PIANO LESSONS. W. GIFFORD NASH, 109 10th St.; terms upon application. Beginners taken.

LABRADOR DOGS. It is a remarkable fact that while virtually every resident of Labrador has been bitten by the savage dogs of that region, there has never been a case of hydrophobia there. This fact is attested by Dr. Greenfield, the superintendent of the English medical mission there, who has now spent 10 years on the coast and treated 1000 patients. His theory explains this singular circumstance; it may be due to climatic conditions, but it is more probable the result of the wolfish strain in the breed of the dogs. The extraordinary part of it is that such conditions should be found allied with the most absolute savagery on the part of the animals. They are the fiercest of any breeds trained to be of service to mankind; they will attack anything they believe weaker than themselves, and they are only kept in subjection by the unceasing use of the lash.

They are a cross between the wolves and the earlier Newfoundland dogs brought there, and by this time almost all the wolfish characteristics are eliminated. The coast folk find them indispensable, yet live in fear of them. No one ventures abroad without his whip, every woman carries a stout club; it is death to a child to get among them. Only last month the little son of the agent of the Hudson Bay Company's post at Sandwich point was attacked by two of these brutes. Within a minute they had inflicted over 60 bites on the child, and but for the devotion of a pet retriever dog and the father's prompt flying to the rescue, the child would have been torn to pieces. He was taken to the hospital at Indian Harbor, where he is making quick recovery. This was a more fortunate outcome than was the case at Cartwright last year. A child wandered there home, and when the distracted mother flew to where a pack of angry dogs were ravaging she found nothing but the bones of her offspring. A little girl was so badly mangled by them at Panchbow last year that she never recovered.

Every year brings its quota of these mishaps, while there are scores, if not hundreds, of cases of adults being bitten. It is impossible to keep sheep, goats or poultry on the coast because of the brutes, and their extermination would have been effected long ago were it not for the fact that they are the only means by which communication is kept up with the coast. There are no horses on the coast, as there is nothing to feed them. Teams of dogs, attached to sledges, are the means of travel. With them the seagoers go from harbor to harbor, and the sledges are pulled by the interior haul firewood from the forests and convey peltries to the Hudson Bay Company's posts. These dogs play the same part in the economy of the coast as the pack animals do in the interior. The characteristics are the same, though we do not hear of such instances of their savagery.

Money Everywhere. She also secured a few minor sums in other parts of the rooms she occupied. Early Thursday morning Mrs. Stankavitz went to the residence of her daughter, Mrs. Elchorn, 501 South Broadway, newly erected, to assist her in becoming acquainted in her new home. As soon as she started from an engine set fire to the apartment house at 522 South Broadway.

It spread rapidly and three fire companies were soon on the scene, but owing to the small hole in the plastering, the fire broke out in the building. Mrs. Stankavitz was notified of the conflagration by neighbors.

"My money! My money!" she exclaimed, as she ran to the scene. Her money had been locked in the window in which she was sitting. As soon as possible Mrs. Stankavitz told of the accident, but only \$25.50 was found. The fire was in the billiard room, which Mrs. Stankavitz had rented. The \$25.50 was found in the front room.

Mrs. Stankavitz was so overcome that she was unable to disclose all the hiding places. Diligent search failed to reveal the secret of the savings. As soon as the money in gold, she said to the Post-Dispatch Friday morning: "Whether it was burned or stolen can only be told after an investigation. The building has been closed up until something can be learned."

Miss Louise Bertram, her 20-year-old granddaughter, who acted as interpreter, is the heiress. She is Mrs. Elchorn's daughter by a previous marriage.

"I had another idea, but I was told that what she would be mine in time. It was to be used, she said, in providing for my mistress in the event that I ever married and to assist in furnishing the education of my child. I was told that when I was present it was to be devoted to the purpose of extending my musical studies."

MAN IS A GREAT THING. Here is what one of our exchanges says of man: "Man that is born of his parents is of few days and full of bane. As a bald-headed infant he lies in his cradle and bickers up his heels with colic and much squawking. He getteth to school when a youngster and getteth the seat of his pants hammered for something he did not do, until he is sick at heart and unable to sit down. He groweth up like a weed in the front yard and soon reaches the age when he is composed largely of feet, freckles and an appetite for pie. About the time he gets too long for shorts and not long enough for long ones, he getsch away to college and leatheth to monkey with a three-dollar mandolin and tear off big words. He marryeth a sweet young thing whose papa is supposed to be president of the First National Bank, but whom he after ascertaineth couldn't buy the milk near a county fair. He worrieth along from year to year, gradually acquiring offspring until his family begins to resemble a Sunday-school class the week before Christmas. About the time he has acquired enough children to make a man's waist he is hurried away with rheumatism; his children have a knock down and carry out over the terms of his will. His sons blow in his estate on bad whisky and plug hats; his wife puts on a finishing touch of his career by marrying the hired man."

HEARS WITH LEG. One of the strangest and most unexpected of uses to which one could imagine a leg being put is that of an organ of hearing. Yet such seems to be the case at least in the function of the forelegs in the cricket. On the outer side of a tibia a small oval space may be seen, in which the strong armature which covers the rest of the body is reduced to a thin and membranous condition, making thus a sort of window, or drumhead. Communicating with this, inside the leg, are the ends of a nerve, and it can hardly be doubted, therefore, that the whole apparatus constitutes an auditory organ.

WOMEN AS GUIDES. Of the 1,500 registered guides in Maine only three are women, and only one of the trio is regarded by the men as thoroughly competent. This is Mrs. J. S. Freese of Riverton, who has shot every kind of game to be found in the Maine woods. She is also an expert at tanning skins, and has in her home some beautiful specimens of her handwork. Mrs. Freese hunts all through the winter, spending weeks in camp during the coldest of weather.

MONEY TO BURN

She Had \$700 That Suddenly and Mysteriously Disappeared.

SHE HID IT IN BIG BUNCHES

Mrs. Stankavitz Has Money Which She Will Not Trust the Bank With, So Hid it in Various Places, and Most of It She Thinks She Has on a String, but is Paralyzed When the Brutes no Longer Connect.

(Chicago Journal) A deep and abiding distrust was one of the causes of the loss of over \$700, the savings of Mrs. Louisa Stankavitz, 522 South Broadway, in fire which destroyed the interior of her home was the other.

There is a mystery concerning the disappearance of the money, two rolls of greenbacks, which the police are investigating.

Mrs. Stankavitz is 62 years old. Her husband died in Germany a quarter of a century ago. She has resided in Carondelet for 18 years, having a daughter there who is the wife of John Elchorn, a prominent coal dealer.

Mrs. Stankavitz is a woman of rugged constitution and independent habits. Although her daughter frequently importuned her to live with her, Mrs. Stankavitz preferred her own home.

A number of years she was employed in the Old Ladies' Home on Chipewa street. Her wants were few and she accumulated several thousand dollars. The larger portion of her savings were invested in real estate, but she also had nearly \$1,000 in currency and coin.

After leaving the Old Ladies' Home she rented apartments in a brick tenement located at 522 South Broadway, occupied by 16 families. How to secure the money was a question. Finally she hit on an excellent expedient, which proved satisfactory for several years.

Above the window sill in the kitchen was placed a large bundle of bills. The aperture was visible only upon the closest investigation. She converted the two bundles of currency, \$50 in one and \$20 in the other. Around these she tied long strings and suspended them with hooks to the ends of the strings were fastened without to the top of the window sill, and were so cleverly concealed that she deemed no one could detect the article.

Money Everywhere. She also secured a few minor sums in other parts of the rooms she occupied. Early Thursday morning Mrs. Stankavitz went to the residence of her daughter, Mrs. Elchorn, 501 South Broadway, newly erected, to assist her in becoming acquainted in her new home. As soon as she started from an engine set fire to the apartment house at 522 South Broadway.

It spread rapidly and three fire companies were soon on the scene, but owing to the small hole in the plastering, the fire broke out in the building. Mrs. Stankavitz was notified of the conflagration by neighbors.

"My money! My money!" she exclaimed, as she ran to the scene. Her money had been locked in the window in which she was sitting. As soon as possible Mrs. Stankavitz told of the accident, but only \$25.50 was found. The fire was in the billiard room, which Mrs. Stankavitz had rented. The \$25.50 was found in the front room.

Mrs. Stankavitz was so overcome that she was unable to disclose all the hiding places. Diligent search failed to reveal the secret of the savings. As soon as the money in gold, she said to the Post-Dispatch Friday morning: "Whether it was burned or stolen can only be told after an investigation. The building has been closed up until something can be learned."

Miss Louise Bertram, her 20-year-old granddaughter, who acted as interpreter, is the heiress. She is Mrs. Elchorn's daughter by a previous marriage.

"I had another idea, but I was told that what she would be mine in time.
