WHEAT SHOWS A BETTER FEELING

Supply of Valley Grade is Es-Millers Are Paying Higher of the 1902 crop unsold. Prices—Crop Prospects.

Valley Wool is Selling Freely 16 to 173 Cents—Eastern Oregon is Dull.

VALLEY WHEAT IS SCARCE The supply of available Valley remaining unsold is very and that market shows tendency for an early ad-

The local wheat market is quite strong, with the demand for grade much larger than the supply. cording to some of the larger users of this grade, the supply has about run out and what little stock remains in strong hands and will not be sold unless the market makes some material advances. "This is quite likely," said a local miller, "as the mill men will have to pay higher quotations if they expect to get supplies." Even at the higher quotations it will be a spirited contest for the purchase of stock. Walla Walla and Bluestem grades are both firm at usual quotations. Some of the local small millers are paying as high as 77 cents

Prospects for Wheat.

The prospects for an average crop of fall sown Valley wheat is very small indeed. The weather at the time of sowing was rather rough, and it was this fact that caused such a reduction in sowing operations. The sowing of spring variety was, however, more liberal and the crop condition at the ent time is considered favorable for the average year's yield.

Valley Wool Is Selling.

Valley wool is finding a ready sale at quotations ranging from 16 to 17 1-2 cents a pound. Shearing operations in the Valley have been about half completed and with a continuance of the present market it is present market it is expected that the season will be concluded within a short

Wool Crop Is Light.

In the Valley the wool crop for this season will not be quite as heavy as on ordinary occasions on account of the lightness of this year's fleece. The grade is in much better shape and with a continuance of the present market it is expected that the Valley growers will not suffer any reduction in their profits this season from that of seasons when the fleece is heavier.

Eastern Oregon Sells Slow.

Eastern Oregon wool is, however, a

expected that there will be much change in the call for wool. Quotations on the Eastern Oregon wool ranges from 10 to 13 cents a pound, according to the grade.

Steamer Elder Arrives.

steamer George W. Elder arrived from San Francisco last evening bringing a large cargo of assorted vegetables and small fruits. Among the vegetable truck received large consignment of Mississippi tomatoes for various Front street merchants, the stock being quoted on the street at \$2.50 per 20-pound crate.

Lemons More Plentiful.

The arrival of the steamer was also

McKinley Mitchell says of the hop outlook: "If the hop market was about

reports of bad crops throughout the country the New York market is in better shape their for several months and advances in quotations would in

come wholly unexpected. Luce Won't Sell.

A. J. Luce of New York, who has a house in this city, has instructed his local agent to hold all his remaining Ravages of Dog Fish Play stocks of the 1902 crop of hops. Mr. Luce was a heavy seller several weeks ago and was at one time willing to dispecially Short and Local pose of all of his stock at 20 cents a pound. The firm has about 400 bales

Eggs Even Righer.

Egg prices continue to keep on the upward move and this morning the very best candled stock was sold as high as 18 1-2 cents a dozen. Prices during the day ranged from 17 1-2 cents at Quotations, Ranging From for the ordinaries to 18 1-2 cents for the bests.

Today's quotations, as revised, are as follows:

WILL BE SMALLER

Havoc With the Fishermen's Nets.

BOSTON. June 10 .- Several of the crews of the mackerel netters were home several days ago, and while some schooners have made big hauls, the fieet as a whole has not done well for spring. The fleet has been large, 150 or more, and those who have settled have shared from \$50 to \$200, small It will be recognized that \$50 is a low figure to share,

The worst drawback has been th dog fish, which have almost driven the fleet at times. Nets have been badly torn and fish have been mutilated. One sloop had 300 fish bitten out of 1,000 taken. At the present time only a part of the nets are set, the ravages of the dognsh are so serious.

The fishing has been spotted, and most of the boats were compelled to fish three or four nights for a fare. have nad uniformly good weather, which has enabled them to fish con-With bad weather only a part of the nets could have been used Some of the fleet did well at the start but practically nothing later. There has been a general impression that a good body of mackerel has laid to the southward and that seiners could have done well fishing nights.

News from the vicinity of Block Island and No Man's Land report inilcations of good schools of mackerel Those now being taken near Block Island are of good size, running 300 or 400 to the barrel. New Irish salt mackerel are quoted at \$16 a barrel.

DEMORALIZATION OF THE STOCK MARKET

Quotations Today Lower Than For Five Previous Years —Caused by Floods.

(Journal Special Service.) NEW YORK, June 10 .- There is n et-up in the demoralization of the stock market today, and stocks are now lower than in five years. Many large speculators have been hard-hit. There is no weakness in banking manifested, but the cause is attributed to the loss by flood, fire and the unfavorable weather.

SHANIKO WOOL SALES

SHANIKO, Or., June 10 .- The first ealed-bid wool sale in this city was neld yesterday and of the 2,500,000 pounds held in storage in the warehouses here, about 700,000 pounds were sold by the growers. The price paid ranged from 11 to 15 cents and the purchases were by representatives of the following firms: Whitman, Farnsof New Jersey, Hallowell & Donnell,

Eastern Oregon wool is, noweled allow seller when compared to the local variety. The wool growers of that section have come to the conclusion that they are entitled to more money than the prevailing prices will admit of the dealers paying and some of them will endeavor to hold until there is some prospect of a better market.

FARMERS SHOULD **GRADE POTATOES**

Past Season Has Shown the Folly of Mixing All Sizes and Grades in One Sack-Grangers Lose Money.

Oregon Burbanks Sent to All Points On the Pacific Coast-California Growers Plant Seed From This State.

The past season has not been one of very great profit to the growers of potatoes in this state. Prices, except at the fore part of the season, have gone down steadily until at the close of the year quotations were so low that it did not pay the farmers enough to haul theft stocks to the market; not alone pay them for the expense of planting and cultivating

According to some of the best in formed potato men in this city the chief cause of the inability of the Oregon farmers to get the very top quotation for his Burbanks is due to the fact that in a majority of the shipments made to the South the stock was not properly graded, all sizes of potatoes being in- raising runds sufficient to have a neat cluded in one sack.

Oregon Burbanks Best. The Oregon Burbank is noted for be ing one of the finest grades of potatoes raised in the West, and when properly sacked is able to command the top quo tations over all competitors. The California growers have become aware of this fact and each year many additional acres of Oregon seed Burbanks are planted along the river districts of that state. The transplanted article bears all right for one and sometimes two years and then the grade of the stock

There is a large shipping demand for Oregon stocks from all parts of the Pacific Coast each year and there is no doubt that the farmers would secure higher prices if the stock was not so badly mixed.

RISE IN THE SNAKE HAS BEEN CHECKED

Upper Columbia Rising Swiftly -Willamette Will Reach 24 Feet Wednesday.

The river outlook is about the same as yesterday. The Snake River is at a standstill and the upper Columbia is rising rapidly. The temperatures this morning over the upper Columbia and the Snake River basins range between worth & Thayer, Botany Woolen Mills 48 and 64 degrees, and the weather is partly cloudy. The temperatures dur-ing the next few days will average

rate of about a foot a day. The upper Columbia at Northport, the most Northern station, has raised nearly 25 feet since the 15th of May, and 23 feet at Wenatchee since the 14th of May. river gauge read as follows at the dif-

ferent stations this morning: Change Stage of Stations. Portland. Or. The Dalles, Or. ... Umatilia, Or. Northport, Wash. ...

ADVERTISE OREGON IN EASTERN CITIES

Million Attractive Booklets to Be Issued For Free Distribution.

A plan will soon be adopted by the Oregon Information Bureau, the Southern Pacific, O. R. & N., Astoria & Columbia River and several of the combodies of the city for advertising Portland and Western Oregon more

extensively than heretofore. It is proposed to issue 1,000,000 copies of a booklet that will elaborate on the many scenic, climatic and agricultural advantages of Oregon. These will be placed in conspicuous places in the large Eastern cities for free distribution. It has also been suggested that Oregon agencies be established in Chi-

cago, Omaha and Kansas City. To cover the cost of compilation and printing it is thought about \$5,000 will be needed. The railroads have offered to stand a part of the expense if the commercial bodies will aid.

Oregon is one of the least advertised of Western states. The desirable immigrants who have located in Western Oregon during the past year in greater numbers than ever before is attributed largely to advertising.

The directors of the Oregon Information Bureau will meet the first of next week and formulate a plan for and comprehensive booklet issued. The plan will be submitted to the several commercial bodies and their financial assistance solicited.

New Canned Goods Tariff.

R. H. Countiss, agent of the Transontinental Freight Bureau, in San Francisco, has forwarded to local railroad offices a bulletin announcing duction in freight tariffs on cannery products from the west coast.

Canned goods will hereafter be car ried to Missouri River terminals and certain parts of Texas at a flat rate becomes climated and loses its original of 75 cents per 100 pounds. This will apply over the Northern Pacific, Great Northern, O. R. &- N. and the Burling-The Columbia River canneries will be beneficially affected by the re duction.

A Remarkable Eup.

The New York Central has issued an attractive folder giving the details of the remarkable run made by the Twentieth Century Limited recently between Cleveland and Duane Park, about 30 miles east of Chicago. The total distance covered was 307 miles erator plant, thus affording work for its and the actual time occupied was 292 minutes. This is considered the most remarkable fast trip ever made in the United States, with the possible excep-tions of the run from Chicago to Buffalo over the same tracks in 1893, and the long run of the Burlington train from Chicago to Denver several years ago. The last mentioned, however, were light trains.

The average speed for the entire distance was 66 miles miles an hour. On reaching Cleveland from the East the train was 1 hour and 32 minutes late. When the stop was made in the Chicago Union Depot, about five hours later, the train was on time. Between Toledo and Elkhart a speed

of 90 miles an hour was reached and maintained for some time. In addition to the regular coaches there were four Pullman elbegorn all well filled: "

Time Was in Sight.

The following stages will occur at time war and possibly a rate war Portland: Thursday, 21.07; Friday, 2mong the lines operating between St. 22.03; Saturday, 22.08; Sunday, 23.05, Paul and Chicago has been fomenting and by Monday afternoon or Tuesday over the recent action of the Northwestern and Milwaukee in reducing running time of their fast trains, Last Sunday the Burlington cut down its running time 55 minutes in competition with the lines mentioned.

The passenger department of the Wisconsin Central has notified the lines that unless the old schedules are reinstated that it will notify the Western Passenger Association that it is entitled to a differential of \$1.50, owing to the time handicap. The further statement is made that otherwise rates will be cut to make up

The Wisconsin Central and the Minneapolis & St. Louis are generally considered the long lines between the two cities. Neither has made any move yet the direction of shortening time. Published receipt and net earnings for the weeks since the Milwaukee changed the schedule show that that line and the Northwestern have been doing a larger business than at any time previously. It is reported in Portland today that the Milwaukee has gone a step further and has equipped its fast mai with sleepers, giving two fast night trains which will run on the schedule of the Pioneer Limited.

Western railroad men expect some interesting developments before difficulties are finally adjusted. The present running time of the several roads, together with the distances be-

tween St. Paul and Chicago, are as fol-lows: Omaha, 430 miles, 12 1-2 hours; Milwaukee, 420 miles, 12 hours; Great Western, 420 miles, 12 hours; Great Burlington, 442 miles, 13 1-2 hours; Wisconsin, Central, 475 miles, 14 1-2 hours; St. Louis, 490 miles, 13 1-2 hours; Rock Island, 522 miles, 16

Bailroad Motes.

W. C. Seachrest, Coast agent of the New York Central lines, left last night for Eastern Oregon and Washington. He expects to return the first of next week.

J. G. Blabon, fourth vice-president of the Great Northern, who has been in the city since Monday, left today for the Sound cities.

E. R. Ingersoll, general freight agent of the Lake Shore, with headquarters in Seattle, is in Portland. Ed Holton, formerly Tacoma agent for the Southern Pacific, but now engaged in business in Moptana, was in

the city this morning. A. B. C. Denniston, general western passenger agent of the Great Northern is spending the day in Portland. Mr Denniston's headquarters are in Seattle.

COFFEE FARMS RUINED.

Guatemalan Recently Arrived at New Orleans Says That the Coffee Crop is Short,

NEW ORLEANS, June 10:- O. Thiel of Guatemala City, Guatemala, who recently arrived with other citizens of that country, states that the famous cof-fee lands about Mount Santa Maria have their machinery. The syndicate's land that country, states that the famous cofnearly all been covered with dust and ashes to a depth, in many places, of

Clouds of dust and smoke are still flyng as they have been periodically ever since the first eruption, shortly after that of Mont Pelee, in Saint Pierre.

What troubles planters in Guatemala is that it will be several years before this land can again be put into coffee Thiel estimates that the coffee crop of Guatemala is fully 250,000 quintals short. This means that there will be 25,000,000 pounds less of coffee in the world's markets this year than last.

GOVERNMENT WILL PLAN

WASHINGTON, June 10 .- The largest peach orchard in the South will be planted in Georgia. The climate of Georgia is exactly suited for the growth of peaches. The commission which was sent by the company that is going to operate the orchard favored a site one mile north of Americus, Ga., mously, and 100,000 trees will shortly be planted on this ground.

During the winter season and while the peach orchard is young, the comwill operate a canning and refrigemployes all the year round

KAYAK OIL FIELDS ARE A BIG FACTOR

District Will Make Its Influence Felt in the World's Markets.

SPATTLE, June 10,- The Hayak oil fields will this year, even, prove a big factor in the world's supply of oil, as the quantity is there, and the quality is the best ever found."

Such was the observation of William

Carrington, one of the heaviest operators in the district, where he has been continuously for the past nine months Carrington was a passenger for Kayak on the Pacific Packing & Nav gation Company's steamer Excelsior.
"I found oil," he continued, "from the Martin River, on the west, to Yakutaga on the coast, on the east, and when I left the Lippy Company was down 150 feet with their well and was sinking at the rate of 40 or 50 feet a And at that rate they should have a gusher by this time, as it is nine days since the news reached Kayak.

The Lippy well was sunk about three-fourths of a mile from that driven by the English syndicate. "Superintendent Green of the Alaska Oil Syndicate, when I left, was expectis reached by water from Kayak. Al of the land in the Kayak section shows up well, from an oil production stand-point, On the Eight-Mile River, flowing into the ocean about eight miles east of Cape Sackton, is an exception ally large scepage. Indeed I have seen no better surface showing than that. "Florence Arata, a noted oil expert is in the district, representing the Los Angeles Consolidated Oil Refinery.

declares Kayak the best oil field in world. "There are at least 10 oil experts of international reputation on the ground, looking up this field for Eastern investors. Just now the weather at Kayak is fine. The snow is fast disappearing, though there was more last

winter than in 20 years past. "Kayak will develop rapidly. least 15 large oil developing outfits will be working there within the next 60 days."

One Bottle Cured Him

Chicago. June 11, 1902. Gured His Wife

"My wife has been very bad with kidney trouble and tried several doctors without benefit. After taking one bottle of FOLEY'S KIDNEY CURE was much better, and was completely cured after taking four bottles."

E. C. Watkins, sexton of the Methodist Church, Springfield, Par, writest

A. H. Davis, Mt. Sterling, Ia., writes: "I was troubled with bioney complaint for about two years, but a one-dollar bottle of FOLEY'S KIDNEY CURE effected a permanent cure."

Chicago Business Man Cured
