MR. WINTER'S EULOGY OF RICHARD MANSFIELD.

Mr. William Winter, the dramatic critic of the New York Tribune, whose voice has been so often raised in biting protest against the "degeneracy" of the modern drama, has his eulogisms as well as his criticisms.

"The man of original genius—such a man as Richard Mansfield is seldom entirely understood and rightly and adequately appreciated, by any large number of persons, in his own time.

WHAT THE OREGON MINERS ARE DOING

Double Eagle Group Liable to Show the Next Great Strike in 1000 Foot Tunnels—Psyche's Report.

The writer takes particular pleasure in calling attention to the Psyche mine for the reason that two years ago he endeavored at the request of a friend who owned it, and was at that time hard pressed financially, to sell it.

Those rich specimens of sylvanite ore coming from the Jimmy #9 property of the Greenhorns, and recently exhibited here, are taken from a narrow streak that was opened in a shaft at a depth of 30 feet.

Because of the narrowness of the ore body is not particularly desiring. The rich sylvanite streaks at other great camps are said to be very narrow at places, yet they have been sufficient to induce investors to sink great shafts.

Grant Thornburg of Granite has secured the property, and is having the development done. Mr. Thornburg stated yesterday that 15 feet had been sunk on the sylvanite streak, and that in the lower portion the ore was about 1000 feet above.

From three to four inches of this shows the white metal in abundance, and is developing to be a fine sinking proposition, and work will be hastened. Several deals are on, and it is generally understood that the property will be taken up by some people with Eastern backing.

After Phoenix vein. Sinking has begun on the Eldorado, of the Greenhorns, owned by A. E. Dagnan and Sullivan Brothers.

The Eldorado is in charge of the work. The Eldorado is in charge of the work. The Eldorado is in charge of the work.

Copper With Depth. It is well known that the Tempest carries good copper values. Other more recent properties also have the tendency.

ON THE SUMMIT. Judge Fawcett stated that the upraise started from the level of the crosscut to connect with the shaft, was completed during the week.

GAVE IT BACK. A NEW ENTERPRISE. He Did Not Mean to Be Dishonest Man. Portland Soon to Have an Electric Sawmill Plant.

One of the leading water-front citizens, who is adverse to appearing in public print, today said: "Preparations are being made on the quiet to establish here soon a large sawmill, the motive power of which will be electricity."

COURT NOTES. Carl Flesser, a cook by occupation, has produced will left by Frederick Wald, who died several weeks ago, and there is strong possibility that Wald's four children may contest the document.

NEW TOURIST SERVICE. St. Louis and Other Southeastern Points Are Reached From Portland.

QUICKEST EAST. The time of the O. R. & N. "Chicago-Portland Special," which leaves Portland every morning at 9 o'clock, is 70 hours.

THE IDEA. Sharpe—Some one sent that guy widow a scythe. I wonder what he meant? Wheaton—Probably an intimation for her to cut down her weeds.—Chicago News.
