labor. Doing so puts a penalty on Portland contractors who want to live up to the city ordinances."
 "Eight-hour law. If eight hours is not to be considered a day's labor, why not abandon it in every other public employment? If the Port of Portland wanted to guard the interests of the city and at the same time of the contractors, they should have mentioned and stipulated that Portland contractors, employing Portland labor, would be given the preference of outside bidders to the amount of the difference of wages and hours of labor accepted here and in vogue elsewhere. If our own workmen, who are directly and indirectly contributing to the collection of this money on our own work, we had better abandon all further efforts by the Board of Trade, Chamber of Commerce and kindred institutions to induce outsiders to come here for manufacturing purposes."
 "Offer water free. The Town of Weston would encourage building."
 "Weston, Or., Sept. 27.—An ordinance has just been passed by the City Council and approved by the Mayor, which provides for the granting of free water for household use for the period of ten years to all persons building houses to cost \$300 or more before April 1, 1903. Its object is to stimulate building and thus provide homes for people who desire to take advantage of the State Normal school and public school facilities at Weston. The measure was petitioned for by 15 property owners and citizens and was passed in the council by a vote of four to two against it."

RATE WAR IN MEATS

Probable Outcome of Butchers' Strike on the Sound.

SEATTLE, Sept. 27.—The Retail Butchers' Association, comprised of the butchers handling Frye-Bruhn meat, are seeking cover.
 At a meeting of the Association the cry for help was wafted to the ears of Chas. Frye and he was informed that as a result of the fight being made on his firm's shops by the unions in the city they are running at a great loss. They demanded that Mr. Frye do something for their relief at once or they would be forced to throw up the sponge.
 Mr. Frye then intimated that he would cut the wholesale price of meat to such a low figure that they could sell it at prices that would make it impossible for the fair shops, which refuse to handle the boycotted meat, to compete with them.
 This promise to create a rate war in wholesale meats, as the other wholesalers intimate that they can meet any price Frye-Bruhn may make. But if they do not, Mr. Frye's scheme to give the Retail Butchers' Association relief promises to be a failure, regardless of his cut.

PATTEN IS EASY

Big Corn Gambler's Long Profits.

STOCKS PICKING UP

General Commercial News of the World's Big Markets.

Furnished from Special Wires to Bolton de Ruyter & Co., 102 Third Street.

CHICAGO, Sept. 27.—Patten is betting his profits in the December corn. Since he began accumulating a line six weeks ago prices are up almost 8 cents, so that he and the other December corn bulls have profits to bear. It looks as if the bull campaign will accumulate an imposing December corn line, and then to leave the market alone to trust to the corn not grading in any quantity, and to let the shorts do the best they could. The December corn buying has been so vigorous during the past six weeks the long line must be about large enough now to begin putting this line into operation, let the shorts do the worrying.
 While the popular purchase in corn appears to be the December, the popular purchase in oats by the bull interest is the May. There is not the same problem in regard to grading of oats, there is in regard to grading of corn. As the May crop was estimated at 1,200,000,000 bushels, which is smaller than the 1901 corn crop, which was estimated at 1,400,000,000 bushels. The situation so far as corn supplies goes should have been about the same as 1901 as at present.

Stocks Were Easy.

NEW YORK, Sept. 27.—The Times says: "Perhaps the most noticeable development of the day was the easy manner in which prices advanced, any active demand disclosing a very limited supply of stocks. The close was near to the best for the day in spite of profit taking sales throughout the list. The chief helpful factor of the day was somewhat easier tone to money market. It is fairly a fact that the money market has been greatly relieved by the action already taken by Secretary Shaw. The buying in St. Paul was by Standard Oil brokers and the impression grows that the purchases are largely for the seasonal account of William Rockefeller and H. H. Rogers. The report persists that valuable rights are shortly to be forthcoming in the stock. Well-informed quarters, however, report that such rights if there be any, will include the offerings of new stock at an low a figure as par is regarded as ridiculous."

New York Summary.

NEW YORK, Sept. 27.—American stocks in London are steady at about parity for the day in spite of profit taking sales throughout the list. The chief interest payment on United States Steel issues to relieve the money market. Wash report shows about a 1 per cent advance on securities. It is reported that St. Paul will issue \$25,000,000 new stock with rights. It is not expected Secretary Shaw will get any considerable quantity of bonds at the price bid. Good statement is expected. Dunn's review says the general confidence is unshaken in spite of money market and scarcity of fuel.

J. HENRI KESSLER, M. D. MANAGER THE OLD ST. LOUIS DISPENSARY Cor. Second and Yamhill Sts., Portland, Or.

Look Here, Young Man,

If you suffer from any of the weakening effects of disease caused by your boyish pranks and contagion or you may have been swindled by quack doctors, but don't forget the fact that you must be cured, it never gets well itself, the drains and losses continue and unless stopped will land you with thousands of others in the asylum or the grave. A great number of divorce cases if the underlying cause could be investigated would be found to be the incompatibility of physical conditions. The time is coming when it will be necessary for a medical and physical examination before a marriage certificate is granted. The weakness and diseased condition of people will make such a course indispensable for

protection to the children of future generations. Already the physical condition of every domestic animal is carefully graded up except cats and human beings. Many young men have consulted old Dr. Kessler before getting married. Good health assures happiness in this world.

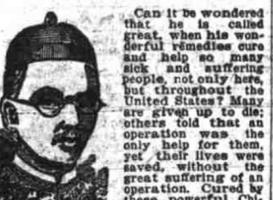

Women.

We desire to say to the women we know from many years' experience that many are suffering untold agony from complicated diseases that this old St. Louis Dispensary treats hundreds. The ladies' department is full all day during office hours. We can refer to many whose life was a drag of pain and nervousness until we cured them. Private rooms for ladies. If you can't call write your condition. Our home system of treatment has cured hundreds. Address with ten 2-cent stamps.
