esting program, consisted of papers by Missona Trueman and Chester Watson, and music by Miss Alda Broughton. The club will be entertained January 19 by Miss Bessie K. Luckey, 707 Marshall street.

The Girls' Club club gave a novel and delightful fancy dress party at Hill Military academy Monday evening, January 4.

The reception parlor was prettily decorated with flags from the ships in the harbor. There were two cozy corners over which were canopies of flowers and Oregon grape. Turkish rugs were spread about the floor. Parsons' Orchestra furnished the music, which consisted of the popular selections. During the evening punch was served from a cozy corner.

All the girls were in fancy costume. Every nation was represented. Some of the costumes were very dainty and pretty. Miss Edna De Bois looked pretty in a dainty little Japanese costume in the pale shades. She wore large pink roses in her hair. Miss Semele Groat was a charming Priscilla in her simple gown of gray trimmed with white. Miss Ethel Shea was bewitching as Dorothy.

Miss Edna represented a pink rose. Her dress which was of pink crepe paper was formed of a series of petals. She wore a large pink hat.

The party was an enjoyable and artistic success. The club will hold its next meeting at the residence of Miss Edna Jeffrey. The club consists of the following: Miss Helen Coman, Miss Edna Cannon, Miss Laura Dunne, Miss Bessie Church, Miss Semele Groat, Miss Evelyn Fairbrother, Miss Edna Jeffrey, Miss Maude Hahn, Mrs. Oscar Overbeck, Miss Lillian Loller, Mrs. H. E. Judge, Miss Blanche Robinson, Mrs. George Gerlinger, Miss Ethel Reid, Miss Ethel Shea and Miss Della Watson.

The Centennial Girls gave an enjoyable and delightful dancing party Tuesday evening, January 5, at Parsons' hall. There were about 200 present.

The hall was beautifully decorated with green and yellow bells with electric lights in the center. A large bunch of Oregon grape with a bell in the center hung in the middle of the room. The stage was decorated with its decorations of palms and bamboo trees.

Parsons' orchestra furnished a delightful musical program. The ladies' gowns were unusually beautiful. It was one of the most brilliant parties this popular club has given. The patronesses were: Mrs. R. O. Stoehr, Mrs. J. W. Gruss, and Mrs. E. Wetzlar.

The Gilbert camp auxiliary No. 1, gave another of their delightful dancing parties Monday, January 4, at Woodmen hall. Everest's orchestra furnished the music. There were 13 dances. During the evening refreshments, consisting of punch, were served.

WOMAN INVENTS A GOLD SEPARATOR (Journal Special Service.) Spokane, Wash., Jan. 9.—Voltaire, the great French philosopher, discovered the principle of electricity while examining the muscles of a dead frog and Mrs. Jerusha McConnell evolved the idea of the Acme gold separator, which, she claims, will revolutionize the world of placer mining, while beating eggs for a cake, at her ranch on the Little Potlatch, a few miles from Juliaetta, Idaho. Yesterday the articles of incorporation for the Acme Gold Separator company were filed with the county auditor, and the company will proceed to place the machines on the market in a short while. The company is incorporated for \$500,000, and the incorporators are Mrs. Jerusha McConnell, J. E. Craddock, D. W. Richardson and G. B. Creighton. Mrs. McConnell, while but an everyday appearing sort of an individual, belies her looks. She was kidnapped when but three years old and has practically had to shift for herself ever since. She moved to California in the early days and has been around placer camps for a great portion of her life. Mrs. McConnell told the following story of her invention last night: "I have been around placer camps for 25 years and acquired considerable knowledge concerning the gravels, and clays that carry gold. My invention consists, principally of a large box, which is a separator, and is copper lined and has four fans inside of it, also copper lined. These copper plates are coated with quicksilver and will catch the gold as it passes through the machine. It is especially adapted to gather the gold from clays and black sands. "Living on my husband's ranch I occasionally felt the need of a little ready money, as ranchers do. One day one of my neighbors went down to the creek and panned out 50 cents worth of gold in an afternoon. We live right on the creek and I used to watch it and think that there were thousands of dollars in the sands right below and I could not get it. One day I was beating some eggs on a cake and watching the creek when suddenly the idea flashed upon me. I went to work and, taking a copper lined wash boiler, began to experiment. I erected a crude working model and taking it down to the creek got out nearly \$100 worth of gold in a short while. I worked upon my plan for two years and have a good working model nearly completed at a foundry here.

"The machine as completed will consist of a heavy steel separator. The dirt will be fed into the sluice by means of a hopper. There will be a number of screens which will separate the coarse gravel from the gold bearing stuff. The feed sluice will empty into the separator, which stands about six feet high. There will be four fans in the machine with openings cut through them so as to break the force of the water. The fans will revolve and catch the gold on their amalgam plates. There are two openings out of which the amalgam will flow. I had to destroy my original working model as I was afraid some one would steal my idea. I will soon have the patents for the separator. One of the best things about it is that the separator can be carried about and set up anywhere. We have three orders for separators already."

GRANTS PASS HAS A LARGE MORAL WAVE (Journal Special Service.) Grants Pass, Or., Jan. 9.—Prompt results have followed the inauguration of the new mayor, H. L. Gilkey, and the new members of the city council, who assumed their offices Thursday night. The city marshal has received instructions to enforce a strict observance of the ordinances relating to gambling and to the Sunday closing of saloons. The gambling ordinance is quite comprehensive and goes so far as to prohibit playing cards for checks or cigars. Proprietors of saloons and other places of resort have been notified that penalties for violation of the ordinances will be promptly enforced. All nickel-in-the-slot machines and other gambling devices are inactive. The ordinance closing saloons on Sundays will be rigidly enforced.

ODE TO A Hot Blast STOVE (By J. J. Kaddery, the alert hardware merchant, Odd Fellows' temple, First and Alder, recounting his experiences in the Klondike.) Great Scott! but isn't it hot! We put one in our store—The thermometer howling 90 below—With symptoms of 'gittin' lower, Bill put in fowill an' teched it off. An' she soon set in to sizz Like a steamboat climin' Chilcote Pass An' see whin' she was biz. It got too hot for a Hottentot, And sot in to paint things red; It melted bullets in their shells, An' baked an Injun's head.

FIRE IS NEVER OUT IN A Cole's Hot Blast Stove

Couldn't get near to shut her off. An' that rose the yelp of "Fire." While miners flattened 'gainst the house 'Jis' to thaw out an' perspire. Couldn't do nothin' till she burnt out. Which she held the fort till night. She melted six feet o' snow outside—With the icicles out of sight. We got onto her ways, an' toned her down; At her best she was too vast; Now nothin' warms our miners' hearts Like Cole's Chicago Hot Blast.

UNIVERSAL STEEL RANGE An' when it comes to cookin' stoves, Although it may seem strange, There's nothin' in the world can teach A Universal Range. It cheers a fellow's heart an' goes 'out To watch the critter bake, An' from Portland town to far Seoul First premiums does take. There's not its like on all the globe; From here to Timbuctoo, It does the home in gladness robe, An' dissipates the blue.
