Officers of Both Countries to Investigate Ship Yards---Significant Move.

NDON: Oct. 17.-Al most significant which has been made in British and ese naval circles has just come to ight and has created somewhat of a sention among some of the other powers.

It has just been announced here that extrangements have been made for a num-ber of Japanese officers to visit the British dock yards, while at the same time British officers will visit the ship yards of Japan with a view of making a thorough inspection of the equipment of the yards, etc. After the situation has thoroughly been gone over by the inspecting officers they will make reports to their respective governments as to the best means of regulating the balance of

power in the North Pacific. This indicates that Japan and Great Britain will make a great effort to secure absolute control of the North Pacific situection by working in harmony, and that Russia is to be kept from making any further encreachments either in China or Manchuria. What view the Czar will take of this action and what attitude he will assume in resisting England and Japan is hard to surmise. However, it is not probable that he will give up a position he has so long coveted without making a struggle.

The control of the North Pacific is most Important, for it is an undeniable fact that the government which can establish sufficient force to command these waters will have a grasp on the Far Eastern situation which will be hard to shake off.

#### BIG DEMAND FOR OIL STOVES

NEW YORK, Oct. 17.-There has been such a demand for oil stoves for cooking and heating within the last few days that the manufacturers are unable to fill the orders that have come to them. Many of these orders are from out of town. Any kind of an off stove is acceptable, whether it is up to date or the kind used at the time of stores were first invented. And in a majority of cases those who are buying them are paying 30 per cent mere or the manufacturers than they paid last bean when there was no coal strike.

#### SOFT COAL STOVES.

CHICAGO, Oct. 17 .- Stove manufactur ges of the Cantral West are swamped with business. The demand for soft coal stoves and oil and gas heaters is the greatest ever known. Dealers predict' a serious shoringe of soft coal stoves if the anthracite strike should continue. The demand for hard cont stoves is scarcely large enough to warrant manufacturers In placing them with the jobbers and retailers. The demand for soft coal stoves is equaled by the demand for oil heaters. The Chicago manager of the Standard Dil Company doubts the ability of the sompany to meet the demand

Three Attempts Yesterday to Destroy Fort Stevens.

(Journal Special Service.) ASTORIA Oct. 17.—Incendiaries are again making an effort to destroy Fort Stevens, the new Government post at the mouth of the river, but have succeeded thus far only in destroying some old buildings. The first plan to destroy the fort by fire, some three months ago, did not result in the wholesale damage in-tended, the blaze having been ex-tinguished before it had got under headway. For the second time, attempts to set fire to the post were made yesterday morning and during the day, and this time the incendiaries succeeded in completely destroying one building. The renewed attempt has created much excitement at the post, and every effort will be made to

bring to justice the guilty party or parties.

Three separate fires were started yesterday. The first place was discovered shouly after midnight and was in an old building that had been used as a storehouse. The building was filled with valuable supplies and the loss would have proved heavy had not the troops succeeded in extinguishing the fire. The incendiaries had carefully planned their work, and it was only after the most dili-gent efforts that the fire was got under control. The building was damaged, but the contents were not affected by the

The second blaze was discovered at 1 o'clock yesterday morning, in the newly constructed lavatories. The destruction of these buildings was threatened for time, but the efforts of the troops were again successful in preventing great loss.

The third fire occurred at 11:30 in some old buildings used as pumping stations. The last fire was burning fiercely before it was discovered, and, although the troops responded promptly and bent every energy, the buildings were entirely gutted, entailing outsiderable loss. An exact statement of the total loss from the fires could not be obtained, but it is probably between \$3000 and \$5000.

Major Humphries, commanding at Fort Stevens, is at sea for an explanation of the man or men who have been starting the fires within the fortifications. He stated yesterday that he believed the incendiary must be insune, as no reason for the effort to destroy the post could be found.

The officers will conduct a most search, ing examination and leave nothing undone to find the men who are bent upon the destruction of one of the bestequipped forts on the Coast.

Waterville.

WATERVILLE, Wash., Oct. 17 .- The saddest accident that has ever befallen this community, occurred Wednesday and cast a gloom ever the entire vicinity.

Leonard Pepper, of this place, and his friend Tom Farrell, Jr., of Entrat, who was visiting him, were caught in a slide while loading sand a mile and a half northwest of town, & number of people have been hauling sand from this place and had dug back under the path or bank which projected over where the boys were working, which caved in and buried them. They started in the morning for a load of sand and not returning to dinner, Leonard's father became unensy and sent a man to learn the cause of the delay. He found the team stand ing by the pit. No boys were in sight and the bank fallen in. He reported what had happened and a number of town people went to their rescue. Both boys were found beneath the sand dead, and had

Important Mineral Discovery in Josephine County.

GRANTS PASS, Oct. 17 .- A new copper district has been discovered in Josephine County and is located in the Butcher Knife district on Upper Slate Creek. A few weeks ago this district was naught but a wilderness, secluded and unknown; now there are seven mines or cialms being developed there, and a number more have been staked out and will be worked later on. Each of these claims are located on the same great ledge, the values, of which are carried in sliver and copper. A. H. Ramsey, a miner of that section and the owner of one of the claims, came into Grants Pass yesterday bringing with him a quantity of ore from the newly discovered mines. "The plasterers employed at the new Masonic Temple in this city went on a strike this morning. They have been getting \$4 a day, and asked \$5. The contractors refused to grant their demands, and the plasterers walked out. The Rtike was made independent of the labor unions, and concerns this one building only."

In regard to the above we wish to say that we called on the Gregonian reporter and gave him a true version of the affair, and he agreed to correct it, but so far has failed to do so. In the first place, wages had nothing to do with the trouble. While we were paying \$4 per nine hours, they were earning about half that amount, and would not or could not do a day's work, and the quality of the work was the roughest, so we thought it would be to our interest to make u change. ### THE GAMBLING WAR

On in Earnest-Dealers Have Another New Scheme.

The first gun in the slot machine was was fired this morning. The battle was not spened by the Chief of Police or the Sheriff, who are the peace officers to whom the public looked for action. Constable Jackson and Deputy Adkins, of Justice Reid's Court, are the officers who started the campaign. They have been holding back for several days, in the hope that the officials in higher po-sitions would act. They were under the impression that those officers in high authority would shake off their apathy and no longer over-ride the will of the people and perisist in violating their oath of office. When they became satisfied that the negligence would continue, and that the enforcement of the laws was not considered by those who should invoke them, they decided to take action on their own responsibility.

METHOD OF PROCEDURE. The proprietors of eigar stands and saloons where slot machines are operated, were told to remove them. They were given to understand that if the macines were in the future found on their counters they would be selsed and ar-rests made. Most of the proprietors complied with the order with a show of cheerfulness, and expressed the opinion that the removal of the machines would only be temporary.
