#### KID MONROE TO MAKE HIS DEBUT

(Journal Special Service.)
Denver, Jan. 26 Denver is a jealous town, and since Young Corbett, her famn, has left the featherweight ranks for the lightweight class she has another good light one who is coming out to take a chance for the featherweight championship. His name is Kid Mou-

"Yes, it is true," remarked Monroe when questioned as to the report of his going into the ring as a fighter in the featherweight class. "I have got down to hard training and I mean to capture the featherweight title or drop out alto-

Kid Monroe's quest for the featherweight championship does not mean that is going after Young Corbett, Hanlon or Jimmy Britt at the start. He intends to meet Jack Gardner, Dixon, and Abe Attell, present claimant of the seatherweight title at 122 pounds. "These men and other clever fighters I shall meet first—then I may go after Corbett, Britt, and others of their class," said

No. it is not true that I am to fight Kid Williams of Philadelphia, and I do not know how such a report got out. He is fighting in the lightweight class, as I understand, but if I can add a little weight I would be willing to take Williams on at 129 pounds ringside. I expect to go East to Boston shortly to arrange for a match in that city."

#### BRIEF SPORTING NOTES.

Sandy Ferguson knocked out Jim Galvin at Boston the other night. What other result could be expected when he was the chopping block for Al Limerduring his training days for his flasco with Munroe.

Charles Moth, a Milwaukee wrestler, lost a match with Robinson, the Stock-yards champion, last week. The Milwaukean ought to be able to eat holes in his opponents.

Tom Sharkey found a horseshoe while out on a run the other day. Tom believes that it is indicative of success Perhaps it will bring a bidder for the

contest in view with Munroe.

Kid McCoy signed articles for life with Indianola Arnold, of the "Wizard of On" company, at Toronto, Sunday afternoon. The kid has been in similar matches several times before and lost. Will his luck be with him?

Barney Dreyfuss is suddenly opposed to Sunday baseball. For three years he has been on the schedule committee of the National league. In that time the astute Pittsburger has billed the Pirates for many lucrative Sabbath games. Were they against his will or for his pocketbook?

#### MANY MORE MEMBERS FOR ATHLETIC CLUB

Spokane, Wash., Jan. 26 .- The directors and members of the Spokane Amateur Athletic association will en-deavor to make the membership of the club 1,000 strong and by so doing will be able to cut the monthly dues. A committee of three consisting of Presilent A. C. Ware, Sol Mayor and Manager . M. Cornthwait, was appointed to take arge of the new scheme and to complete the arrangements. In speaking of

the new plan, Manager Cornthwait said: "There has been no soliciting for membership, yet in spite of that fact from 15 to 25 members are voted in at meeting of the board. The demand for membership shows what could be done if an organized effort should be made to secure members and how easy it would be to raise the membership to 1,000. The plan is to form teams of three and to offer handsome prizes to the teams bringing into the club the Not only will it give us members, but it will stir up enthusiasm among the boys and business men. The direct result will be to raise ready money for the furnishing of the club building and the final result will be the

(Journal Special Service.) Spokane, Wash., Jan. 26.—The Spo-kane Kennel club is again considering a change in its plans. #### 'TEDDY" VISITED TENEMENT HOUSES.

When President Roosevelt was police mmissioner of New York City he, with other members of the commission made a tour of the tenement-houses of that city in the interests of sanitation and the general health. His report contained, among other things, a strong condemnation of the sweatshop system of manufacturing. His report, in part, says they found in many instances whole families housed in one small room, all of them who were large enough engaged in producing produce some article of light manufac-ture. In many cases families were found to be engaged in the manufacture of cigars for the large eastern manufacturers and jobbers, under conditions too horrible to describe, and the com-mission was a unit in declaring that any article produced under such conditions was extremely dangerous to the public health and also to the morals of those engaged in the production. It seems to us that the only way to be positively sure that we do not, by our patronage, give consent to the conditions as described above, is to look for the Union Blue Label when purchasing cigars, as it is positively the only guarantee known to the individual smoker that the cigar he smokes was produced under clean and healthy conditions, as that is one of the chief conditions governing its use. We might go a little further and invite the smoker to visit the cigar factories of Portland, and we think that he would insist on the local production when purchasing in the future, and thus accomplish the double purpose of satisfying himself as to the cleanliness of his purchase and helping to upbuild the city, which is the mani-fest duty of every citizent

SEA CAPTAIN SAYS THAT 124 6s IS BEST RATE OFFERED AND OUT-LOOK DESCRIBED AS DISCOUR-AGING IN EXTREME-ASSOCIA-TION TO RAISE RATES.

Captain Pellegro, master of the Italian ship Cressington, says that only 12s 6d can be secured for carrying nitrates from the South American ports to Europe, and that the outlook for an improvement of the rates is anything but ncouraging.

The Cressington is loading lumber for Callao, Peru, and the captain expected that a cargo of nitrates could be secured there at a profitable advantage. The captain is disgusted with the situation, and the probabilities are that no deal for the transportation of a cargo of nitrates will be closed just at pres-

Some of the owners have accepted what they termed an average rate to the South American ports, expecting to receive fair inducements from there to carry nitrate cargoes to Europe. seems that they have been disappointed, and several of them declare that had they known the bottom had fallen out of the nitrace market they would not have been so eager to take lumber ship-

ments down that way. Captain Porter of the Red Rock says that charter rates are bound to advance at no distant date. His reason for so thinking is that the shipowners have combined for the sole purpose of better-ing the condition of affairs, and that there can be no other result. He says his owners have sent him information to the effect that the day of low charters have about passed. They support their declaration by the statement that the shipowners' association, recently formed, has got things in such shape that a high penalty will follow if any of the members accept a rate lower than a certain figure which has been fixed as the minimum. Just what that is they failed to make clear, but Captain Porter says he presumes it is in the neighborhood of 30s for transporting grain cargoes to the United Kingdom. Any rate less than that, he explains, will mean a loss to the owners. For the past few years, says the captain, they have been experiencing heavy losses, but have decided to inaugurate a new
