They all found m as fresh as any one who had rested the night through. H. V. Gates and his wife came to Hillsboro Tuesday evening and sat in the same car with Kennedy. He did not notice that he was jaded in the least. The walk from the station with him until his home was reached displayed nothing that would indicate excessive weariness. THEN DEFENDANT A Prominent St. Louis Specialist, Says Duffy's Pure Malt Whiskey Has Done More For Consumptives Than All Other Medicines.

Gentlemen: Duffy's Pure Malt Whiskey was introduced to me through a consumptive patient whom I was treating. I called on her one afternoon after an absence of about two months and remarked that she was much improved. I inquired after medicaments, etc., and she stated she had been using nothing but good food and plenty of Duffy's Pure Malt Whiskey. Her improvement was so marked that I went directly and purchased it for several other patients suffering similarly, and in a short time they all expressed decided improvement, and from personal observation and physical examination there was great improvement in the lung tissue. Two who had Laryngeal Consumption (consumption of the throat) are now entirely well. I am employing it extensively now in my practice, in La Grippe, Pneumonia, Bronchitis, Anaemia, (Inanition or Marasmus), starvation from lack of assimilation of food, etc.; always in convalescents.

Its agreeableness to the taste and stemach of all people and conditions. makes it simost a panacea for all diseases.

(Journal Special Service.) Berlin, Jan. 16.—Kaiser Wilhelm personally opened the Prussian parlia-ment this forenoon, reading his speech from the throne in a strong, clear voice. On entering the parliament he was pre-ceded by two noble heralds clad in motley fantastic costume specially designed by the kaiser. These heralds will figure in all future state functions. A unique but embarrassing incident came after the kaiser closed his speech. According to an invariable custom, the oldest deputy, the decrepit Herr Senex, called for three cheers. He paused and waited, but none came. It seemed as if the diet had conspired to omit the demonstration of its loyalty. During a painful interval which followed the kaiser frowned and then marched toward the door in a dead silence. Just before he reached the portal Herr Senex seemed to awake as from a day dream and started the hurrahs. The whole assembly, which by hypnotism. (From the Louisville Post.)

(Special Correspondence.)

NEW YORK, Dec. 14.—Dr. Wallace Hadley, a well - known professor of chemistry of this city, has undoubtedly made the most sensational discovery of the age. Call it divine power, science or whatever you will, the fact remains that in a single night, so to speak, he has completely upset modern medicine, defied all known laws of nature and utterly dumfounded scientists and medical men. Physicians have sought out their worst cases and taken them to him, thinking they might find one he could not cure. They admit that all their own remedies are but bread pills as compared with the remarkable discovery of this wenderful man. He has already done practically everything but bring the dead to life, and the scientists are now on the qui vive, expecting

has already done practically everything but bring the dead to life, and the scientists are now on the qui vive, expecting him to do this next.

"How did you happen to make this great discovery," asked a reporter who called to find out the secret of the tremendous furore he has created.

"Ever since I graduated from the medical department of the University of Buffalo," said the doctor, "I have been convinced that no disease should cause death. God has, in my judgment, provided a cure for every ill to which the human flesh is heir. Man must search and find this cure the same as man discovered the telegraph, the telephone, etc. The first thing I set out to do was to find the exact elements which compose a living being and sustain life, to discover the power which makes a man's heart beat and his body live. I next determined to extract these products from animal, mineral and chemical substances and combine them as they are found in a living being. I

bronchial trouble. My whole system was diseased and run down; I suffered untold agonies. I often felt that death would be a welcome relief. I am confident that you saved my life, and had it not been for your marvelous treatment I should today be cold in my grave. I write this letter for the good of humanity, that others may be induced to try the wonderful treatment that has cured me."

ity, that others may be induced to try the wonderful treatment that has cured me."

"Do physicians take your treatment?" asked the reporter.

"They certainly do," said the doctor. "I am treating a large number now. Of course they would not want you to publish their names, but here are their letters. You can read what they say. I cure them when all their own ramedies fail. I have demoristrated beyond doubt that the most serious disease can be overcome. That the lives of 'thousands of men and women can be saved who have heretofere been carried off to the grave. I estimate that I shall save the lives of over one hundred thousand people the coming year who would otherwise have died an untimely death."

"But how do you account for your wonderful power over death?" asked the reporter.

"Step this way," said the doctor, leading the reporter into his large laboratory, 'and I will show you the seurce of my power. I will explain to you the secret for which wise men have sought for ages." The doctor here pointed to a mysterious red fluid extract in a tightly corked glass flagon. "This," said the doctor, 'is the apparently simple extract that has startled the civilized world. This is the powerful essence that has given me the title, 'Divine Healer,' 'Miracle Worker,' 'A Latter Day Saviour,' etc. Of course, I am nothing of the sort. I am a scientist. My discovery is scientific, See these red-hot crucibles? Into them I throw the materials which compose a living man. See those red and blue streaks of fire shooting upward? They are hot flashes from magnetic wires attached to huge electric machines, It is by these processes that I abstract life from the materials of nature. Did you ever stop to think that wheat and corn come from the earth and air? If we knew the wonderful chemical secrets of nature we could make corn, wheat and other food from the earth and air? Is we knew the wonderful chemical secrets of nature we could make corn, wheat and other food from the earth and air. So my discovery of the vital principle of life is large, two for each representative at large, two for each congressional district, and six delegates each for Abaka, Arison, Indian Territory, Oklahoma-and Hawaii. One alternate is to be elected for reach edegate. Delegates must be stelled but for each edegate. Delegates must be stelled but for each edegate.
